We believe it is necessary to call attention in this first circular to the terms of the resolution of the con-gress establishing the International Bureau, defining precisely its powers and duties:

RESOLUTION ONE.

The International Socialist Congress at Paris considers
That as the International Congresses are destined to become the parliament of the proletariat, it is necessary to formulate resolutions for the guidance of the proletariat in their struggle for freedom;

(b) Edit an explanatory code of the esolutions passed by previous con-

resolutions passed by previous congresses.

(e) Distribute the reports of the Socialist movement of each country two months before the new congress meets.

(d) Furnish a general summary of reports on the questions discussed by the congress.

(e) Publish at different times leaflets and pamphlets on questions of facts and of general interest; also on important reforms, and essays upon serious political and economic questions.

(f) Take all necessary measures to facilitate the international organization of the proletariat of all countries.

RESOLUTION TWO.

The International Socialist Commit-ee shall form from the national or-anizations of Socialists in parliaments, special inter-parliamentary commis-ion to facilitate common action on reat political questions and interna-ional economics. This Commission tional economics. This Commission shall work in unity with the Interna-tional Socialist Committee.

RESOLUTION THREE

The International Secretariat located at Brussels shall have the custody of the International archives of socialism, and shall collect all books, documents and reports concerning the labor movement in different nations.

The congress has also decided that the nomination of two delegates from country shall be subject to the ratification of the proletariat of those countries. They have fixed the budget of the International Rureau at 19 000 (Germany, England, Austria, Belgium France, Holland, Italy witzerland, United States), shall each furnish \$60 francs, (\$150), of this amount, the other countries, (Norway, Argentina, Bohemia, Bulgaria, Rou-Poland, Portugal, Spain, Russia, Japan, etc.), shall each contribute 200 francs

There are other proposals in accordance with the above which your Committee has prepared with the assist ance of our Socialist friends from all many delegates, different proposals h we are now examining and, upon which we shall consult you.

At present we think that the most imare as follows: (I) To establish com ation with all Socialist organizalabor parties, parliamentar os, press, etc. (2) The codification

EVOLUTION OF PLATFORMS.

It will hardly be denied by those who possess any knowledge of the progress of the Socialist movement within the last fifty years or so, that with the passage of time and the development of capitalist production, the vision of Soas to methods of propaganda, and nowhere is this fact borne out more plainly than in the so-called "municipal platforms" formulated by local Socialist hadies here and there. The estimates great importance, have been relegated to secondary positions or neglected as entire tendency has been towards curtallment and brevity, "Immediate demands" in many cases have disappeared and are disappearing, although the old name of "demands" is still used to describe that which has supplanted

There is good reason for these gradual changes. As the nature of the class struggle becomes more and more comprehensible to the members of Socialist organizations, the folly of "demanding," without the requisite power to enforce becomes tever more apparent. Utopian socialism vainly endeavored to "persuade" capitalism to abdicate, by pointing out the superiority of its "plan" of society. To show the practicability of such plans, experiments, "samples of socialism" were necessary, The invariable fate of these experiments is famillar to most of our readers. Socialism, considered wholly as a "plan" demonstrated its own imprac ticability.

From the writings of Marx, Engels, and others, a conception of the class struggle gradually forced itself upon the revolting workers. These writers had shown conclusively that capitalism itself must first be made impossible bethe eld Utopian school of thought inits nature and consequences. Between and actually declaring that It must be and would serve as a foothold from which further demands could be made. Fabienism was supplanting Utopian-

some of the "demands" of the Socialists. It is now becoming apparent that this was not so much the result of "demanding" as it was a manifestation of the struggle raging between the great ductive powers of the world that doubt and small exploiter, and a desire upon socialism which would not affect their material interests and which could at the same time serve as a barrier from behind which the ruling class could say |returned. to the revolting proletariat: "We are Socialists too." admit that they considered themselve to say that the "municipality" mean the "property owners."

In many places however this promis has been partially made good. And it is now dawning upon the projetarist, in unite of the falsehoods elreniated by the have been taken. So-called state so cialism turns out to be merely state capitalism, and it is now becoming evident that between the Socialist idea of public or state ownership and the canitalist idea, there is "a great gulf fixed."

The long string of, ridiculous "de placed by a few terse statements of working class. Measures, not demands. And it is pointed out that the enforcement of these toessures is en tirely contingent upon the election of Socialist candidates to office, and the amount of power with which they are endowed.

Little can be done in any town county, city, or even state, while capitalism remains supreme at Washington socialists know it and feel no reluctance done will by no means be negelected The chief value of Socialist participation in local elections is, first to register the growth of socialism through the vote, and second (more particularly in case of local victory), to show practically to the working class, that while the central authority remains in the hands of their exploiters the capture of considerably, things which were once ance. 'The system of capitalist saferegarded as indispensable,or at least of guards by which power descends from a central point down through states countles, cities, towns and villages, in being of insufficient value to obtain ever diminishing volume, was specially special mention in a local platform. The devised to thwart and check the action of any economic change hostile to the interests of the ruling class.

> The evolution of local Socialist plat forms constantly tends to embody enorand more the declaration of Mars tha the first step in the social revolution is that the working class shall make itself the ruling class. Some of the events which have led to this perception we have endeavored here to set forth. The period of "demands" is passing away as it is being understood that the granting of them while capitalism continue: in existence is utterly impossible and unthinkable. Neither will they be necssary when socialism attains political ate future. It cannot be evaded or suppower. When that period arrives, the pressed. Economic necessity will comtransformation of private property in the means of production and distribution into collectively owned property, will proceed on the assumption that capitalism is non-existent.

THE NEW CENTURY.

One hundred times has the earth made its circuit round the sun and the period known as the nineteenth century has gone to join its predecessors in its appointed place, the past of human, his forw and human achievement. At such periods naturally enough the minds of complished in the past, as a sort of evitably colored the ideas of those who guide to the possibilities of the future had theoretically accepted the class and the public press, which on the struggle, while only partially grasping whole reflects the opinions of those whose lines have been cast in pleasant persuading capitalism to efface itself, places, has recounted the marvellous strides made in the last hundred years thrown by the united efforts of the in every branch of knowledge, the won working class, a middle ground was dis. | derful inventions which have been ap covered which materialized in 'de- piled towards the satisfaction of hu mands" for certain specified meas- man wants, the natural forces which ures which it was erroneously thought man has harnessed to do his bidding could be forced from capitalism and in short, every factor which has human progress has been exhibited in chronological order in the columns of the press for purposes of comparison It then began to be perceived that in with the accomplishments of previous many instances the capitalist class centuries. A glance over the long list were not only willing, but were being will certainly convince the reader of average intelligence that in this respecthe nineteenth century stands pre-emi

and that the industrial revolution which has transformed the face, of the world is as truly the child of the past is It is the parent of the future. The application and invention of the steam engine, electricity, the telephone, telegraph, etc., were no haphazard discoveries. They sprang from the economic conditions which demanded them and which stimulated the thought necesary for their production.

Those who mostly deny that happiiess, the reasonable satisfaction of the physical and mental wants of the human race, is the end and object of soclety generally attempt to show that all who have contributed to making possible the triumphs of the century just passed have been sharers in the benefits produced. To a very limited extent this is true, to a very large extent unqualifiedly false. At no period of the world's history have the mass of mankind received so little of what their labor has created, as at the present.

And it is the recognition of this fact, (not indeed expressed in these words). that alone casts a doubt upon the brilliant prospects marked out for the twentieth century by those who have profited through the labor of the nine teenth. An enormous mass of human beings deprived of their just portion of the wealth which is the creation of their own bands and brains, and gradprivation in an unjust system of dis- pelled to "invade" England in a similar tribution, may well appear as a menace to those who affect to regard the present economic system as permanent.

The nineteenth century has solved the problem of production, the task of placed upon "planks" have changed an outpost is in itself of little import- the twentieth will be the solution of the problem of distribution.

The scientific knowledge of the present is also the property of one class, who control the means of livelihood of those who devote their labor to augmenting the sum of human knowledge. To apply this knowledge for the benefit, not of individuals, but of the entire community is a task which the twentieth century will see completed.

As the basis for what was accomplished in the last hundred years is to be found in the centuries preceding, so the nineteenth century has formulated the problem of the twentieth. "Shall the results of the social labor of mankind be appropriated by a small portion of society or shall they be the common heritage of all?"

This is the question that must take precedence of all others in the immedican be but one answer. The method of distribution must be made to harmenize with production. The twentieth century must complete the work of the nineteenth-by substituting socialism for capitalism.

> The opening of the new century is to see an attempt made for the wholesale "evangelization" of the United States through the co-operative effort on the part of the existing churches. One week of "united prayer" is to inaugurate the attempt, which it is declared will result in one of the greatest religious "awakenings" ever known in the history of the country. Two million "souls," and incidentally twenty million dollars are to be garnered before January 1st, 1982. The fact that the chairman of the movement is known as "the business man evangelist" may perhaps give the casual reader some idea as to which of the two objects are most likely to be se-

The capitalist class may perhaps be induced to open their purses for the furtherance of this scheme, but we do not hesitate to prophesy that the results will not come up to expectations. The "business man's" evangel shows signs of being played out as a drawing eard. If the exploitation of the workers is to continue, the exploiters who attempt to hypontize them into a state of non-resistance, will find that the present occupies their attention considerably more than any hypothetical "here-after." The twentieth century will not be devoted to preparations for life in pel mankind to deal with it, and there another world, so much as to making the present one habitable and decent for those who live on it. The "good tidings" of socialism will shortly supplant the discredited evangel of the "business man" and all that it now represents.

This work contains in plain and sim ple language perhaps the best statement of the attitude with which a large and growing number of the working class regard what is foday termed "religion" and the "church." MUNICIPAL OWNERSHIP.

Its Claims to Special Prominence in cal Spicialist Platforms Cannot Be Sustained.

The fact that the municipal platform of the Chicago Socialist party does norcontain a declaration in favor of "municipal ownership of public utilities"; has aroused considerable comment and some objections. These objections may properly divided into two classes First, there are those who maintain that while such ownership is not necessarily a part of socialism, it is of sufficient importance to the laborers to deserve mention in a Socialist platform; cond, it is said that such ownership is a "first step" in the direction of socialism, or is an example of "socialism made the "Issue" of this campaign by

To be sure these is still a third form of objection which has been put forward by a little handful of people, who masking under the name of socialism tre seeking to disrupt all Socialist activity and organization. These would have it that the absence of a declarato it. But it is so manifestly evident that these persons are dishonest in their position that it is not worth while to notice them, the more so, as the account of the convention proceedings in The Call specifically stated the contrary and the platform itself declares in favor of Cobtaining for the working class all that is possible under the present system so long as it shall last;" and finally it was pointed out at the convention, and reported in The Call, that was the sense of those present that this point was already covered, and given all the prominence it deserved in the state and national platforms Regarding those objections which are

put forward in good faith, it may be said that the first one stated above was the one upon which the most of the debate of the convention was con-centrated. It is maintained by those plank into a Socialist platform that there are hundreds of things that are capable of accomplishment within the confines of capitalism that are infinitely of more importance to the worker than municipal gas, street cars, and pointed out that the agitation for these things was exclusively by the capitalist serve, can deny. Reference is not here made to the perfunctory resolutions at the behest of small property owners. or in response to an agitation started that the inspiring minds back of the agitation are the ones who will reap ban landlords, store-keepers, and in short, the same interests that are supporting Bryanism. The fact that laborers sometimes passed resolutions in favor of free silver and high tariff did nor inspire Socialists to place those de-mands in their platforms. The Socialists if elected would, as a matter of course, take possession of these indusfries, in the same way as they would see to it that the streets were kept clean and the city hall office floors swept, but they are not mountebanks enough to claim that any of these things are of sufficient importance to the laborers to be made an "issue." more interest to the laborers of Chiproper and adequate school facilities clothing, (not as a charity, but as a in Shansi, right, in the same way as they now receive free books and desks), than it was that the corner grocer should get his gas ten cents a thousand cheaper. They believed that it would be a greater help to the producing classes of this city to those of their children saved, by securing to them the benefit of the scientific medical knowledge of today, than it would be to permit the city of Chicago to sell electric lighting to the residents of the Lake Shore Drive. The Socialists were foolish enough to think that the laborers of this city would be more helped by the guarantee of employment to the unemployed, and the consequent removal of the haunting terror of want and suffering from their homes, than by being permitted to take fifty cents less a month out the pocket labelled "carfare" and keeping it until the landlord demanded one dollar more. But there is no accounting for tastes

On the second point the Socialists are quite sure that if the capitalists are permitted to select the "steps" which ill be taken toward socialism they will select a very round-about way and may ose us in the wilderness of confusion The Socialist cannot see that the Belgian state rallways, with their one-fifth of a cent per mile fare, have done as delism in that country as the presence of a few fighting Socialist laborers in the Chamber of Deputies. and it would require close searching rkian "public utilities" to find one to hopelessly foolish as to speak of their ownership by the state as having any relation to socialism.

It may be that the progressive inhabit ants of Shansi are merely trying to ac tion in FAVOR of municipal ownership aftered conditions which may be looked indicates that the party is OPPOSED for when the "civilized" powers agree amongst themselves as to who shall exploit Shansi, when the "partition" takes place. If this surmise is correct it shows that China is at last "awaken ing" to a sense of her "moral" responsi-bilities in the future, and preparing to take her place amongst the "civilized" nations of the earth. Of course it could not be expected

that Shansi could possibly adopt at once the most improved methods of utilizing human flesh, such as are practised by those who have brought to China the light of capitalist civilization. Doubt less the method of extracting the most out of that commodity is still unknown in the far off Chinese province, but there is no doubt that eventually "waste will be eliminated." If it were possible to bring to this country a deputation of the most "prominent and in fluential business men' of Shansi and opposed to the introduction of such a initiate them into the mysteries of modern up-to-date cannibalism as it is here practised, their return to their own land might be reasonably expected to inaugurate an era of "prosperity" such as we are now enjoying.

There is no likelihood the "staggering price paid for industrial that industrial centers will perish unprosperity, as proved in the condition of the poor and the selfishness of the

Ex-mayor Hewitt started off by say ing that "The cich have not begun to do what they ought to do."

Then what "ought" the "rich" to do In his next sentence the ex-mayor shows two things. First, that his statement that the "rich have not begun, etc." is false. Second, that he considers it the duty of the rich to "give" to the pool-to "give" more than they are at present giving. In other words the duty of the rich towards the poor can only be performed by an constant extension of alms-giving. This is how he puts it. in the most illogical paragraph perhap that ever issued from a muddled brain:

"Men that I almost worship for their generosity and solicitude for their generosity and solicitude for those that have less are not giving in pro-portion to their wealth, the half what was given by their families a genera-tion ago."

First these people have "not begun to do." Next it seems that they are giving, but in proportion to their wealth, less than half the amount that their families gave a generation ago. The speaker then asserts that he almost worships them. What for? For "not having begun?" No. For giving less than half,etc.? No. He almost worships them "for their generosity!" If there is anything "striking" about this utterance except its remarkable foolishness, we totally fail to see it. But this is about the best brand of logic that the sentimentalist can possibly at. ford. The ex-mayor then interrogated his "rich and fashionable" audience as

"Have we the right to take all this wealth and do nothing to correct the eyils created in its production?"

If Ex-mayor Hewitt had been addressing an assembly of young men never have east a doubt upon the 'right" to take the product of the labor of others. He would have shown ple, that "success" depended upon the ability of each of his individual hearers to perform this feat more thoroughly than his competitors. He would have labeled this quality "energy," "thrift." 'perserverance," "business foresight, commercial ability," etc., etc., and would have assured the young men that the accumulation of wealth could only be realized through the exercise of these "virtues." The "evils created being placed in the mills." A laborer in its production" could be conveniently overlooked while the business of labor-skinning was in full swing. After the "rich and fashlonable" stage had been attained it would then be in order to "correct' the evils" by handing cloak of "charity." The "right to take all this wealth" involves the sacred ably suspicioned that they heard a "duty" of making beggars of those from whom it is taken. Socialists have been constantly re-

"Good God." Can this be the end to which we have been working all these centuries? For heaven's sake, is this the result of our industrial development, and must our prosperity, as a nation, be purchased at such a staggering price? If these terrible tenements, these over-crowded districts, these dark and foul dwelling places—if all these miscries must attend industry, then I would to God that every industrial center could be destroyed as were Sodom and Gomorrah of old and man be driven back to the fields."

Possibly, like most of his class, Exwith the philosophy of socialism, and like them he has most probably dismissed it as visionary and impractica ble, and yet the remedy he postulates in the opening of his speech trans-forms itself into a wall of despairing Like the magiciah, who by his incan ations raised the evil spirit which he

Such imaginings are even more impracticable than 'socialism, though apparently Exmayor Hewitt does not think so. dustry" can be carried on without the terrible accompaniments which outrage the humanitarian instincts of Mr. Hewitt, And there is no doubtful "if" about it either. Those who mainly pay the "staggering price" of the prosperity which the capitalist class enjoy are already gathering for the solution of the problem which Mr. Hewitt cannot ven understand.

And they expect no assistance from miraculous celestial fires, or from the ignorant sentimentalism of capitalist reformers. Long before the new born century has attained its meridian this juestion will have been settled once for all by the ballots of millions of class-conscious Socialist workingmen in every nation on the globe.

WHY THE LAW "COLLAPSES."

Report of the State Factory Inspector Shows Futility of Child Labor Laws.

The annual report of the State Factory Inspector shows that nearly 11,000 children of both sexes, under the age of sixteen years, are employed in Chicago factories alone, and states also that girls and boys of tender years are crowding out grown men and women as factory employes," and all in spite of the laws enacted against child-labor, which is declared to be a complete failure.

The report then goes on to state that previous reports have

"repeatedly pointed out the weakness Tepeatedly pointed out the wmakness of the present method of preventing child labor under the age of 14, the numerical insufficiency of the present force of inspectors, and the total collapse of the other clauses of the law which aim to protect the health of the children and to forbid their work at those occupations where their lives or limbs are in danger or their health likely to be injured or their morals depreaded. praved.

It might be asked why the law "collapses" when it is attempted to apply it to the end for which it was apparently enacted. We rarely if ever hear of this disaster occurring when the law takes the form of an injunction against striking workingmen. Volumes of mislead. ing excuses have been brought forward to account for the non-enforcement of child-labor laws, but all are careful to abstain from mentioning the fundamental reason for such failure. The Socialist alone comprehends that the Fourteenth Ward branch have arranged for meetings every Friday night at 8 p. m. They have secured a meeting place at 334 W. Division street. Different speakers will address the meetings every week. The branch is the meetings every week. The branch is the meetings every week. The branch is the child-labor law were never intended to be strictly enfarced. Its enactment part towards making an aggressive campaign during the manths previous to, the election.

> class it is only reasonable to suppose that capitalist interests will be conserved. When the working class control the law-making power in all its branches it is equally evident that the expression, interpretation and enforce ment of law will maintain the interests of the producers. But the laws that capitalists fail to enforce will, when socialism supplants the present system. most probably remain neglected. There will then be no reason for "child-labor laws," because there will be no reason for child labor, which will in consequence itself be abolished. The profit system alone makes it necessary at present; the destruction of that system will make it unnecessary in the future.

THE EICH HOUR LAW.

es in Collision with "Public Duty" and Is Promptly Knocked Out of Time.

Looking over the Republican campaign text book a great many boastful statements tend to prove that the Re-publican party is "the true friend of labor," may be met with. Upon the number of "labor laws" passed by Republican governments special stress is laid. The eight-hour law for clerks and letter carriers in the postal service is claimed as a particular product of the energy and determination of the Repub lican politicians that their dear friends, the working class, should be made as comfortable as possible.

The eight-hour law for postoffice clerks and mailcarriers is a product of Republican legislation. It might be thought that Republican officials would look after its enforcement with a jealous and careful eye so far as government employes were concerned.

But it seems otherwise. On Christmas day in the Chicago postoffice ten cierks M to whom the legal eight-hour day was supposed to apply protested against being made to work from thirteen to fifteen hours per day. They were curtly ordered back to work. One however refused to be bulldozed, stood upon his legal rights and was promptly syspended. "I have been suspended from duty for refusing to obey an order requiring me to continue at work after thirteen consecutive heurs of labor. The clerks in my section have been working from twelve to fifteen hours, day and night, Sundays included, for two or three weeks. They went to Superintendent Marr this morning and requested permission to go home, as they were unfit to work any more until they rested. The request was curity refused, and they were ordered back to work on the day, set, I refused to continue work and went home. I was so worn out that I had to stop twice to rest on my way from the cars to my home.

"A great pretense was made that I was refusing a public duty. Nothing of the sort. Myself and others would have done more work if we had been permitted to rest a while. Chrismas is no novelty. The Socialist Campaign Book of 1900.

CONTENTS.

The publication of this work marks an era in socialist propaganda in America in that it places in the hands of every socialist worker the information and material necessary to his work in as attractive a form as the material hitherto only accessible to the capitalist parties, while at the same time this material has been illuminated and explained in at the same time this material has been maked of the book at once a store-house of knowledge for the socialist speaker and agitator and the best propagandist work yet published, for it not only presents the doctrines of socialism in clear, convincing form, but accompanies the reasoning with the facts from which it is drawn in a manner that can but carry conviction to any unprejudiced mind.

The table of contents given herewith will give a good idea of the plan and scope of the work. The first two chapters are not simply a recital of isolated facts, but so correlate the historical data as to cause them to form a convincing argument of the trend of industrial development. The chapters on trusts bring out their two-fold character by which they mark at the same time a higher degree of economic development and a more intense exploitation of the producer. In "Labor's Demands and Capitalism's Answers" the efforts of organized labor to secure relief in "labor legislation" through capitalist parties is treated exhaustively and should prove a convincing argument with any trade-unionist for the necessity of independent political action along socialist lines. The chapter on "Wages and Living Expenses" is a careful examination of our present "prosperity" and a complete refutation of the claim that the laborers have shared in industrial advance. The discussion of "How the Working Class Live" is written by one of the foremost students of this subject in this country and embraces much material hitherto unpublished. The last two chapters, on the "Capitalist Political Platforms" and "The Growth of Socialism," complete the line of argument furnished by the facts in the preceding chapters, making of the whole work a powerful brief for the cause of socialism.

THE SOCIALIST CAMPAIGN BOOK contains 150 pages and is handsomely printed on extra book paper with an artistic cover. The price, including postage to any address, is 25 cents; 5 copies, \$1.00.

A DOUBTFUL "BALANCE."

In reviewing the progress of human society in the century just passed, it is interesting to observe how every capitalist newspaper and magazine attempts to show, as a justification for the present arrangement of things economic, that the condition of the work ing class has on the whole been im proved. While it is hardly necessary to debate this question pro and con, it is easy to see why so much space is devoted to it in the journals which reflect the opinion of the ruling class. No such strained and labored effort is necessary to convince the casual reader that so far as the possessing classes are concerned, the century has brought to them material benefits out of all proportion to what the actual producers have received. But the reviewers evidently consider that they can only demonstrate that to use a phrase much affected by all of them, "while the rich are growing richer the poor are grown less poor."

That the economic development of the century has not riously affected the life conditions of the working class they in general- are ready to admit. But they are careful to make it appear that whatever hardships have been inflicted upon the workers, has been rather more than balanced by compensations in other ways. If for instance the workmen have lost in individual independence, they have been more than compensated by the collective independence and power which comes from the formation of unions -- a concluston which seems rather doubtful when it is considered that the concentration of wealth' and the control of whole branches of industry in the hands of small groups of capitalists notoriously tends to place them in a position to ignore the demands of labor organizations, and in many cases to actually destroy them when they attempt to use the collective tedependence

Again, the intellectual loss resulting from the elimination of skill through machine production, where the whole labor time of the worker is spent in an the opportunities for popular education, the extension of the press, and the assumption of political responsibilobserved that since these things are yet under the control of the exploiters, it is a debateable question as to whether the workers in reality have gained more than they have lost.

Many similar illustrations might be taken at random from these productions, all tending to demonstrate that on the whole the working class ledge for the nineteenth century shows some what more of profit than loss, but the above will suffice. These matters are still open to dispute, sithough it is hardly probable that any Socialist will be found wasting his time on arguing the details in order to disprove a favorable balance however small. It and for the sake of argument the contention of these capitalist apologists might be admitted. The real question is "Has the working class, whose laber alone made this enormous wealth possible, received in proportion to what their labor has created, as much as the workers of the two or three centurfes preceding the nineteenth?" This inquiry may be scarched for in vain in the columns of the capitalist press. Its very appearance is a prelude to social-

The wants of the workers have mul-

To surplus value. It is after all, these use a familiar expression, they were wants which can only be precarlously and partially gratified that constitute the real basis for the progress of the working class in the nineteenth cent-

will form the chief work of the twentieth.

A few months ago Mark Hanna, speaking on the favorite Republican topic, of "prosperity," stated plainly that the working class could expect no more than they were at present "enfoying" miess a total economic charge (he didn't specify it), took place. We are inclined to believe that statement from Hanna was exceptional, in that it was absoutely true. And the twentieth century will be devoted to the fulfilment of his prophecy, for the basic-reason that the wants of the working class can less and less be satisfied under the present system of production and distribution.

MIDDLE CLASS "REVOLUTIONS."

It has been steadily contended by Socialists, and has often been pointed out in these columns as well as those of other Socialist papers, that the question of imperialism was an economic pecessity for capitalism; that it was ism which reigns today in the work curing markets for the commodities produced therein. Against this necess. ity the outbursts of sentimental ora tory, the harking back to abstract principles conceived of as the essence of liberty in the eighteenth century have proved impotent, and those politicians who satisfy themselves with the assurances of Republican statesmen as to the impossibility of imperialism are only now beginning to see the worth lessness of such assurances.

On January 4 Senator Teller, on the floor of the senate, publicly revoked a former speech which he had made before the same body, assuring the people of this country that there could be no imperialism in the Philippines. He then declared that the government accorded to the islanders was essentially imperialistic. Senator Hoar implored his colleagues to allow "God's law to prevail in the islands," adding that the only crime of the Filipinos was their love of liberty.

Senator Wellington followed in speech in which he asserted that he had only voted for the Paris treaty bement under this new fule which recognizes the had been misinformed and misled by the administration, and by the President himself. He then demanded to know the intentions of the administration regarding the Philippines. He was promptly informed that the President could not think of reliquishing authority in the Philippines, To which he retorted that Mc-Kinley had already surrendered territory in Alaska to Great Britain. His opponent replied that this transaction was not a surrender but a "modus vivendi." Wellington then declared that unless a revolution or uprising occurred against this policy, the territory surrendered in Alaska would never be reclaimed by the United States.

To which he retorted that Meendess repetition of one mechanical that unless a revolution or uprising ocoperation, is said to be more than offset curred against this policy, the terriby the shortening of the hours of labor, tory surrendered in Alaska would never be reclaimed by the United States

Within the last two or three week these reactionary hints have been heard more than one public individual. They are only referred to in the capitalist press with short and contemptu ous comments attached.

And rightly so. Capitalism has noth ing to fear from the vaporings of its alone carries the potentiality of revolu tion within itself, cannot be induced to champion the cause of the small exploiter with any hope of success. THE TEACHERS' FEDERATION.

Musical and Dramatic Entertaiment to At the Coliseum.

A musical and dramatic entertain ment will be given under the auspices of the Chicago Teachers' Federation, at the Collseum, Wabash avenue and Fifteenth street, on January 18th at 3 ing more and more expended in keeping p. m. The proceeds will be devoted to the system itself alive, and the exploitthe Tax Fund which the Federation is endeavoring to raise, for the purpose are compelled to disgorge an ever-inpeoples' fight for JUST TAXATION of municipal franchises." The following explanation of the struggle which the Teachers' Federation is now engaged in, is published by request:

This entertainment for the benefit of the Federation Tax Fund, aside from the Federation Tax Fund, aside from its merit from an amusement stand-point, is of unusual interest owing to the great public question underlying its inception and the efforts of the Chicago Inception and the efforts of the Chicago
Teachers? Federation to secure for all
tax payers equitable just taxation. This
struggle which has occupied so much
public attention during the last year
has been marked by many new and
startling phases. From the first it
called public attention to facts that
seemed to have escaped notice. For 23
years the state of Hilneis has had on
its statutes a law for taxing franchises,
but for 24 years that law has been ignored.

but for 24 years that law has been ignored.

In 1899 the franchises of the street railway, gas, electric and telephone companies of Chicago enlirely escaped, though the statements of these companies to their stockholders showed the value of these franchises to be upward of 20 million dollars.

To prevent these franchises from espaping taxation this year as last, the Federation, on October 8, instituted mandamus proceedings to compel the assessors to list the property as provided by law.

The assessors listed it, for the free franchises from each compel the state Board of Equalization to assess the property so listed.

The State Board disputed the right of the courts of interfere, but on November 21, Judge Creighton decided against the State Board and gave the Board three days in which to answer the petition of mandamus.

"War of Great Trusts to End." "Coffee and Sugar Men Agree." "Gets \$500,000 From Tin Trust." Champion Iron and Steel Sells Muske. gon Plant to Combine."

These items which appeared in the morning papers of January 4th would seem to indicate that the new century opens auspiciously for American cap talism. It is to be peace instead of war between the great exploiters. The working class might profitably absorb the significance of this tendency. While the capitalists unite for exploitation why should not the laborers of America in turn unité for emancipation?

At the same time reports from across the Atlantic state that Europe has almost arrived at the end of its taxing power. The enormous cost of armies and navies together with the rapid growth of American competition fore tells that a serious crisis is near. From this dilemma there appears no way of escape, as the demands of the "state, embodies in itself the fabric of capitalist society, become more exact-ng year by year. The surplus value extracted from millions of workers is becreasing portion of the spoils. Yet leng before the time that capitalism becomes actually unprofitable, there will many millions of its victims organized to help it out of existence and who will not be content to stand idly by while it falls to pieces of its own weight.

Union men are especially requested to see to it that their respective organizations are supplied with the next issue

Motion to adjourn was passed.

The above is a faithful transcript from the press report of the proceedings of the Democratic County Central committee on January 7. In all this "feast of reason and flow of soul" it would be difficult to detect any traces of the "eternal and time-honored principles" of democracy, though it might appear that a "declaration of independence" was being noisily proclaimed by every individual present. It is evidently, a very difficult process to secure the 'consent of the governed' even amongst the representatives of the party who make the phrase a political fetish, but this was the object aimed at, though it was disguised under the elegant expression of "getting an axe out for the Burke faction." The fact that statesmanship of this sort is competent to capture the votes of 200,000 Chicago workingmen, goes a long way towards

It is utterly immaterial whether the dead man is to be regarded as a "friend" or an "enemy" to labor. 'The method by which his wealth was ac cumulated will still persist, and the death of a dozen multi-millionaires per day would make absolutely, no differ ence in the life-conditions of the working class. Jay Gould, Vanderbilt, Pullman, and scores of others are gone, but the system of private property in the means of production still survives, and will survive until capitalism receives its death-blow at the polls through the medium of the Socialist ballet.

The re-apportionment bill is perplexing the capitalist politicians. want to disfranchise the working class and throw the onus upon the other felow. It will be noticed that the Republicans do not intend to call the southern states to account for the disfranchisement of the colored people They actually helped to defeat a resolution tending towards that object.

The reasons for this policy are apparnough. The Republicans will not in erfere with the action of the southern Democrats because they desire them selves to disfranchise the norther working class. We have stated this before, and as the development of this scheme progresses we would repeat the warning, which is also a call to action

LOCAL NEWS AND NOTES.

Branches should pay the carfare of peakers who address their agitation

The Second Ward branch holds agita-tion meetings at Freiberg's Hall. Twenty-second street, near State, every Friday night.

All Socialists residing in the Four-teenth ward are requested to send their names and addresses to F. M. Hull, 8 Thomas street, Secretary Fourteenth Ward Branch Socialist party.

Last Sunday evening the Fifteenth Ward branch held a very successful agitation meeting at Socialist Hall. Ar-mitage avenue, four doors east of Min-waukee avenue. Comrade Bigelow addressed the meeting.

All comrades who held Workers' Cal all tickets are requested to make their return to A. Klenke, 36 N. Clark street, as soon as possible. The ball accounts must be figured out right away, and comrades holding tickets will confer a great favor by attending to this impadiately.

The Thirty-fifth Ward branch held an interesting agitation meeting last Friday evening at their hall in Masonic Temple, Austin. The speaker of the evening was Comrae Thos. J. Morgan, who took for his subject: "The Historic Basis of Socialism." Comrade Sfangland was chairman of the meeting. The attendance was good. The discussion lasted till 10.0 clock.

There was a good crowd present at the meeting of the Twenty-fifth Ward branch last Sunday afternoon at 3 celock, at their ball 989 Sheffield ave-nue, near Belmont. Comrade A. M. Simons delievered an interesting ad-dress on the sublect: "What the Sodress on the subject: "What the So-cialists Would Do If They Captured Chicago." After the address there was a long and interesting discussion. Next Sunday afternoon at the above address, Comrade A. Bisno will speak.

The petitions for nomination of city The petitions for nomination of city officers are now in the city organizer's hands for distribution. The comrades should lose no time in providing themselves with these petitions and securing enough signatures to assure the tickst a place on the ballot. This should be done immediately so that the party membership will be able to devote all their time to securing signatures for the ward and town petitions as room as the matter of redistricting is settled. Petitions can be had on application to A. Klenke, city organizer, 38 N. Clark street.

A great many branches in getting out cards and hand bills neglect a very important matter. The Workers Call must not be forgotten at any time. Hand bills and cards used in advertising branch "meetings should also be made to advertise the Workers' Call. Such an advertisement is valuable because it reaches people who would otherwise never hear of the paper. We recommend the following formula to be used by the comrades on all hand bills, programs and cards: To learn about socialism read the Workers' Call, ergan of the Socialist party of Chicago. Office, 36 N. Clar kstreet."

The Socialist Educational club held an interesting agitation meeting last Sunday afternoon at 3 o'clock at its headquarters, 1132 Milwaukee avenue. The speaker of the afternoon was Comrade Thos. J. Morgan. His subject was: "Law and Socialism." The attendance was good, and was composed almost entirely of young people. After, Comrade Morgan's address there was an interesting discussion 'participated in by nearly all those present. The discussion lasted until 6 o'clock. Comrades will do well to attend these meetings of the S. E. C. and help to make them a success. The enthusiasm and interest manifested by these young Socialists is a matter of inspiration to those who are older in the movement, Next Sunday afternoon at 3 o'clock A. M. The Thirtieth and Thirty-first Ward branches have secured headquarters at 6008 Halsted street, for the winter. The rooms will be kept open every evening and a regular series of agitation meetings will be arranged in the near future. A good stock of Socialist literature has been laid in, and the party papers will also be on file. Everything is being arranged for the comrades so that instructive and enjoyable winter evenings may be spent in-a well-equipped reading-room. New life has been infused into these branches and a steady educational campaign will be maintained during the winter months. The zeal and enthusiasm displayed by Comrades A. Brown in taking steps to push things through, is highly appreciated by the membership of the branches, and exists significant of the new activity which now animates the Socialist comrades of Englewood.

So with the collective man in a world-system of slavery; let one bond on his soul or body snap, and he will tug at other bonds, till at last the whole slave-order is put to the test, when he sees that he must have liberty everywhere or nowhere. Thus the effort for economic freedom is disclosing itself as the struggle of man for standing ground upor which to achieve an emancipation that shall be complete; an emancipation reaching, as high and as deep as human feeling and action, and opening the gates through which each man's life may pass into a rich, glad, free song of universal good. The Socialist Campaign Book of 1900.

CONTENTS.

The publication of this work marks an era in socialist propagands in America in that it places in the hands of every socialist worker the as the material necessary to his work in as attractive a form as the material hitherto only accessible to the capitalist parties, while at the same time this material has been illuminated and explained in the light of the socialist philosophy. This makes of the book at once a store-house of knowledge for the socialist speaker and agitator and the best propagatilist speaker and agitator and the best propagandist work yet published, for it not only presents the doctrines of socialism in clear, convincing form, but accompanies the reasoning with the facts from which it is drawn in a manner that can but carry conviction to any unprejudiced mind.

The table of contents given herewith will give a good idea of the plan and scope of the work. The first two chapters are not simply a recital of isolated facts, but so correlate the historical data as to cause them to form a convincing argument of the trend of industrial development. The chapters on trusts bring out their two-fold character by which they mark at the same time a higher degree of economic development and a more intense exploitation of the producer. In "Labor's Demands and Capitalism's Answers" the efforts of organized labor to secure relief in 'labor legislation' through capitalist parties is treated exhaustively and should prove a convincing argument with any trade-unionist for the necessity of independent political action along socialist lines. The chapter on "Wages and Living Expenser" h a careful examination of our present "prosperity" and a complete relutation of the claim that the laborers h ve shared in industrial advance. The discussion of "How the Working Class Live" is written by one of the wremost students of this subject in this country and emittaces much material hitherto unpublished. The last two chapters, on the "Capitalist Political Platforms" and "The Growth of Socialism," complete the line of argument furnished by the facts in the preceding chapters, making of the whole work a powerful brief for the cause of socialism.

THE SOCIALIST CAMPAIGN BOOK contains 150 pages and is handsomely printed on extra book paper with an artistic cover. The price, including postage to any address, is 25 cents; 5 copies, \$1.000

Common Expiration of Grants Impossible.

Furthermore, it is impossible to fix a time, either in the near or remote futuce when the grants will expire in common The citizens of Chicago will recall that just previous to the annexation of Austin to Chicago, the council of that sune peculiar impelling motive granted a franchise for fifty years. The question gives its own answer. The negligence or ionesty, as the case may be, of public officials in extending these privileges, as they have, instead of being made a eason for the further grants of privilege, should be regarded as they in fact are, the very best reasons why no further grants should be made.

ORGANIZED LABOR ON MUNICIPAL OWNERSHIP

The complete text or the report of the Chicago Federation of Labor upon the question of municipal ownership will be found in the columns of this issue of the Workers' Call, where it appears by request. The position of organized labor towards this subject will, we think, prove interesting to the readers of the paper from the fact that the question is dealt with as near as possible from the standpoint of the working class. Time and space do not permit of an adequate editorial comment, but it is safe to predict that the ideas suggested in the report will find little favor from either of the great political parties, who have between them taken turns in preying upon the working class of Chicago. These ideas are completely hostile to local capitalist interests and their rejection by both Re publicans and Democrats may be looked for as a matter of course. In suggesting measures impossible of realization under capitalist class rule, the rank and file of organized labor will ultimately be brought to see that in the victory of socialism alone can they be enforced.

The ingvement for "municipal ownership" springs mostly from the needs of the small business and property-owning classes, who see in it an apparent relief from excessive taxation. The enormous dividends now accrulag to the owners of the means of city transportation, they wish to utilize for that purpose. That these dividends should be diverted to the uses suggested by she Federation of Labor is a measure which they could not be reasonably expected to favor. The Federation takes the stand that the franchises revert to the city on expiry, without any legislative procedure, and scout the idea that the present holders are entitled to any compensation whatever. They ask that the city street railway system be made self-absorbent, that the dividends earned shall be used entirely for improving the service, increasing the pay of the employes and reducing the hours of labor so that more may be employed. It will be apparent that this disposition of the question lies utterly outside the framework of present soclety. These demands may be looked for in vain in any capitalist political program, and even supposing that they were enforced, the improvement in the material conditions of the working class as a whole would be so slight as to be hardly perceptible. However, the fact that the Chicago Federation of Labor have taken the position stated in their report, affords a measure by which the growth of class-consciousness, and recognition of class interests amongst organized workingmen can be judged. It is probable that no great length of time must clapse before the entire truth forces itself upon them, that in the collective ownership of ALL the means of production and distribuof permanent and considerable better. ment of their material conditions of life.

The most interesting phase of the situation lies in the fact that the union to which these men belong had entered into an arbitration scheme, similar in Steinway Hall as a decided step towards settling the heretofore, unsolved "labor problem." In fact, this particular agreement was eulogized in glowing terms at the same gathering, as an sure harmonious relations between em ployer and employe, and abolish that bugbear of both parties, the strike And get within a few weeks, at the first contact with material interests, the much-vaunted agreement explodes leaving the visionaries who regarded it as a preliminary to final settlement weeping over the fragments.

The so-called "economists" who at tempt to harmonize elements which in their nature are antagonistic, bear the ame relation to scientific students of sociology as the alchemist of five centuries ago does to the modern expounder of chemical science. Out of the demenstrated failures of alchemy however ame the discovery of modern chemical truths, and so out of the fruitless experimenting of economic quacks, the reality of the class struggle as a truth will emerge, and the strike and lockout will remain as manifestations of its of capitalists and laborers, two classes whose material interests compel them to assume an attitude of uncompro mising hostility towards each other.

The union men who have disregarded the impossible agreement to which they were a party, and who have ignored the order of their president to return to work, have by their action recchoed the the utterance of the rallroad magnate who declared that he would "rather go out of business" than arbitrate. In quitting work, they have actually done o. That they will resume again is of course certain. A WORKINGMAN'S LETTER.

Comrade John Collins, Socialist Party Candidate for Mayor Accepts the Nomination.

Comrades of the Socialist Party:-In accepting the nomination of your onvention for mayor in the approach ing municipal election, I take the op portunity to state briefly my understanding of the obligations which de

The platform adopted by the Socialist party in the same convention which conferred this nomination upon me, accept in its entirety, and shall, if elected, endeavor to enforce its provision as far as possible.

The Socialist party is essentially the party of the wage working class and I, its nominee; am a wage worker. It enting the mater ial interests and aspirations of that lass, and emphasizes the necessity of the political supremacy of the workers as the only means whereby its object, the collective ownership of the means of production and distribution can be ble the use and enjoyment of the full product of labor by those who perform

As a member for many years of a la bor organization, I shall in the event of election, in all cases and at all times advocate and support the interests of organized labor when engaged in economic strife with the capitalist class to the extreme limit of such power a I may possess.

Recognizing, however, that the de elopment of capitalism constantly increases the difficulty of effecting eco nomic organization of the working class, and in many branches of industry enders such organization impossible, I shall therefore aid and assist to the utmost the general body of wage workers conditions of life.

The Socialist movement is characterized by its frank avowal of the existence of a class struggle, unavoidable and inherent in the present economic system, upon which as a foundation the entire movement of the modern proletariat towards economic freedom is based. With whatever power I may be invested, I shall take advantage of every expression of this struggle. whether economic or political to carry it nearer to its ultimate object-the complete supremacy of the working class-entalling the overthrow of the present capitalist system, and the establishment of the Co-operative Commonwealth.

The candidates of the various capitalist parties who may be nominated for the office for which you have selected me as your candidate, invariably regard the securing of such nomination as a tribute due to their superior merit as politicians. As a Socialist, I rec ognize that my nomination cannot be and is not regarded as such, either by those who conferred it upon me or by myself. I am merely your representative-your servant, whom you have chosen to do your will. Should our party be successful at the polis it will be incumbent upon me to see that the public administration is conducted in the interests of the working class, identifying as I do the public interests with those of the entire body of wage

Finally, I recognize your mandate alone as a guide, and comprehend that am subject to recall at your pleasure. My written resignation shall be placed in your hands previous to election, to hold or enforce, as you may think proper.

THE SHADOW OF FREEDOM.

Unreality of "Public Ownership" While

There is no surer way to secure the continual enslavement of a man or a class than to deceive them into thinking their slavery does not exist. Once they can be hypnotized into this state of mind they are bound by far stronger chains than smith ever forged or jatter ever locked. This has long been the condition of the laborer. He has been deluded into thinking that freedom to change masters meant freedom from nasters. In the same way he is deceived concerning the government under which he lives. With the coming of democratic and republican forms ofgovernment the laborers have been made to believe that they are their own rulers, not seeing that unless their spinds are free they cannot govern

The result of this is that it is some times harder to make workingmen realize that they are living under a class government in this country than in bility and executive are in power. Yet it is beginning to be understood in a fairly indefinite way that the present state and municipal bodies of America are controlled and exercised in the interest of the capitalist class. Many who see this however do not seem to be able to make the logical deduction from this that adding to the power and functions of such a government cannot help the laborers. Many persons who would hever think of giving the Trans-Siberian raffroad with its fares at less than a cent a mile as an example of a step toward socialism, although it is govern mentally owned, and probably furnishes road in the world, will still demand that the present capitalist government of the United States nationalize our railways as a step toward socialism,

The error in this position lies in the fact that those so talking have swallowed all that the capitalists have told them about the laborers being kings in this country and in some way think that national ownership would mean ownership by the laborers.

They do not see that to place additional power in the hands of a present government is to give greater weight to the instruments of oppression. Hence it is that the Socialists declare that if from municipal or national ownership of any utility they must first gain possession of the government which is to own them. There is all the difference ing for a capitalist party for the purand working and voting for a Socialist "What party to secure the same apparent end. the Workers' Call to October 1, 1900?" adding to the armory of their enemy; weapons for their own defense

This is why it is that even if there was any reason to believe that the Democrats were sincere in their de-

bills incurred for printing the petitions, calling of ward conventions, postage, and other urgent expenses,

The many other expenses that will be necessary to carry on the work, the printing and distribution of literature, . pamphlets, and other printed matter, cannot be done without money.

SEE THINGS AS THEY ARE.

Glass Workers' Union Adopts a Thoroughly Class-Conscious Declara-tion of Principles.

The following declaration of princiales, adopted by the Amalgamated Glass Workers' International Union of America, in 1990, may be taken as a forecast of the attitude which organized labor will necessarily occupy in the future. It is in many respects the clearest we have yet seen, and its frank and outspoken recognition of the struggle between the classes as the basis for action, is a clear expression of the fact that the rapid development of capitalist production in this cois awakening a corresponding intelligence in the minds of the working. class as to its inevitable tendencies

Society at present is COMPOSED OF CLASSES WHOSE INTERESTS ARE HIGHLY ANTAGONISTIC TO EACH OUTHER. On the one side we have the proprietury class, peasessing emest all the soil, all houses, factories, means of transparation, no object to present the contraction of the contraction transportation, manhanes, raw materia and all necessaries of life. 'In compari-son to the entire people this class rep-

con to the citize people this class rep-besents a small minority.

On the other side we have the work's man, possessing nothing but their in-tellectual and physical power with which to labor, and which they must sell to the possessors of the means of production in order to live. The work-ers represent the millions.

production in order to live. The workers rein sent the millions.

The interest of the possessing class
consists in buying the productive power
of the laborer as cheaply as possible,
in order to produce as much as possible and to amass wealth. The few handred thousant proprietors arrogate to
themselves the larger part of the
vealth produced by the workers.

The haboring millions receive from

as is necessary to live a life of misery
and starvation.

and starvation.

Every improvement in machinery every new discovery of bitherto unknown forces of nature, the proprietary class arrogate to fiself for the exclusive pierose of increasing its possessions. Through this process human habor is more and more displaced by machinery.

chinery.

The workers having become superfluous are compelled to sell their labor at any price in order to save themselves from starvation. The value of labor gradually decreases, the laboring people are being impoverished more and more their consuming power is more and more lessoned, and the consequence is that the commodifies produced remain injoin the market without being bought by anyone. Commercial stagnation sets in, production is decreased, and even partially suspended. The crisis has arrived.

The proprietary class presses into it rvice the POWER OF THE STATE the police, militia and press to project the possessions produced by others, and to declare for the "sacredness" of prop-

while the millions of the working people are left without the means of extense, without rights and unprotected betrayed and sold out to their enemies by the state and by the press, the arms of the police and of the milith are directed against them.

In consideration of these facts we destrict.

i. That the laboring class MUST EMANCIPATE ITSELF from all influ-ences of its enemy, the proprietary class: that it must organize locally. class: that it must organize locally, nationally and internationally for the purpose of seitling the power of the organized masses against the power of capitalism; and that it must see that its interests be represented in the skeps, in the different branches of the local state and national administrations and covernments.

in the different branches of the local state and national administrations and governments.

2. National and international trades unlons are apt to exert a powerful influence upon production prices, the hours of labor, regulation of apprenticeship, and to support their members to all the different phases of life.

3. The combat through which they have naturally to go with the organized power of capitalism leads them to recognize that all trade unlons must form one great, powerful body; the solidarity of the interests of all is proclaimed, the workers mutually assist each other. Soon THE FACT WILL BE RECOGNIZED THAT THE ENTIRE SYSTEM OF PRODUCTION RESTS UPON THE VERY SHOULDERS OF THE WORK-ING CLASS, and that if the workers only display their firm determination and exert their power, a new system based upon justice might easily be introduced. Arrayed against the power of capitalism and its millions stands the power of the laboring masses, self-reliant and conscious that they possess the power with which to overwhelm their antagonists.

4. There is NO POWER ON EARTH

There is NO POWER ON EARTH largeschough to resist the will of such a majority if it be enlightened in regard to its rights, it will accomplish its aims and objects irresistibly. The right of mature is upon its side. THE aims and objects irresistibly. The right of nature is upon its side. THE EARTH, TOGETHER WITH ALL ITS WEALTH, BELONGS TO MANKIND. The results and triumphs of civilization have been achieved through the course of thousands of years and with the assistance of all nations. The organized workers will come to carry out into reality these principles and they will establish a state of affairs under which everyone will enjoy the fruits of his labor.

This declaration from an organized sired. Although the logical conclusion. political action on the part of the workers to wrest the powers of the state from the capitalist classes is not exed plainly in words, it is neverthe as strongly implied in every sentence. The Glass Workers' union is to be congratulated that it has in its ranks mer Sciently intelligent to see the truth. and courageous enough to proclaim it. The position taken can never be suculty assatied, as it is a faltaful re-Hex of the conditions as they exist to day, and only through the frank recogstruggle as given in the opening seacan labor ever hope to achieve the object aimed at in the closing one.

The South Chicago Local of the International Association of Machinists held an open meeting at Union Bank Hall, Friday evening. At the close of the business session visitors were inciable half-hour was enjoyed. The officers for the ensuing term were then installed, after which Comrade John Collins, who had been invited as speaker, Reviewing the great inventions and Wonderful material advancement of the past'century, he showed that what has been gained has been appropriated and by the ruling class, while working class has been reduced to subjection. To change these conditions, to gain for labor the control of the great forces it has created, and for the workis the great cause for which all workingmen should unite.

The speaker showed the fallacy of the oft-repeated assertion that the interests of the workingman are identical with those of the capitalist, and proved that just the opposite is the truth. A number of prominent society women have undertaken to draw over influential royalists to the imperial cause; and the millions necessary to buy up parliament and government officials have been promised by wealthy JEWISH and CHRISTIAN CAPITALISTS alarmed at the rayages of SO-JEWISH and CHRISTIAN CAPITAL ISTS, alarmed at the ravages of SO-CIALISN, without which it seems now impossible to hold the republic together. Both the Bonapartes have announced themselves as opposed to anti-Semit-ism, which is necessary to secure the concourse of the Rothschilds. So this then is the common bond

As to the River Tunnels.

When the tunnels of Chicago are lowered, they should be lowered to being a part of the system for a downtown subway and should not be surrendered to the rallways to enable them to mulct the city a few years hence. The city can afford to lower the tunnels a dozen times over rather than to make them the price or even a part of the price of the betrayal of the people of Chicago, the results of which will be felt for ten or twenty years or even a century to come. The one thing for the people of Chicago to one thing for the people of Chicago to do is to pass upon the franchise question by and of itself upon its own merits, without having it become involved with any other problem or problems whatever. Side/issues of this kind are dragged, in purely for dishonest and fraudulent purposes.

It is not difficult to see that in reality this "public" must take one side or the other in such controversy.

Let us take, for instance, any partic ular group of laborers who have a grievance which the employer refuse: to redress. They go on strike and defy the man who gives them permission to live. They have wives and families who look to them for bread, meat, clothing etc. Is it reasonable to suppose that they will resign themselves to inaction because they are told that there is a "public" who must not be inconvennced, and that they should therefore starve quietly?

This "puble" is in reality a bogie man created by the capitalist press, a mere subterfuge used to excite enthus iasm for any measure which the capi-talist class desire, or to destroy it, as

The striking laborers correctly consider their wants of more importance than the alleged inconvenience which their action is said to impose upon this fictitious public. Their instincts are as true as those of Vanderbilt, who consigned this phantom to damnation when asked to consider its interests.

"THESE BE THY GODS, O ISRAEL."

No opportunity is ever neglected by the capitalist press to inculcate the idea that human progress depends upon the existence of a few individuals who are either, to slightly alter a well-known plerase, "born great, achieved greatness or have had greatness thrust upon and for exactly the same object in each. them." The obituary notices of the aged woman who so long served as a figurehead for the British nation, afford an excellent opportunity for exploiting this characteristic of capitalism to the urmost. And the opportunity is not neglected. Upon every hand we hear Vic toria spoken of as a "ruler" to whom the course to be pursued by between beings. The journalists who pen this stuff ad nauseam, are not so ignorant that underlies all these vapid outpourings, but then business is business and men must live somehow.

With the character of any particular individual the Socialist is not specially concerned. For the aged lady who has just passed away he has-neither praise nor blame. How much more untrue such a statement becomes when applied to a comparatively negative sort of individual we leave to our cenders to judge,

The estensible "ruler" of Britain wa not responsible to any particular extent for either the good or evil which befel the country during her reign. The real ruling class, however, see that their in terests lie in pretending otherwise, and onsequently "agonies of grief" are invented to corroborate the pretence.

The capitalist class understand ther oughly that when society no longer con siders them indispensable, their ful draws to a close. They therefore select of their interests and invest him or her with the shadow of their own powers, at the same time calling attention to the excellencies which it suits them to pretend that it contains. A blind unthinking homage to the individual is inculcated under cover of which the robbery of the working class goes merrily forward. And this delusion is as assiduously fostered in republican vested in "art" by the "six little He America as in monarchical England, brews," and Mrs. Fisk may rest as

THE TWO "DEMOCRACIES."

Not so long ago the henchmen of the capitalist political parties were wont to allude to socialism as a foreign importation which could never take root upon American soil, and as the working class of this country were carefully trained the destinies of the British Empire were to view everything outside of the mainly entrusted; and, who more than boundaries of the United States as disany other person, guided and shaped tinctly inferior, this assertion was found useful in strengthening the barthree and four hundred million huntan ricade of national prejudice behind which the exploitation of the "home market" could be perfected. During as not to understand the complete sham this period the affairs of foreign nations were considered as having little or no bearing upon matters political in this country, and it may perhaps be admitted that this view was on the whole fairly correct.

Another "Trust" Remedy.

It seems that the theatrical trust is till in its preliminary stages and Is erly applied. This is how Mrs. Fisk, prominent actress, deals with the immature monster, when it become troublesome;

Thave sevariably been altent with regard to my MOST ABHORENT PERSONAL EXPERIENCES with the trust and with those New York newspapers which are devoted exclusively to the interest: of the trust. A Blessed Vision.

Record of January 22, and this is what brought them there:

There were two great audiences at the Illimois theatre last night. Society, composing one, gathered to see Sarah Bernhardt at the opening of her two weeks' engagement; those on the side-walk composing the other, gothered to see society and catch the gint of lewels and the flare of time rainment as society trailed from its carriage into the theatre.

Andrew Carnegie is out with anothe of his usual screeds upon the "disgrac of dying rich." Whether Andrew divests himself of his property or not before departing this life, he will al least have the consolation of knowing that his efforts have been fruitful in preventing enany of his competitors from dying "disgraced." As for the workingmen who made his wealth possible, he has apparently no fear that a like fate is in store for them.

We, cannot truthfully say that we ave noticed any perceptible improvement in the lot of the working class since John R. Tanner yielded the gover norship of this state to his success And yet one of the capitalist dailies of this city came out every day for a month with a congratulatory verse drawing attention to the fact that Tar ner's term of office was constantly growing shorter. We did not expect the millenium to arrive when that happy event took place, and cannot therefore confess to any disappointment, but we suspect that hopes had been raised which have not been realized now that Tonner is a back number. Capitalist politics are, however, usually "dead sea fruit" so far as the working class are concerned. The latter have survived sured that she will hear more regularly the "full dinner pail" swindle and will probably butlive this one also,

> A clever cartoon appears in the Tri-bune of the 19th inst, in which the two ex-presidents, Harrison and Cleveland, are represented as weeping copiously over the future outlook for the repubue. Underneath, the following stanza, from Omar Khayyam, appears:

The Moving Finger writes; and, having writ.
Moves on: nor all your Piety nor Wit
Shall lure it back to caneel half a line.
Nor all your Tears wash out a Word

All of which is quite true, but nevertheless the time is rapidly coming when the interests of which the Tribune is an exponent will, figuratively speaking, as impotently as the two reactionaries which they now hold up to ridicule. That "moving finger" is writing socialism on the wall, and the capitalist Belshazzar will soon discover that he has "been weighed in the balance and found wanting."

"Municipal ownership" has been made plain by the mayor of Chicago and the business men. The city water works which, in spite of the corruption connected with its management, has at least been an illustration of how a public utility can be served at cost it is now proposed to bond for \$30,000,000, in order to provide funds for lowering the tunnels and improving the harbor. The waterworks are to be made to yield surplus value which the users of the water will have to pay. The appetite of the capitalist for surplus value is almost as wonderful as the stupidity of the advocates of "public ownership" under capitalist control.

The National Building Trades Counch at its recent convention voted to send a committee to Chicago for the purpose of settling the lockout. The contractors insist that there is nothing to settle; now if the members of the building trades would do themselves justice let them elect John Collins as mayor of Chicago, and see how quickly contractors would reconsider the matter. It would probably dawn upon speedy settlement.

Comrade O'Neal, of Terre Haute, ind., writes: "Enclosed find 50 cents for one year's sub to the Workers' Call for a comrade who, on seeing a copy, was pleased with its style."

Comrade Max Blank, of Salt Lake City, Utah, sends us a club of seven half-yearly and one yearly subscrip-"Four years ago in tions, and adds: Utah we polled 60 votes. Last election we polled 730 votes. ." Comrade Blank is one of the best subscription hustlers in the country. Call again.

The secretary of the Fourth Ward branch, (may his tribe increase), sends us a check for \$5.50 to pay for six yearly and ten half-yearly subscriptions-this the result of only a few hour's hustling. It is to be hoped that other comrades will fallow the example of the secretary of the Fourth Ward branch, and do similar yeoman service for the cause.

Comrade Price of the Thirty-third ward sends us an order for four Call postals.

The circulation editor has his eyes wide open and does not intend to be surprised any more. The mail from Rock Island Tuesday morning brought in a perfect shower of Call postals. Dear Comrade:—As secretary of the West Town convention, held at Aqua Fura hall, 1986 W. Lake street, on Wedners with a warm reception.

The comrades at Muscatine, Ia., are still campaigning. Comrade Charles I., Breckon, late candidate for congress in the second district of Iowa writes:

"The many readers of The Call may be interested in what we are doing in Iowa, and I enclose you two pages of the Journal giving my article and the reply thereto by the proprietor, who seems to have been hit, but cannot succeed in hitting anything back. The cause is moving on. Our candidate for congress in this district (the second), polled nearly 1,000 votes, and the work is going on nicely. The Workers Call is much apprischated here, and we are full of enthusiasm for the cause. We regret that lack of space makes it impossible for us to publish Comrades Breckon's article and the rejoinder.

The contents of this work form the defence of Ferdinand Lasare against a presecution undertaken by the Prussian government, who arrested the famous agitator on the charge of seditiously inciting the unpropertied classes to contempt and hatred of the wealthy The occazion of the offense was an address delivered by Lassalle before a working class audience, the address in question being the well-known "Workingmans' Programme." The trial took place on January 16th, 1863, and the defendant, to the everlasting shame of the Prussian government, was found guilty and sentenced to four months' imprisonment, although Lassalle in his defense literally tore the fabricated indictment to shreds. The wonderful genius of the celebrated agitator is fully brought out in the published account of the speech made by him on this occasion which forms the conjents of this work. A Minnesota Victory.

A timesota victory.

Editor the Workers' Call—
At the focal election held here on January 8th, Warren W. Morse, who was candidate for presidential elector on the S. D. P. ticket from this state, in the late campaign, was nominated for alderman by the Socialists of the Second Ward, and elected by a majority of 21 votes, there being 43 votes cast all told.

Seems that the Socialists

cast all told.

Seems that the Socialists were not all retired from the field of battle at their glorious defeat on the 8th of November last. You can't make a Socialist case up a bit; they are no sooner defeated in one political battle than they open up in another spot ready for action again. Perhaps this is significant of the fact that their number is always increasing for "keeping everlastingly at it brings success."

Let this be an example for other towns. Nominate your men on the Socialist ticket, and elect them if possible and do something for workingmen of your town every time you get a chance. A city board of officers has marly opportunities to help the laboring men in their fight for a sustenance under this capitalistic system, and if those officers are Socialists they will do so, and if not, they will not do so.

In every town legislation is carried on in the interest of the capitalists or property owners at the expense of the proletarian, just the same as in the higher tribunals, such as legislatures, etc.

Workingmen should unite with the Social Democratic party, which is the only party declaring for class legislation in his favor.

Let the good work go on.

Fraternally.

Comrades:—For your information, I inform you that vote blanks on unity proposition have been sent out to all locals of our party, branches affiliated with the N. E. B., sections of the S. L. P., and all neutral organizations of which I had addresses. A copy was also sent to the convention held last, week. In order to get the opinion of all Socialists on this question of union, I request all who have received copies of the above to bring same before the meeting of their respective organizations and lave same acted upon.

Union is the crying necessity of the times, and the many resolutions I have received to that effect from locals all over the country, demonstrate the desire and wish for it.

At this time I take pleasure in acknowledging receipt of all such communications, in the party press, in order to save time, and correspondence.

Wants the Name "Socialist."

Editor Workers' Call:—
Dear Comrade:—The action which the Socialists of Chicago and Okishoma have taken in regard to a party name appears to me to be a very sensible one. Simplicity is a virtue in every avenue of human activity and in no place could it render better results than in the Socialist movement. Furthermore, the word "Democratic" as used among the workers of this country virtually includes the principles and policy of the Democratic party of this country which is as much of an enemy to our cause as the Republican party; and I am sure no Socialist would be willing to adopt the name "Socialist Republican party." I think that he Socialists of Chicago and Okiahoma have set a good example by reducing the name to a minimum, and if followed by other Socialist organizations the result would be more than satisfactory. The word Democratic connected with the Socialist movement chuses more confusion among the illiterate than the ordinary Socialist is awaite of Personally. I am Socialist is awaited. be more than satisfactory. The word Democratic connected with the Socialist movement causes more confusion among the liliterate than the ordinary Socialist is aware of. Personally, I am willing to abide by any name given to the movement, but I do not think that we should cease agitating the subject, until the name 'Socialist party' is adopted by our national organization.

It is not strange then that men sufficiently educated to belong to the ministry are raise objections, which are groundless, against socialism.

And just here we can bring up a phrase from the French which pecultarly fits the Socialist movement, "ce clearing away from the minds of the masses all the accumulated deception of the past and nourishing that yearn ing for truth, which has been prostituted to greed by false teachings, with the teachings of truth. Then ,now, while we are in this first step, is our need for those who are fitted to enlighten the great masses of the ignorant, greater. It will be admitted distrates the fact of the possibility of that these means are now in the hands of an insignificant number of people, and if anyone is so ready to cry out, "slavery," why, now is the time to speak of it, for the property of the countless has been confiscated by the few by the present system, and the countless are slaves! Socialists are for bettering conditions, and the better conditions are, the less of slavery there can be. The present system of slaver began when the machine displaced the artisan. Owning his tools, no man could take his product. But the compe lightenment is taken-advantage of to tition of the machine confiscated his deceive. Thus, while the presence of tools and he became a slave to the owners of the machine, for the conditions under which he was hired were that he give up part of his product as profit for his employer. We do not fear education, knowledge and light. We want all to be able to get it and while a system holds which pre vents the parents from providing it we demand that the state see that is is done. When socialism is here the parents will be enabled to provide the food and clothing, which they now are not, and its provision by the state car be discontinued if thought best.

Thus we see that socialism needs bu to be understood to be accepted by everyone having his own best interests and the interests of humanity for his guide. So far from being slavery, it is freedom that has yet been enjoyed by mankind. The instruments of life needs, and comforts, in the common ownership of the producers, guarantee ing every producer the full product of his labor, will be the first achievement in the march of freedom. Its inauguration will take the lash from the master and the mystic wand from the cusning. Its guarantees from want and excessive toil, will stamp out avaries and greed, and will take away the premium from that laziness which is the goal of those who would by any means get rich in order to be able to afford laziness at the expense of the workers, and will give sufficient time for all to learn the weaknesses, which the long stretches of slavery through which they and their ancestors have passed has fastened upon them, and give incentive to correct them. Its systematization and perfection of the in struments of labor will shorten the hours of labor, and put to the best us for all "the tendency of men to work better for others than for themselves. And, as a leading up to all of these de sired results, is it not better to allvocate the clothing and feeding of the children of the poverty-stricken, so the they may attend school and be infused with an uplifting ideal, rather than to let them settle in their squalor and wretchedness to form in their later years the chaterial against which vic rusades may be directed?

Workingmen, unite; for the owner ship of your product; for the attain ment of your freedom; for the strengt of your manhood and the protection of womanhood and motherhood; for the salvation of childhood! You have noth ing to lose but your wretchedness.

Comrade Robt. Piotter, who has been for some fime actively engaged in getting subscribers for the Workers' Call, has succeeded in drumming up enough Call subscribers in his neighborhood to form a cinb of the Socialist party. A meeting will be held Sunday, January 7 at 3 o'clock, at M. Cittelson's Hall, southwest corner of Washburne avenue and Wood street, one block south of Twelfth street. It is requested that all comrades in the north end of the Tenth ward be present and help make the meeting a success. City Organizer August Klenke will speak.

Sunday afternoon, January 13, a new branch, number five, was formed in the Twenty-seventh ward. About 160 persons gathered at number 2166 N. Whipple street and listened to an eloquent address by Comrade F. H. Hard and City Organizer A. Kienke. After an interesting discussion an organization was formed with a membership of thirteen. Jas. Charbonniau, of 2168 N. Whipple street was elected secretary, and given authority to call a meeting of the branch at his discretion. Meetings will be announced in The Call as soon as a definite program is arranged. Sunday afternoon, January 13, a new

The compades of the Seventh and Eighth wards held a joint meeting last Monday night at Porges' Hall, and completed arrangements whereby joint agitation meetings will be held during the coming campaign. The following officers were elected: B. Schlesinger, recording secretary. A. Sochatoff, francial secretary, B. Sechatoff, freasurer; delegates to General Committee, B. Schlesinger and B. Sochatoff; organizer, S. P. Levenberg of 516 S. Union sirest. It was also deedied to give a concert at Hull House for the benefit of the Workers' Call. England is said to be in the grasp of the brewers' trust, and it is actually axserted that the brewers even polson the people by putting arsenic in the beer, and stranger still "no great smount of public indignation is shown over the The Eighteenth Ward branch at its disclosures." Let us rejoice that we are The Eighteenth Ward branch at its last business meeting decided to take not living in England, but in a free a new supply of 50 Workers Call tostular. It is to be hoped that every branch in the city will see to it that the business or fustling for the Call is not business or fustling for the Call is not business. But how do the brewers manage to escape unpunished, some workingman may ask? The press report tells us how, as follows:

Our drink monopolists have elaborated the deadly system of proprietary drink houses and sustained by the help of unpaid justices of the peace, often members of their own body, and by FILLING PARLIAMENT WIFH THEIR NOMINEES in a manner that sets the reformers at defiance.

That is how the trick is done. They simply "fill Parliament with their nominees," and the rest is easy. Parliament controls the law-making power, and as the interests of the brewer are largely represented there, he can in consequence poison with impunity being in control of law. The workingmen elect The comrades of the Twenty-sixth Ward branch held a very successful and largely attended business meeting at their headquarters, northwest corner of Belmont and Southport avenues, Wednesday night, Jenuary 16. It was decided to take 50 Workers' Call postals and do their turnost to push the circulation of the party organ. Renk and File of Organized Labor Are Not Indebted to the Pres-ent Mayor.

The following appeared in the Tribune of the 14th inst.:

Under instructions from Robert E. Burke to get organized labor in line for Mayor Harrison in connection with the work of the spring campaign, practically all the City Hall employes belonging to labor organizations had quiet meeting on Saturday afternoe at the Democratic county headquarter and organized "The Carter H. Harrison Workingmen's Club." The following officers were elected:

President—James E. Daley.
Secretary—John Mitchel.

Mr. Daley was elected County Commissioner on the Democratic tieket last fall, while Mitchell is one of the plumbing inspectors of the city.

Among those present who assisted in the organization of this "Workinsmon's" club were: P. F. Doyle, chairman of the Board of Examining Trainers' Martin B. Madden, steamfitte who is inspector of vehicles, John F. Kelly, plumber and engineer, member of the Board of Examiner, member of the Board of Examiner, members per per plation, bridge and structura from worker, inspector of fromwork, Frank Kennedy, plumber, Board of Examining Plumbers: John Mangas steamfitter, Inspector of Steamfitting, Patrick Maleney, steamfitter, Board of Examining Engineery, T. J. Elderkin Seamens' unlon, Vessel Inspector.

All these representatives, of labor made speeches in praise of Mayor Harrison's consideration for the laboring on all members of organized Labor to rally to the support of Mayor Harrison, both at the primaries and on election day.

The gratitude displayed by the of-

The gratitude displayed by the office-holders, who owe their places to Carter Harrison, is exceedingly natural. They call attention to the fact that Mr. Harrison has given them good jobs, and they hope, through his re-election. to retain them. Thex are so much easier than the jobs attainable by the rank and file of labor.

But for what are the latter indebted to Harrison? How much has he done for them that they should "get in line" for him in the spring campaign? Is it not through the corrupting influence of the patronage at his disposal that the distrust has been created which wrought havoc in the Building Trades Council? What do the rank and file of the building trades think of the man who has done even more than the contractors, to destroy the shield which they had constructed for their defence? By whose orders were the union men clubbed away from the Adams and Clark street building, owned by Marshal Field-the place where the struggle first openly materialized? Who was it that announced his candidacy, at the banquet given by the Iroquous club. where Edward Mandel sat at the same table, a member of the same firm who are now having their building con-structed by scab labor?

It is well that these deeds should be recalled to the memory of the wood-workers and metalworkers, so that when they go to the polls in April, they will vote for their own interests, as represented by the Socialist party tickheaded by John Collins, a union machinist, a man who is and always has been ready to assist in organizing the working class for the development of class solidarity; a man who will not for a moment claim the votes cast for his name as h's own property, a man who has no need to bribe a few "leaders" to get the rank and file "in line."

The progress of the working class to wards freedom is measured solely by the growth of the Socialist vote. There is no other way. There may be some individuals who will benefit by the they do so at the expense of the working class. The price of their degradation is comprised in the reward which they receive from the enemies of labor for their Judas-like betrayal of their class.

The Chicago Federation of Labor has ecently declared in a series of resolutions, that low wages and want are he causes of vice and degradation, and further, that if oppostunity were offered to these victous ones to gair, a livelihood in a respectable way they would prefer to lead respectable lives.

All of which is certainly true and as certainly superficial. In finding a tion in low wages the Federation might now inquire into the prime cause for low wages. After this constion was properly sifted, the reason why oppor tunity cannot be given to gain a decent livelihood would become apparent at once. The employer is not in business for the purpose of affording this opportunity-that is only incidental to it. He is in business for profits alone, notwithstanding the popular impression, that his chief function is to "give employ-

The New York People on The People's Mr. B. O. Flower, in The Arena:

Deville, in this abridgement and Deville, in this abridgement and popularization of one of the profoundest and one of the most difficult economic works ever undertaken, has succeeded admirably in this respect: That he has held close to the outlines of the original work, has preserved its essentials of form as well as of matter, but has considerably reduced its size, and to givery great extent has simplified it and brought it within the understanding of the ordinary reader: B. O. Florer, in The Arena:
Only patient plodders and scholars, with tastes for economic studies, however, are able to master Mark Capital, and many attempts have been made to furnish the people with a luminous epitome of this great work. . . . Up to the present time no one has so satisfactorily accomplished this work as Gabriel Deville, fir the volume before us. His People's Marx was published in France in 1883, and has now been excellently translated into English by Robert Rives La Monte,

Chicago, Jan. 23.—(Editor of the Tribunds—The undersigned, one of your subscribers, would like to have your solution of a problem as to the efficacy of variculation. A certain corporation of this city employing 300 girls announces that a general vaccination is in order. Well and good. The young judies are ready, but lo, a surprise is in store for them. They are told that they must be vaccinated on the leg to prevent under being incaparitated for work on account of swellen, arms. The same caployes are also given to understand that falling the comply with the above demand will result in their discharge.

Hoping you will favor me with your valued opinion as to whether it is best to be vaccinated on the leg or the arm, I remain, yours respectfully.

To explain somewhat further. They have bought the labor-power of the three hundred for a certain number of and were probably delighted to get the bodily members, head en that those who sell their laborchaser, of course, can do as he pleases with what he has bought. The use of those arms, heads, legs, etc., belongs to him. He must see that they are not more than swollen legs, the latter mem bers are selected for the operation.

Let us suppose, on the other hand, that the corporation were employing the three hundred in an industry where the legs were of more "business" imstance that the three hundred were oc cupied in driving sewing machines with their feet. Miss 'Hello" will at once see that in this case the corporation would most probaly issue a command that upon no account should the leg be though of as a proper site for inoculation. Great Premium Offer

It is with pleasure that the Workers' Call announces to its friends and patons that it has completed arrangements with one of the largest Socialist pub lishing houses in the country, whereby it has obtained a quantity of the best Socialist books published in the English language to be given as premiums cription hustlers. The terms upon which these bo tained make it possible for us to extend to active workers the best premium offer that has ever been made by a Socialist publication. The books which we offer are the very cream of Socialist literature, and should be in the home of every active comrade. With a little hustling-in a good cause-it is possipromised in the way of prosperity to ble for every comrade to obtain them free of cost. This remarkable offer is as

With every two dollars' worth of subscriptions or Workers' Call postals, paid for at the rate of 50 cents for yearlies and 25 cents for half-yearlies, we will give a copy of "The Peoples' Marx," an excellent epitome of Karl Marx "Capital," translated from the French of Gabriel Deville. Retail price, 75 cents. Or "A History of the Commune of 1871," by Lissagary; price, \$1.00.

With every one dollar and fifty cents worth of subscriptions or Workers' Call postals, we will give one copy of Eugene Sue's "Silver Cross, or the Carpenter of Nazareth," cloth bound, price 50 cents.

With every one dollars' worth of subscriptions or Workers' Call postals, paid for at the same rate, we will give any two of the following classics of Socialist literature: "Socialism from Utopia to Science," by Frederick Engels, "The Workingman's Program," by Ferdinand Lassalle, "The Right to Be Lazy," by Paul Lafargue; "The State and Socialism," by Gabriel Deville; "Socialism, Revolution and Internationalism," by Gabriel Deville. Retail price of each of the above books, 10 cents.

Also with one dollar's worth of subscriptions we will give any one of the following 25 cent books: "The Civil War in France." by Karl Marx; "Science and the Workingmen," by Ferdinand La Salle; "The Socialist Campaign Book for 1900."

It is unnecessary for us to dilate to any extent upon the merits of the ooks which we thus place within the easy reach of every comrade in the coun-

"The Peoples' Marx" has been introduced to our readers in previous numbers. It contains all the salient points of the parent book, "Kapital," and presents them in a form more readily understood by the average mind, "Kapital," in its original form is a book for the student. "The Peoples' Marx" is a book for everybody. The other books which we offer are familiar to all Socialists.

A Recommendation.

To the Socialists of Illinois.
Greeting:—From our meeting of December 23rd, 1960, we issued a call for a state convention of the Socialist forces of Illinois. Since that time a national convention of the S. D. P., with head-quarters at 126 Washington street, has been held, and a call for a unity national convention issued therefrom.

Viewing this fact, and since, also, the

tional convention issued therefrom. Viewing this fact, and since, also, the S. D. P., with headquarters at Springfield Mass, is now taking a referendum on the same proposition, it appears that the Socialists of the United States will soon have complete national unity. This

As the printed report of the convention is not at hand, I am unable to send you a copy-as yet.

We of Oklahoma send greetings to all Chicago comrades and hope the day is near when every American Socialist will be found working in harmony with every other Socialist against the common enemy of the race—organized capitalism. Meanwhile we are doing all in our power to promote the movement here at home.

You nasty wretch!"

"I am thinking, not of you, my dainty one, but of the unfortunate peowho slave that we may live idly. Let me explain to you why we are so rich. My father was a shrewd, energetic, and ambitious Manchester man, who understood an exchange of any sort as a transaction by which one man should lose and the other gain. He made it his object to make as many exchanges as possible, and to be always the gaining party in them. I do not know exactly what he was, for he was ashamed both of his antecedents and of his relatives, from which I can only infer that they were honest, and, therefore, unsuccessful people. However, he acquired some knowledge of the cotton trade, saved some money, borrowed me more on the security of his reputation for getting the better of other, people in business, and, as he accurately told me afterwards, started FOR HIMSELF. He bought a factory and some raw cotton. New you must know that a man, by laboring some time on a piece of raw cotton, can turn it into a piece of manufactured cotton fit for making into sheets and shifts and the Bke. The manufactured cotton is more valuable than the raw cotton, because the manufacture costs wear and tear of machinery, wear and tear of the factory, rent of the ground upon which the factory is built, 'and human labor or wear and tear of live men, which has to be made good by food, shelter, and rest. Do you understand that?"

"We used to learn all about it at college. I don't see what it has to do with us, since you are not in the cotton

"You learned as much as it was thought safe to teach you, no doubt, but not quite all, I should think. When my father started for himself, there were many men in Manchester who were willing to labor In this way, but they had no factory to work in, no maton to work on, simply because all this indispensable plant, and the materials for producing a fresh supply of it, had been appropriated by earlier commers. So they found themselves with gap stomachs, shivering limbs, and hungry wives and children, in a place called their own country, in which, nevertheless, every scrap of ground and tightly locked up in the hands of others and guarded by armed soldiers and popoor devils were ready to beg for access father offered them the use of his factory, his machines, and his raw cotton on the following conditions. They were to work long and hard, early and late, to add fresh value to his raw cotton by manufacturing it. Out of the value thus created by them, they were to re coup him for what he supplied them with: rent, shelter, gas, water, machinery, raw cotton-everything, and to pay for his own services as superintendent, manager, and salesman. Se far he asked nothing but just remuneration. But after this had been paid, a balance due solely to their own labor remained. 'Out of this,' said my father. you shall keep just enough to save you from starving, and of the rest you-shall make me a present to reward me for my virtue in saving money. Such is bargain I propose, It is, in my opinion, fair and calculated to encourage thrifty habits. If it does not strike ou in that light, you can get a factory and raw cotton for yourselves you shall not use mine " In other words, they might go to the devil and starve -Hebson's choicel-for all the other factories were owned by men who offered no better terms. The Manchescriane could not bear to starve or to their children starve, and so they pited his terms and went into the of their beginning to save for crafed great wealth by their labor.

During the war-time a big subscription was got up for these poor wretches, and my father subscribed one hundred pounds, in spite, scribed one hundred pounds, in spite, scribed one hundred pounds, in spite, she as all, of his own great losses. What are you going to do about it? How shall your boy get an opportunity?

And that little daughter of yours; where will she end? Will she some day be a happy wife and mother, or a woman of the street, or a dull slave in some dreary factory? To whom shall you turn for relief and help? Will the Republican party, with Hanha at its head, change these conditions so that you and your children may have even a reasonable certainty of a livelihood, free from the lower depths of poverty and its results—vice and crime? Will the Democratic party do it? Are they not both representing the interests of those who use you and yours as material which yields profit? From them you can expect nothing—they stand solidly for the capitalism that degrades and pauperizes your class.

You must look to your own class alone. There is no help elsewhere. They suffer as you do, and you have a common interest with them. MAX S. HAYES, equally well-known as a writer and speaker in both the Socialist and trade union movement, edits a department on THE LA-BOR WORLD. This censists of a thorough summary of the happenings in the field of organized labor, with descriptions of the more important mechanical and industrial changes of each month.

The department on SOCIALISM ABROAD is infinitely superior to anything of the kind ever attempted in the English language. In addition to a full and able corps of foreign correspondents, several Socialist dailies of Europe are subscribed for and nearly all the important weeklies and monthlies are received on exchange and made use of in its preparation.

The department of BOOK REVIEWS is edited with the special aim of making it a continuous and complete compendium of the wealth of material in current literature that is of interest to Socialists. The regular EDI-TORIAL DEPARTMENT is conducted by the general editor, A. M. SI-MONS, who discusses topics of current interest in the light of the Socialist philosophy. An interesting phase is a financial summary of the month, giving the facts as to prices, wages, bankruptcies, financial consolidations and general trade movements that are of interest to Socialists, but which have hitherto been buried in trade and Snancial journals and inaccessible to the average reader.

With the issue for March, 1901, the SIZE WILL BE INCREASED from sixty-four to EIGHTY pages and an INTENSELV INTERESTING story will be begun to run through several numbers. This story will be of a literary value to accord with the high standard maintained by the remainder of the publication. What is the meaning of this? Why does this factory owner expect "good" to result to his employes from listening to the preacher, when he is indifferent about the matter as it concerns himself personally? Does "good" mean the same thing to laborer and capitalist? He would probably answer that it does, and would strengthen his assertion by repeating the old saying that the intercal. IN TRAINING.

One year has clapsed since the Building Trades Council and the Contractors' Association commenced the struggle which is still being carried on, and the anniversary has not passed unnoticed in the capitalist press, which recounts oncealed satisfaction the gradual weakening of the laborers' organi-The desertion of different trades once affiliated therewith are again enumerated, and the occasion is used to the utmost to impress upon these who still struggle, the hopelessness of their position.

while Socialists have always maintained that the laborers fighting in the comic field alone, were so heavily handicapped that ultimate success was impossible, they none the less believe that these struggles play not only an important but an absolutely necessary part in the progress of the working class towards economic freedom, Although doomed to defeat from the disadvantageous nature of the position occupied, their-real importance to the laborers lies in the fact that every recurring defeat must altimately demonstrate the necessity of shifting the fighting ground. The only possible movein this direction is the transfer of the forces of labor to the political battle-There is no other alternative.

For the modern working class is not a dving but a growing class. It has not yet played its full part in the economic drama. Created by the exigoncles of capitalist society, called into existence by the tremendous modern factors of production, no reverses it may suffer in the preliminary struggle can be permanent, unless mankind retraces its steps, and abandons the improved machine for the antiquated implements of hand labor-an action which is, in the nature of things, utterly impossible. The triumph of the working class is in line with the progress of human society.

The apparent victory of the working class in this twelve months' struggle is analogous to that of a trainer, who In preparing a young, and growing party of Chicago was held last Saturathlete for future conquest, punishes his pupil in a trial bout. The working class through these defeats must, will, and even now are learning how victory can be

Capitalism in its own defence must exhibit to its opponents the methods by which it is enabled to conquer, and the latter will ultimately change their tactics so that the struggle will take the form of a contest for the possession of the public powers, between the two elasses. When the laborers realize that they themselves have been arming the enemy with only effective weapons he ean use against them, the end of the

The twelve months' struggle has not been fruitless, from the side of the laborers. They have not been defeated-The conflict does not end with the dis appearance of the Building Trades Council-supposing that such is the immediate outcome. It will re-open again and yet again, and each successive struggle will find the workers stronger than before, as an increasing number of their ranks begin to comprehend the unavoidable necessity of political action on the part of their class.

SOCIALISM AND "CIVILIZATION."

To most men the term "civilization" te syponomous with material progress and generally speaking those nations in which wealth has been accumulated to the greatest degree are considered the most highly civilized. Now for the acdation of great wealth the posession and operation of the most perfect ols and machinery of production is

With this definition of civilization the Socialist has little quarrel. It is undoubtedly the highest that has yet been reached, and is as certainly the basis from which a still higher form of civilization must spring. If the objector were asked if he really believed that the present civilization was thus manufactured he would unsupposing of course that his intelligence was about the average. But he sees no inconsistency in charging the Socialist with wishing to attempt this impossible feat.

The idea of evolution may be now said to be universally accepted as a reneralization at least. Different manterpretations upon it. So true is this that capitalist writers dealing with and fully admitting the evolution of society find the greatest difficulty in even imagining a civilization based upon any other system than that of the present, The individual ownership of the means of production seems to them inheren bly conceive. And yet the present form of civilization is in its own evolution. making this very individual ownership impossible. Its progress consists in undermining its own foundations;

When the Socialist points this out and upports the assertion with undeniable facts, his opponents in attempting to charge him' with responsibility in the matter, merely expose another phase of the contradictory nature of the thing they wish to defend.

Not long ago, at the histance of a few Catholic and self-styled Socialist deputies, a law was passed regulating sirkes in Geneva. At the tire 3.500 workmen protested against the measure. Now, as seen in the present blackguiths' strike, both masters and workmen refuse to obey the law, and every attempt to enforce it fails. Had there been no law compelling arbitration the strike would have been settled long ago by the usual compromise.

Unless something is dong mimediately by the party at large semething bad is liable to happen, While we do not wish to make any

invidious distinctions regarding the en ergy and activity displayed by different ward branches of the Socialist party in this city, in pushing Socialist propaganda, it is nevertheless impossi ble to ignore the fact that some bra es in the party stand head and shoulders over all others in this matter, Upor looking over our records of the past six months, not for purposes of comparison so much as to obtain a definite knowledge of our relationship with the different branches, we find that thi disparity in the local activity is even greater than we had at first supposed In short, we found that one branch in particular has shown such a remarkable activity in propaganda work that an attempted comparison becomes at once a contrast. This branch, the Twenty-fifth 'Ward, has outdistanced its nearest competitor in activity by fully 200 per cent, and it may be marked that the Twenty-fifth Ward branch has by no means the largest membership. Of course we base our estimate of activity entirely upon the efforts made to circulate the Workers Call, using the postal subscription cards sent in as data: And better than all this activity shows no sign of diminution, but on the contrary, is decidedly increasing. No less than 90 subscriptions were added to the list of the Workers' Call last week by this branch, a record which is by all olds the most remarkable we have known in the his-tory of the paper. The Twenty-fifth branch thoroughly appreciates, the fact that securing readers for the party paper is by far the most importork that a Socialist organization can do. The example of this branch, if generally followed by the remaining thirty-eight local organizations would certainly make the establishment of a daily Socialist paper in this city a matter for immediate consideration.

Great Premium Offer

It is with pleasure that the Workers' Call announces to its friends and patrops that it has completed arrangements with one of the largest Socialist pub-lishing houses in the country, whereby it has obtained a quantity of the best books published in the English language to be given as premiums to its subscription hustlers. The terms upon which these books have been obtained make it possible for us to extend to active workers the best premium offer that has ever been made by a Socialist publication: The books which we offer are the very cream of Socialist literature, and should be in the home, of every active comrade. With a little hustling—in a good cause—it is possible for every comrade to obtain them free of cost. This remarkable offer is as

BOOK REVIEWS.

WHAT THE SOCIALISTS WOULD DO IF THEY WON IN THIS CITY, by A. M. Simons. Price, 5 cents; Chas H. Kerr & Co., 56 Fifth Aye., Chi-

cago, Ill. The latest issue of the well-known "Pocket Library of Socialism" deals with the subject whose title is given above. It will be found exceedingly useful by Socialists who are frequently onfronted with this very natural inquiry, and its contents are based mainly upon the municipal program adopted at the recent convention by the Socialist party in this city. The author in a short preface, warns his readers against dealing with any one part of the subject, as false impressions are lifely to be formed if the whole work is not taken into consideration. Improvements in educational facilities and methods, sanitary measures regarding the health of the laboring classes, and the attitude of the city authorities to-wards the workers are given special prominence, and cannot fail to impress the reader with the sense of the mightly contrast between what exists now and what is possible when the working classes determine to assume the public powers and use them in their own interests. This work should be given as at the recent convention by the Socialpowers and use them in their own interests. THE PEOPLE'S MARX

THE PEOPLE'S MARX from the pen of Gabriel Deville and in the translation of Robert Rives La Monte, presents to the English-speaking Socialists the most excellent and successful epitome of Karl Marx' "Capital.". This luminous epitome, from the last and seventeenth French edition, is issued in the style in every way characteristic of the publications of the INTERNATIONAL LIBRARY.

The Haverhill Social Democrat, remarks on The Peoples's Marx as The Bible of the working class, a bible whose study is as beneficial to the workingman as is the orthodox Bible to the average Christian.

OTHER OPINIONS OF THE PRESS

The New York People on The People's Mr. B. O. Plaicer, in The Arena:

Deville, in this abridgement and popularization of one of the pro-foundest and one of the most difficuit economic works ever un difficut economic works ever undertaken, has succeeded admiractly in this respect: That he has held close to the outlines of the original work, has preserved its essentials of form as well as of matter, but has considerably reduced its size, and to a very great extent has simplified it and brought it within the understanding of the ordinary reader.

Only patient plodders and scholars, with tastes for economic studies, however, are able to master Marx' Capital, and many attempts have been made to furnish the people with a luminous epitoms of this great work. Up to the present time no one has so satisfactorily accomplished this work as Gabriel Deville. In the volume before us. His People's Marx was published in France in 1883, and has now been excellently translated into English by Robert Rives La Monte.

A MODERN "IRONCLAD."

How the Stockyards Wage Slaves Are Rendered Powerless for Mutual Defence. The cold weather of last week tended

to emphasize the discontent of many of the workingmen at the stock yards with a condition imposed upon them before they are accepted in the slavery of the big packers. Little enough at any time are the wages they receive but in the cold of the winter their scantiness makes a smaller showing than ever against the wants which cold weather increases. Therefore it is that the holding back from each man of fifteen dollars in accordance with the provisions of the "iron-clad" as it is manner, viz.: In any week in which the laborer works four consecutive days or more, one dollar and fifty cents if it were); this process is followed un-til the company has fifteen dollars (\$15.00) of the worker's money held out against him. Now, if he quits the eta ploy of the company without giving ten days' notice, he forfeits the fifteen dollars, but the company may fire him without a moment's warning by paying him his wages and the amount held in the iron-clad. 'Death cometh like a thief in the night." It is at once seen that this deposit of fifteen dollars is practically useless to the worker. he gets it at all it is accompanied with a notice that his means of life have been severed until he can find service in the slavery of a new master, or-if he finds a new master who will impose less galling yoke and before going to him gives ten days' due notice so that his place may be filled with a properly picked slave. Of course if a man is driven by sickness or distress in his family to supplicate his master for the deposit he may turn the stony heart to yield the favor, but the "iron-olad" must be put into operation at a future time again, to protect the master.

whole arrangement was put into operation to keep the men from forming unions and striking. The men are ow grumbling about it but they can do nothing. No industrial organisation, no political sense, and the laboring-man's friend, the Chicago American, has not even taken up the case. Therefore the only thing left for them to do is to form an "iron-clad" of their own by uniting politically and at the ballot box showing their power. If such action had no other result, they may be sure it would knock on the head any such tyranny as the "iron-clad" in the quickest possible manner.

DEATH THROES OF COMPETITION.

Because the rabber trust and the independent rubber manufacturers are to engage in a competitive war, the editor of the Times-Herald vents his satisfaction and points out that competition is not stilled by trusts. Even these enster industries will have competitors if better machinery and methods are secured and taken up by enterprising business men, and in the cutting of prices that follows, who benefits? Certinly not the manufacturers; for they often sell at a loss, and although we ow it is not done from philanthropic It. Thus discoures the learned editor, But who are the consumers? Why the producers of course form the largest as the workmens' portion, and this will mber of consumers. Then the producer, when he turns consumer, in buying something in the rubber line while this price war is in progress, will get the full product of his labor as far as COMPLETELY SUCCESSFUL. his purchase of such goods is concerned. This action is not philanthro ny though, this allowing the producer such a great boon as to get his rubbers at cost: no, this is done to keep the r fellow from getting profits, and as long as he can't get profits he will stronger competitor, who will then begin to add a per cent of profit to his g prices and make the consumer dig up for the past benefits. Great Premium Offer

It is with pleasure that the Workers' Call announces to its friends and patrons that it has completed arrangements with one of the largest Socialist publishing houses in the country, whereby it has obtained a quantity of the best Socialist books published in the English language to be given as premiums to its subscription hustlers. The terms upon which these books have been obtained make it possible for us to extend to active workers the best premium offer that has ever been made by a Socialist publication. we offer are the very cream of Socialist literature, and should be in the home of every active comrade. With a little hustling—in a good cause—it is possihie for every comrade to obtain them free of cost. This remarkable offer is as follows

With every two dollars' worth of subscriptions or Workers. Call postals, paid for at the rate of 50 cents for yearlies and 25 cents for half-yearlies, we will give a copy of "The Peoples" Marx," an excellent epitome of Karl Marx." Capital," translated from the French of Gabriel Deville. Retail price, 75 cents. Or "A History of the Commune of 1871," by Lissugary; price, \$1.00.

With every one dollar and fifty cents worth of subscriptions or Workers' Call postals, we will give one copy of Eugene Sue's "Silver Cross, or the Carpenter of Nazareth," cloth bound, price 60 cents.

With every one dollars' worth of subscriptions or Workers' Call postals, paid for at the same rate, we will give any two of the following classics of Socialist literature: "Socialism from Utopia to Science," by Frederick Engels: "The Workingman's Program," by Ferdinand Lassalle, "The Right to Be Lazy," by Paul Lafargue; "The State and Socialism," by Gabriel Deville: "Socialism, Revolution and Internationalism," by Gabriel Deville. Retail price of each of the above books, 10 cents.

Also with one dollar's worth of subscriptions we will give any one of the following 25 cent books: "The Civil War in France," by Karl Marx; "Science and the Workingmen," by Ferdinand La Salle; "The Socialist Campaign Book for 1900."

It is unnecessary for us to dilate to any extent upon the merits of the books which we thus place within the easy reach of every comrade in the country.

"The Peoples' Marx" has been introduced to our readers in previous numbers. It contains all the salient points of the parent book, "Kapital," and presents them in a form more readily understood by the average mind 'Kapital," in its original form is a book for the student. "The Peoples Marx" is a book for everybody. The other books which we offer are familiar to all Socialists.

'In taking advantage of the above offer comrades are requested to make ise of the following blank application. Fill it out and send it with your letter:

An Urgent Appeal.

Editor Workers' Call.
The use of the label of the United Brewery Workers' National union, is only granted to such firms, where all employes are organized, and child labor is abolished. The Cincinnati breweries are not entitled to the use of the union label, and it is a fact that the Moerlein Brewing company, Cincinnati, O., and the Wiedemann Brewing company, Rewport, Ky, employ almost expany, Newport, Ky, employ almost ex-O., and the Wiedemann Brewing company, Newport, Ky., employ almost exclusively children in their beer bottling establishments with \$1.00 and \$4.00 weekly wages. Nor will these brewettes receive the label until peace is receivablished with the National Union of United Brewery Workmen, and the disgraceful child labor abolished. Friends, comrades, and brothers, do your duty, and take once more into consideration that the Cincinnati breweries have no right to get a label, but with your aid, your assistance, and label propaganda, the Moerlein Brewing company. Cincinnati, O., and the Wiedemann Brewing company, Newport, Ky.; may soon be compelled to secure the right to use the union label. Down with child labor,

A CAPITALIST PEACEMAKER.

Influential Burgher Defines the Position of the "Working Clase" in Moders Society.

Many of the events which have recently occurred in connection with the progress of the struggle in South Africa are well worthy of the attention of the working class in other lands. It not infrequently happens that some representative of the propertied classes unconsciously shows either by pen or tongue his recognition of what part of the population of a country constitutes In its program I notice that it will "the nation." For the last two or three months the "influential burgher" has been prominent in urging the advisability of submission to British rule upon those of his countrymen who still kept up the conflict. These efforts were, of course, duly recorded in the British press as showing that the "best" element in the two republics, were in favor of a cessation of hostilities even with the extinction of separate rational Independence, just as, the capitalist press of this country invariably represents the influential and wealthy Cubans and Filipines as being in favor of annexation of the islands to the United

. And now the brother of the Boer General DeWet, appears in the role of peacemaker, and has addressed a long letter to the latter urging him to abandon the conflict. The text of this letter in many places gives striking evidence of the krowledge possessed by the average capitalist property owner, as to the nature of economic class distinctions and the amount of power wielded by each. After pointing out the terrible destruction of property involved in the continuance of the war, Piet DeWet addresses his fighting brother as fol-

Here in the United States we have a ory that the working class-is by far the most important factor in our national existence, a theory which is exploited to the utmost when an election is to be held and the votes of the working class are depended upon to place this or that party in power. As the text of Piet DeWet's letter appeared in every capitalist journal in this city, and has been commented upon by most it might be reasonably expected that this passage would evoke general condem-nation, but the reader will search in vain for one word of opposition. On the contrary the comments declare the letter-to be an expression of sound mmon sense, and one of them actually reproduces the passage and endorses We quote from The Tribune:

As Piet DeWel tells his brother, the best thing for the Boers- to do now is to accept the inevitable without further waste of life and property, be loyal to the new government, educate their children, and ultimately rule the country by having the majority of the intelligent citizens in it. By this means they will be able to preserve their INthey will be able to preserve their IN-DIVIDUALITY, while it they utterly innoverish themselves by &ceping up-the war they "will become a working class and disappear as a nation." The Boers themselves can see the wisdom of this advice wherever they have been able to "put passionate feeling aside and use common sense."

This opinion admits that the workclass cannot rule in any country. that the wage laborer has no individuality, and that his class is in no sense the nation, and in truth it exactly describes the position of the wage earning class under conditions as they exist today. In the disappearance of the economic ruling class the capitalist sees. only the disappearance of the nation, which, in other words, means that he considers his class the nation, and the wage earners mere appendages to na-stional existence. And this opinion is held by all capitalists irrespective of nationality. Even Plet DeWet, who probably never devoted any time whatever to economic subjects, instinctively entertains it, and the capitalist press of the United States kastened to place on

OTHER OPINIONS OF THE PRESS

The New York People on The People's Mr. B. O. Flower, in The Arena:

Devilie, in this abridgement and popularization of one of the profoundest and one of the most difficult economic works ever undertaken, has succeeded admirably is this respect: That he has held close to the outlines of the original work, has preserved its essentials of form as well as of matter, but has considerably reduced its size, and to a very great extent has simplified it and brought it within the understanding of the ordinary reader.

B. O. Flower, in The Arena:

Only patient plodders and scholars, with tastes for economic studies, however, are able to master Marx' Capital, and many attempts have been made to furnish the people with a luminous epitome of this great work.

Up to the present time no one has so satisfactorily accomplished this work as Gabriel Deville, in the volume before us. His People's Marx was published in France in 1883, and has now been excellently translated into English by Robert Rives La Monte.

The price of The People's Marx is: one dollar and a half in cloth; seventy five cents in paper. With orders sent in before the 1st of March we will give as premium a cloth copy of the Silver Cross, (price 50c.), with \$1.50 edition; or, a copy of the Civil War in France, (price 25c.), with the paper edition.

"This course will greatly help anyone who wants to do effective work socialism." . John Peterson.

"These lessons are not only interesting and instructive, but they unfold to us our own life's meaning in this study of socialism. The whole world is made so beautiful and our own relations to it so direct and simple that we cannot help but understand; and it is so presented that we FFEL the truth as surely as we understand it, and so it cannot be forgotten."

"Anyone of average intelligence can take these lessons, as nothing could be more simple or more lucid than are his explanations." Geo. R. Rosenberg.

"These lessons are dealing with topics which I have studied before, but some way the whole world is being transformed before my eyes. Things which were familiar to me are put into such new and unexpected relations as to produce results of which I have never even dreamed before. I am only half way through the course, but life must always mean to me more than it has meant before, and socialism's simply the means by which real life is revealed and made possible for all."

Dr. Herbert E. Phillips.

"These lessons are showing to me how each stage of human progress grows of necessity out of the previous ones. They make one want to find out to what the world is growing now, and then try to help it along."

G. Andersen.

"The logical reasoning of these lessons is so clear and so connected that the points cannot be missed or misunderstood, and the lessons derived from them will be of lasting benefit to those who wish to work for so-claims."

James Hunt.

"Every workingman who wants to find the way out can find it here."
Peter Horsley.

SOCIALIST REVIEW

This is the only periodical in the Effelish language reckoning among its contributors all the great Socialist writers of the world. Among those whose writings have appeared in its columns in the last seven monthes are Charles H. Vall, Leonard D. Abbott, W. T. Brown, H. M. Hyndman, Paul Lafargue, E. V. Debs, Job Harriman, Ernest Crosby and Emile Vander-velde, while Edwin Markham, Kier Hardie, Rev. T. McGrady and Jane Adams have promised articles.

PROF, GEORGE D. HERRON conducts a department each month on SOCIALISM AND RELIGION, containing matter of great interest and value to all students of social questions. It is the only instance in the history of Socialist literature where a regular department was conducted upon this subject by a man who combines such rare natural talents with a thorough knowledge of the literature and doctrines of both Religion and fit

MAX S. HAYES, equally well-known as a writer and speaker in both the Socialist and trade union movement, edits a department on THE LA-HOR WORLD. This consists of a thorough summary of the happenings in the field of organized labor, with descriptions of the more important mechanical and industrial changes of each month.

The department on SOCIALISM ABROAD is infinitely superior to anything of the kind ever attempted in the English language. In addition to a full and able corps of foreign correspondents, several Socialist dailies of Europe are subscribed for and nearly all th monthlies are received on exchange and made use of in its preparation, With the mass of interesting things that foreign Socialists are now doing, no one who is at all interested in socialism can afford not to read this de-

The department of BOOK REVIEWS is edited with the special aim-of making it a continuous and complete compendium of the wealth of material in current literature that is of interest to Socialists. The regular EDI-TORIAL DEPARTMENT is conducted by the general editor, A. M. SI-MONS, who discusses topics of current interest in the light of the Socialist philosophy. An interesting phase is a financial summary of the month, giving the facts as to prices, wages, bankruptcies, financial consolidations and general trade movements that are of interest to Socialists, but which have hitherto been buried in trade and financial journals and inaccessible to the average reader.

With the issue for March, 1901, the SIZE WILL BE INCREASED from sixty-four to EIGHTY pages and an INTENSELY INTERESTING story will be begun to run through several numbers. This story will be of a literary value to accord with the high standard maintained by the remainder of the publication. Plenty, Not Poverty, the Cause of All Our Sufferings.

"EVERYBODY" AND "NOBODY"

me Contradictions Which Can Only Ba Solved Through a Knowledge

of Socialism.

It is all a mistake. Let the charity who devote their lives to "elevating the poor," suspend operations immediately; there is no poor to elevate, no poverty, no lack of good things. The trouble lies exactly the other day. WE have too much. OUR superfluous commodities are smothering us. EVERYBODY is so loaded down with extra wealth that life is becoming a burden solely on account of our possessions. WE have too much furniture, too much clothing, too much food, and don't know how to get rid of it. Plenty, not poverty, is making the earth weari-

It was there in black and white, and moreover the wspsper in which it appeared is a special friend of the working people, nist relies for its circulation mostly upon them. As a further proof of what we say it may be mentioned that the writer was a woman, a "elever" woman, and that it appeared on the editorial page of the paper in question—Hearst's Chicago Amerof February 13th. Perhaps it would be as well to reprint the stuy and then you will be able to see that we have exaggerated nothing. Here it

What then? Can it be possible that that "everybody" is thus overloaded? No, she is quite correct. She is using re than they can use are generally.

DELUGE OF WEALTH nothing whatever. In this well ordered capitalist world the "everybodies" pro-duce nothing and the "nobodies" produce everything, and it is this matter of production alone that determines upon which side any particular indi-

vidual belongs. The "nobodies" then have produced an abundance of things and given them to the "everybodies" in such quantities that the latter now complain of having so much that it becomes a nulsane and hindrance. The "nobodies" have built the houses, overloaded them with furniture, pictures, rugs, silver, "knives, forks, spoons and little spears and harpoons and scoops" until "everybody" is 'bewildered," as the clever writer states.

The "nobodies" have also produced the feathers, the gold embroidery, the sumptuous clothing and the jewels with which "eyerybody" is overburdened. They are equally responsible for the bills of fare and varieties of food which renders the latter "torpid, satiated and unfit for conversation." They build the theatres, concert halls, and lecture rooms, which the others find "wearisome," and their labor provides the musical instruments, costumes and all other appendages used in

EVERY woman is covered with feathers, fiounces, braidings, embroideries, gold lace, stirched bands of velvet or something—her clothes encursted with mock jewels and gold and silver. This overluxuriance shows EVERY-WHERE. OUR bills of fare are tiresome by reason by long drawn out variety in food and its manner of preparation. One rises from a modern dinner a torpid, satiated being, unfit for conversation, for reading, for music, for any form of social amusement.

Even the concerts and the plays, the lectures and musicales, are wearisome in length. EVERYBODY seems to be striving to see how much in the way of amusement or instruction can be crammed into an hour, And the result is that EVERYBODY gets tired before half of the programme is over.

For society is approaching the LAST of a series of class struggles instead of preparing conditions for future ones We are closing an era which began, as Marx says, with the "dissolution of primitive tribal society," and continued through the stages of cannibalism, slavery, fewdalism, and capitalism, in all of which exploitation of man by his fellow was the common basis. It is extremely improbable, nay almost impossible that the change which is destined to close and complete one cycl of buman progress must slavishly follow in detail the methods of previous stages, which were but parts of the

Economically we are weak-our very name of proletariat signifies economic weakness. Politically we possess the same potency which our numbers give us—but this is conditioned upon our intelligence. The economic weapon has been tried, is even now being tried, and that we are finding it insufficient is proof that our intelligence grows. that growing intelligence invariably points to the ballot as a weapon all powerful and allsufficient for our emancipation. And in advocating the use of the ballot to decide the last great omio class struggle we make stil another departure from the methods followed by the ruling classes which have successively dominated society. The ballot then is our principal wes pon; though only through repeated economic struggles on the part of our class can a realization of its efficacy be gained. And when victory crowns our efforts at the polls, those who attempt to obstruct or deny the will of the majority will merely furnish by their opposition, the last proof wquiged to demonstrate the truth, that in the coming social revolution power is a consequence of political su premacy.

The Campaign Fund. Comrades:-

Again we must call your attention to the necessity of a campaign fund. It must be forthcoming if we are to have a campaign at all, and you must ply it. Mr. Kenna can give a ball-to get a campaign fund; Mr. Harrison can mulet the city employes for the same purpose. The "good government" crowd, the "business administration" crowd can tap the coffers of the exploiting class for the wherewithal to keep you enslaved.

But how is the Socialist party to abtain a campaign fund unless you fur-

nish it? You cannot expect Mr. Kenna, Mr. ward, and look after your class interests. They are too busy attending to their own.

Certainly not. It is not their busito it. Now bustle up and let us see what you are willing to do in behalf of yourselves. The sums already on hand are totally inadequate for the work before you. Your masters use the wealth extracted from you by fraud to keep you enslaved. You must voluntarily supply what you can to free yourselves. Send it in, Don't delay. Fraternally.

We notice with satisfaction that the official journal of the Brotherhood of Painters and Paperhangers of America contains an excellent article by August Olson of L. U. No. 194 of this city. The writer points out clearly and forcefully the transformation of competitive into co-operative industry and the necessity which is imposed upon organized labor in consequence of this change. The fuwho never intend to enforce them, the hopeless attempt to raise wages and shorten hours of labor in the face of the gigantic concentration of modern industry, the necessity of united political class action at the ballot box as the only resource left to organized labor, are vigorously emphasized throughout the article. Comrade Oison is known to many of the Chicago per of this paper and his untiring work for the new order of society is thoroughly

founded entirely upon the robbery of the weak by the strong, many of hi listeners doubtless feel inclined to be lieve that such an assertion is a gross exaggeration constructed upon a small modicum of truth. It is always easi to convince the average "patriotic" in dividual that whatever charges can be brought against "civilization" in this respect are always based upon the mishis awn; and as this comfortable the ory is universally held, and given the edest possible circulation, it is not difficult to comprehend the nature of cent-occupation of Pekin by the forces of the civilized powers. Enough has leaked out to show that this expedition was in reality one of the most gigantic plundering and pillaging schemes of which history holds record. And yet what occurred was only the reflex of the "civilization", which directed the forces of the allied powers. A perfect torrent of charge and

countercharge now fills the columns of the world's press as regards this incldent. German newspapers accuse the British troops of being a mob of thieves and plunderers. The British press retorts with the same charge against the Germans. Japanese, Russian, Freuch American journals maintain a crossive of accusations against each other. An American missionary is arby the French authorities charged with extortion from the wretched Chinese peasantry; a French bishop must answer before the international government on a charge of loating the house of the Chinese mintster for foreign, affairs, of property worth \$700,000; a story is going around that British troops ripped the thes off the roof of a pagoda under the impression that they were solld gold, and only later discovered that they were merely copper or tin glided over. An American correspondent writes of having seen boxes of glittering loot from Pekin in-Washington, rare vases, priceless ornaments, valuable books, glass, furniture, jewelry, pictures, and other portable property too numerous to mention, all of which was part of the spoils which fell to the share of the American pillagers, and concludes his description by cynically observing that mantelplece in the room where he is busy writing articles on the ship bill is ornamented with a "lovely snuff bottle of green jade," once the property of some walthy Celestial

A writer in the Contemporary Review who was an eyewitness, gives the fol lowing description of the scene which ensued when the imperial residence at Pekin fell into the hands of the pioneers of Christian civilization:

The league of civilian looters of all nationalities has been disrupted by differences which have arisen over the division of the spoils, and there now seems to be a chance for honest men, including the Chinese, to get their dues.

The looting which took place in the imperial apartments of the Forbidden City was marked by a series of unreseased scenes of grim Satanic humour, to which even a modern Hogarth could hardly do justice.

The civilisers burst into the imperial chambers despite the respectful requests of the mandarins present, but it was only, forsooth to have a look or take a photograph. Then they handled the furniture, but movely in order to ascertain the nature of the metals, and the hardness of the wood. Then drawers were pulled out and cases opened, just that they might glance at and admire the barbaric splender of the Chinese court. And then there was a pause, during which the intrudets looked less at the valuables and more at each other. One man would lift up a costly label. st the valuables and more at each other. One man would lift up a costly adds ornament or a fine piece of sliver-work, study it, glance furtively around, research in a half shame-faced, half regretful way, and move on to another drawer. Then be would return to the first and begin these sites over again. One can the essential nature, and methods of the school-men we can decide scoa diplomatist's cuphemism. One cannot go without a souvenir. That word "rouvenir" was the formula which everyone had been seeking for. Once found, there all breathed and plundered freely. Each one wanted a souvenir, and as there was little time to pick and choose he took a number of articles home for inspection. The full tide of looting had now set in and could no longer he stemmed, even by the sturdest of those who were wont to be "honer in the daylight and virtuous in presence of a crowd." An officer of high rank, coming its, shock his heard suddy, but exclaimed hopefully enough. "Gentlemen, no looting please." Each one may take a "little souvenir, but nothing more." Thirty years ago the working class population of Paris gained a temporary supremacy in that city. The enormous wealth contained in the Bank of France and in scores of other private banks pints of an economy that finds justice was left absolutely untouched by them, though they might have found it exceedingly valuable in maintaining their position against the capitalist army, who afterward murdered them in thousands as a reward for their foolish honesty. And yet the prototypes of the diplomatic plunderer who discovered the word "souvenir," the self-respecting party with the solemn face and bulging body, and the gentleman said to be a Yankee," who despoiled the mandarin, would doubtless dwell with pious borror on the alleged plundering propensities of Socialists.

That part of the plunder which has not yet been shipped from China it seems is now a bone of contention amongst the thieves, just as the civilized capitalists fight amongst each other for the loot extracted from the countries were alone responsible for order to produce freely and produce the pillage. The Effect of the Capitalist System of Production Upon the Se-called "Learned Professions."

It would seem that the "dead level" which every good capitalist is afraid would result from the establishment of ocialism, is rapidly putting in an apcarance in present society. Judging from the following opinion of a wellknown Chicago lawyer, it would seem its quarterly dividend of \$29,000,000, and that capitalism is teaching the legal all those holding stock certificates are profession that it is in no way distinct rom the other wage laborers: The lawyer is not an ordinary busi-

As the reward of the hardest kind of drudgery and study, he is guaranteed the special privileges of his profession, just in th same way a physician is provided. Every doctor resents any infringement on his rights, and lawyers should do likewise. This talk about the induscern is controlled by a Philadelphia Democrat, a German daily "working-man's friend."

A general reorganization of the Thirty-third Ward branch took place last. Wednesday night at the headquarters of branch, corner of One Hundred and Thirteenth street and Michigan avenue. Thirteenth street and Michigan avenue. A number of new members, joined the branch. It was decided to retain the old officers of the branch inasmuch as they had proven efficient, in the past. Arrangements were made for in effected to take fifty half-yearly Workers Call rostales.

Comrade Jos, Wanhope Comrade Jos. Wanhope spoke last Sunday evening at a meeting of the Thirty-first and Thirty-second Ward branches, at their hall 600% S. Haisted street. A godd crowd was present. After Comrade Wanhope had concluded, abort addresses were made by Comrades Glamberk and Meiter. It was Comrade Meiter's maiden effort: He has a splendid style of delivery, is well informed, and will undoubtedly make a valuable addition to the list of Socialist speakers in Chicago.

On Monday, February 11th, a mass meeting of the Curpenters union was addressed by Comrade T. J. Morgan, at Scaudia Hall, corner of Ohio and Milwaukee avenue. The hall was crowded and the address was listened to with much interest and appreciation, and the meeting indicated the beginning of anothes advances of organized hibor in this city in which the co-operation of Socialists will be a valuable feature. Socialist trades unionists should give the most hearty assistance in stimulating this renewal of activity in the ranks of the unionists.

tendance is confidently expected.

The comrades the Seventeenth Ward inaugurated their campaign last Sunday afternoon, by a rousing meeting at Aurora Hall, conter Huron street and Milwaukee avenue. The speaker was Comrade Waiter Thomas Mills, who took for his subject, "Why You Should Be a Socialist and How You Can Get Socialism," The success of this meeting has infused new life into the Socialists of this ward. They have arranged another pecting for next Sunday, with Comrade Mills for speaker. Two thousand hand bills will be distributed, and everything will be done to make this meeting even a greater success than that of last Sunday.

Miss Mary E. Collson of Hull House

Miss Mary E. Collson, of Hull House, gave an earnest and convincing address hast Saturday evening at Sherman Hail, in South Chicago, before the Eighth Ward branch of the Socialist party. Her subject was "Morals and Money," and she gave experiences from her and she gave experiences from her work as probation officer to show that people are called "bad" and "immeral" for conduct which would be wholly blameless or even commendable were for conduct which would be wholly blameless or even commendable were the economic pressure removed. She contrasted the boy who was fhought too viciously extravagant to be allowed to himself collect the \$2.00 which he had earned by seven day's of ten hours labor, with the honored New York millionaire who purchased for a single evening's enjoyment the entire supply of a certain rare flower to be found east of the Mississippi. The speaker showed that the varying standards of morals are due to differing modes of making a living, and that "public morals" and a single standard of conduct will only become possible when all have the same way of making a living—as producers. The audience was sympathetic and appreciative, and shared in the discussion which followed the address. Next Week Comrade J. B. Smiley, author of "To What Are Trusts Leading", will speak on "Public Ownership" at the same hall.

Tee Busy to Explain.

A general decline in the value of the assets of the Nebraska Loan and Trust that institution to go into the rec hands, February, 18. Its capital was \$500,000 and it advertised a surplus of \$125,000. The liabilities are unknown. The company is said to have m great many loans on western Nebraska land and on farms. Now let Mark Hanna and Wm. E. Curtis co ward to explain this matter. Ac ing to them the farmers had all of th mortgages paid and money in the bank. Nary an explanation though. Capitalism Drives Wage Slaves From "Home" and Then Proposes to Whip and Imprison Them.

According to the report of the Bureau of Charities more than two thousand husbands have deserted their "homes" in this city, leaving their wives and families dependent on "charity," within the last year. Amongst all the alleged reasons for this, no mention is made whatever of the fact that workingmen, even in their "homes" are "depend nt" upon the owners of the means of production and distribution, in order to live. Existing marriage and divorce laws are given as one reason, and that good old stand-by, the presence of increased numbers of "ignorant foreigners," as another. There is not ever a hint that economic conditions have anything whatever to do with the matter, and the remedies proposed are quite in keeping with the reasons given. "Drastic legislation," such as the restoration of the whipping post, and the keeping of the culprit in jail at hard labor, and supporting the deserted family from the proceeds, is the recommen-

dation of "organized charity." With such people "descriton" is not in any way criminal unless the descried es are left "dependent." It is in this alone that the crime consists. The in-dividual who has succeeded in accumu-lating wealth by robbing the workers, (which is the only method of accumulation), can desert or separate himself from wife and family at his own sweet will provided he leaves for their support enough of the plunder to render them independent of the "charity" of his brother exploiters, and "society" no protest. 'Let any of his victims, however, through economic stress be compelled to follow his example, and at once an outraged "morality" howis for the whipping post and imprison-Touch not the pooket of thy capitalist master, O wage slave! A special brand of "morality" lies therewhich is his private property. When he ceases to furnish you "employment," don't steal-that's a crime (for your ciase), don't beg-that degrades you, and above all, don't run away-that's expensive to your masters and there-fore "immoral." Fishing for Suckers.

The Chicago Record always has its fishing pole in readiness for suckgrs, and its chief manipulator, (Curtia), being a good scratcher for balt, always has a sufficient supply of various qualities on hand. He baits his hook with flewery descriptions, with aristocratic mothingnesses, with democratic hunthougely, with religious tolerance and intolerance, with historical inacuracies and contemporaneous twaddle, but notwithstanding all of the confusion and interconfusion into which his statements become entangled, people will ask him for statistics. And of, what a sugarcoaling his slippery style applies to them! "— the workingman reads Curtis between his lines: here are figures to show he is better out now than he was fifty years ago, when that is only one-eighth of what he produces), than he was fifty years ago, when that is only one-eighth of what he produces, than he was fifty years ago, when that is only one-eighth of what he produces), than he was fifty years ago, when that is only one-eighth of what he produces), than he was fifty years ago, when that is only one-eighth of what he produces), than he was fifty years ago, when has to heavy of the produces, than he was fifty years ago, when he so tearing all of the confusion and had the produces, than he was fifty years ago, when has the got fifty years ago, when has the produces, than he was fifty years ago, when he so en that is only one-eighth of what he produces), than he was fifty years ago when he got nearly all that he produced. THE PEOPLE'S MARX from the pen of Gabriel Deville and in the translation of Robert Rives La Monte, presents to the English-speaking Socialists the most excellent and successful epitome of Karl Marx' "Capital." This luminous epitome, from the last and seventeenth French edition, is issued in the style in every way characteristic of the publications of the INTERNATIONAL LIBRARY.

The Haverhill Social Democrat, remarks on The Peoples's Marx as. The Bible of the working class, a Bible whose study is as beneficial to the workingman as is the orthodox Bible to the average Christian.

OTHER OPINIONS OF THE PRESS

The New York People on The People's Mr. B. O. Flower, in The Arena:

Deville, in this abridgement and popularization of one of the profoundest and one of the most difficult economic works ever undertaken, has succeeded admirably in this respect: That he has held close to the outlines of the original work, has preserved its essentials of form as well as of matter, but has considerably reduced its size, and to a very great extent has simplified it and brought it within the understanding of the ordinary reader.

B. O. Flower, in The Arena:
Only patient plodders and scholars, with tastes for economic studies, however, are able to master Marx' Capital, and many attempts have been made to furnish the people with a luminous epitome of this great work.... Up to the present time no one has so satisfactorily accomplished this work as Gabriel Deville, in the volume before us. His People's Marx was published in France in 1883, and has now been excellently translated into English by Robert Rives. La Monte.

The price of The People's Marx is: one dollar and a halt in cloth; seventy-five cents in paper. With orders sent in before the 1st of March we will give as premium a cloth copy of the Silver Cross, (price 50c.), with \$1.50 edition; or, a copy of the Civil War in France, (price 25c.), with the paper edition.

LOOKING BACKWARD

The Workers Call Completes Two Years of Socialist Activity.

LIVED A "STRENUOUS LIFE"

Retrospect of Events in Its History and the Efforts of Its Founders and Supporters.

Just a little over two years ago this week, several comrades met at my house to arrange for some work in connection with the approaching municipal campaign. As the talk went on it became more and more apparent that we were seriously handicapped by the lack of any means of reaching the voters of this city. More than this there was a general dissatisfaction with the manner in which our national organ, The People, was then conducted. Finally it was suggested that we try to start a paper of our own. This was no small undertaking at that time. There were only a triffe over 200 members in Section Chicago and practically all were manual laborers.

Nevertheless, after much discussion the matter was brought before the Central Committee, and it was found that a paper seemed to be just the thing that all had been waiting for. comrade after another pledged himself to contribute a certain sum toward its maintenance and establishent, until \$300 had been promised by a little band of less than fifty working-And it might be well to say right here that practically every one of those pledges was redeemed as well as many more made later, and again and

At last a scanty outfit was purchased. the present headquarters rented in partnership with-"The Arbejderen," preparations made to issue our first number. But things kept coming up that had been unforseen, and when day came for publication we were still far from ready. However we worked on until supper time, then con-cluded to stay a little while in the eve-ning, and then worked on almost until daylight was breaking in the East before the proof of the first copy of the Workers' Call was in our hands. And this was not the only time that such work was necessary. More than once has both editor and compositor worked on until the "wee sma' hours," in order that the comrades throughout the country might not be disappointed in receiving their paper.

And right here let me pause to render a well-deserved tribute to one without whose efforts The Call would long ago have ceased to be. To the self-sacrifice and persistent toll of Comrade M. L. Klauber more than any one man do the Chicago comrades owe the fact that they are today in possession of one of the best Socialist papers in this country. With no prospects of seeing his thoughts grow into visible form and assist in spreading the doctrines in which he beliewed, which has always been the one great consolation of an editor or ontributor, he has worked on week after week, enduring all manner of dis-comforts, until at last he has the satisther week, enduring all manner of discomforts, until at last he has the satisfaction of seeing the paper on a foundation, that while it may still call for some sacrifices and much hand work, will never again be in danger of ceasing to exist. And with this number he call picnics." The first one, when the call picnics. The first one, when the call picnics. The first one, when the call picnics. The first one, when the call picnics and the satisfaction of the paper of captures and in gon and poor of captures and provided and them to you concerning for them to dance attendance upon low and grow the capture with the satisfaction of the paper of the call in Mother to you concerning for them to dance attendance upon low "I shall speak to you concerning the capture world. It is an eld subject but the world. It is an eld subject but the world has never been the world. It is an eld subject but the world has never been the world has never been the call of the call in Mother the satisfaction of the world. It is an eld subject but the world has never been the world has never been the world has never been the call of the call in Mother the satisfaction of the world. It is an eld subject but the world has never been the world has never been the call of the call severs his connection with The Call, for the last time all Chica so that it is especially fitting that it should bear some little testimonial to the work he has done,

But If one were to attempt to tell the story of all those who have made per-sonal sacrifices for the sake of The Call the list would soon grow overlong and tiresome. There is Comrade Berlyn who "was never skunked once" for nearly the whole two years, in an imaginary game which he played each week with the general public to secure at least one subscriber. Had we fifty workers like him a Daily Call would be in sight. There was Comrade Peter m, to whom more than any other one man outside the actual staff, was for many weeks led all others in the that since he has found himself ed to the present policy and has We know that his efforts in that line are hopeless and fruitless, and so we can thank him for the good he did and wait the time when he shall be again

ner was The Call established than it became at once apparent that it was destined to "fill a long felt want". Aside from The Tocsin of want." Aside from The Toesin of Minneapolis, which was doing splendid work, there was not a line of clear-out Socialist literature being published be-tween the Alleghenies and the Rockies. The People had become, under DeLeon's guidance a mere string of egolifical personal invectives, as useless a thing for propaganda purposes as could well personal invectives, as useress a thing for propaganda purposes as could wel-be imagined. The result was that the circulation of The Call rose by leaps and bounds. Rochester and Syracuse,

New York, at once realized the exceleagerly. It soon had a circulation of nearly two thousand in each of these The total circulation rose to nearly 25,600 in less than five months.

Then came the trouble of July 19th,

1809, which marked the culmination of long series of abuses. De Leon and DeLegnism were repudiated by the Socialists of America. Then for months the entire energies of the organized Socialists were spent in a fratricidal strife. Then it was that the order went out to "boycott" The Call." At the same time The People, falling into new hands, began to be worthy of the sur port of all Socialists and so naturally the comrades in New York state whe had hitherto done so much for The Call began to work for the paper which was nearer at hand. More significant than all else, the history of the Socialist movement for the last few years has shown beyond the possibility of a doubt that when Socialists begin to fight each other they do little propaganda work. So with hostility on the part of many old friends, the rise of new and strong competitors and the indifference of those who should have wonder that dark days came to The Call. There were times when after each issue there would be a long-drawn breath with an expression of wonder as to whether another would ever ap pear. To make the matter worse "The Arbejderen," at last succumbed to the attacks of those who called themselves Socialists, but have really become the most valued allies of capitalism, and left The Call with a double burden of rent to meet, Still the faithful comrades rallied to its support and finally the light began to dawn and for several weeks the circulation has been increas ing at a rate that reminds one of those palmy days of its early career.

No sooner was the question of De-Leonism settled than it was apparent that the time had come for a union of all Socialists who stood upon the International platform, and The Call was one of the first papers to insist upon that unity-a position from which it has never wavered to the present mohas never wavered to the present mo-ment. In this as on every other ques-higher grades being more expensive, it tion The Call has ever stood for a cleartion The Call has ever stood for a clear-cut, uncompromising policy that would tend to a unification of the forces of the countries of those of capitalism. laber opposed to those of capitalism. When one stops to think of the tre-

The little of the children is in any sense a "step to movement are at last compelled, out of movement are at last compelled, out of wards socialism," on the contrary it is its growing importance, to active it at the columns. Then, as was to be expected, and as it should be, all our best workers would transfer their allegiance to the new friend and The Call list would fall off. So more and more The Call has been transforming itself into a local paper, believing that the time has come when every large city and every state at least should have its own Socialist paper. Chicago certainly has reached the point where it can support a Socialist paper, and in The Call it has the paper it needs.

The world refuses to be made by a rulling or religious class. It will never be made by a rulling or religious class. It will never be made until all men work together. "There is no sense in the present world in which the majority is working in want for the support of the idle few. There, is enough in the world to give plenty to all. We are slowly learning of nations what is equally true of men that no pistion can prosper at the expense of another nation without taking to itself the elements of its own destruction.

"In my travels throughout the world I have risked my life among wild people, in order to find a place free from the capitalistic system. I found the Standard Oil company everywhere, grinding the people and subverting governments to its purposes. I learn that the late extradition treaty between the United States and Russia, which was rushed through congress, had beneath, it the ownership of the Russian oil fields. I found that the company that corrupts legislatures at home buys, governmental favors abroad. I found the American capitalist everywhere, but building more wisely than he knows.

"This capitalistic system is solidifying the working people of the entire world and eyen the laborers of Japan are awakening to the questions of socialism. It but needs faith in a single city now to fire the world and bring about the regeneration, to make men realize that where one man rises to success millions go down to misery.

EDUCATIONAL WORK.

ol of Social Economy in Chicago Valuable Training Ground for Socialist Agitation.

The Workers' Call has given its as proval and support to the work of Wal er Thomas Mills in his Chleago Schoo of Social Economy from the beginning of his work. The school has advanced to a point now where it seems to us something more direct and definit ought to be said concerning this under taking than has yet been said by any of the Socialist papers.

. His course of twenty lessons in his night school in this city is now mor than half finished. Those who hav been following the course thus far ere in a position to judge of its value as training school for Socialist workers The highest words of praise that car be spoken are found in the fact that while the students include those who have made a special study of thes questions for years, together with man; who are making their first attempt at this time, and besides include persons with all degrees of historical and scientific training, there is not a single in stance of disappointment or complaint

The school is made up of busy people and not infrequently night work has compelled an irregular attendance, but ven when taken out of their connection the lessons have been so full of information and the conclusions so evident and of so great value to socialism that these night workers are as enthusiastic as the rest.

We have had an opportunity to ex amine the first two printed lessons to be used in the correspondence work, and we do not hesitate to say that if you are anxious to get the argument for our cause so arranged in your mind as to make evident the logical necessity for socialism from every possible standpoint, if you wish to plainly see that the whole story of civilization is but the story of the development of socialism, and if you wish to get these things so fixed in your mind that you can be them on any and all occasions, then you cannot afford to miss the opportunity to take these lessons by corre One good feature of the work is the

care with which the facts have been esson alone twenty-eight different refgrences given in the foot notes to the ources of information, and all are from the works of those who are widely rec-ognized as the most reliable writers on the subjects concerning which informstion is sought. It is no small matter to use, the conclusions of ripest scholar- for a recognition amongst the worker ship on topics in any way related to of the destined mission of their class socialism. But the real service of Com-rade Mills is in taking these facts of modern scholarship and delivering prepare to cope in the near future with them from the useless chaos in which the investigators have left them, so far as making use of them in the social be found, directly underneath the discussion is concerned. Comrade Mills is marshalling them for real service. He is putting them into a logical order so that the great events of history and the great discoveries of modern science seem to join hands in the defense ocialism as if modern scholarship had done its work for no other purpose.

Comrade J. B. Smiley, who is himsel ne of the best-read men in the Socialist movement, is one of the board of examiners in this course. He is regularly ing finished more than half of the night hool work, and after he had examined the first printed lesson for the correspondence work he wrote to Comrade

Most of the comrades alluded to in the sketch, are still in the city, and they will recognize its truthfulness from memory.

And so the Workers' Call' is still in the field—cill on the firing line—and all the time striving and thriving and growing, and—well, yes, we may as well say it, for there are occasions—blowing. For if there are none to celebrate the auspicious anniversary we have determined to do it ourselves.

We firmly believe in a policy of expansion—for the Workers' Call.

During the last few weeks I have been putting in operation a plan that I had hatched out and have found that good results have followed.

Some time ago I began to break the ice in the way of writing my dear old father, one letter every Sunday of from 8 to 20 pages, appealing to him for the future and the welfare of his children in the most forcible and convincing language I could think of.

His reply to me in his first letter was as follows:

His reply to me in his first letter was as follows:

"My Dear Son:—

"Your letter of Sunday, November 18, from Okiahoma City, Okia., to hand, and will say that I have been through the horrors of the late Civil War from 1860 to 1864 and at that time my heart was hardened to the occasion, but year by, year after that I began to see the error of humanity in shooting each other down and leaving wives and children half-fed and half-clothed at home, and yet the politicians and associated press say that when a workingman goes away from his wife and children to shoot down other workingmen and gets killed himself, and his family suffers and waits patiently for his return, they call it "patriotism." I call it cold-blooded murder to satisfy the greed of the moneyed class and their politicians. I will say that your letters to me have been shining stars over the East and will admit that you are more than my equal in political economy. You have pointed out the pathway for me to travel to get out of this misery and worry that I have gone through for over 50 years. You nearly break my poor old heart when you tell me the actual conditions are rapidly growing worse, which shows that your ling is gradually coming downward and lower than chattel slavery. I am a witness to that, as I am in the same condition with one foot in the grave and the other almost there, with not a plece of earth to call my own to buried in.

"But your letters have shown me the way and they make me feel so young and happy that I shall puil off my old har that I have worn for five years, and throw it to the plutocrats soil and show my white head to the word that I am now a Socialist and will work the remainder of my life, and that is not long, for the cause of humanity and socialism.

Let me suggest this plan to Socialists who have relations to work on, and they will readily see its effects to their heart's content.

A Source of "Inspiration." In the career of one Harris, who was recently elected president of the C. B. & Q. railroad, a capitalist daily declares that there is "much inspiration and encouragement for the young men of the country." The much-belauded Harris started as office boy in 1866, and thirty-five years assiduous attention to duty made him president of the road. public attention lately. From this table it appears that the Thirty-fourth ward cast for Debs and Harriman a larger vote by more than one hundred ballots than any other ward in Chicago. The Fourteenth and Fitteenth come next behind, with a difference of but 27 votes in favor of the Fifteenth, while the Thirty-third stands at the foot of this coll of honor, with only 209 votes cast for the Socialist cap-The Tenth and Thirtieth wards deserve special mention with their more than 400 votes each for the election of Debs and Harriman.

When, however, one compares the Socialist vote with the total vote of the wards, this result is somewhat altered. It now appears that the Thirtyfourth ward, with its large voting pop ulation of 20,734, gives to its Socialist voters an approximate fraction of only 1-31 of the whole. The Fourteenth ward to the first place in the list, its Socialist ballots being approximately one-twenty-ninth of the whole. (Figures below hundreds are rejected in obtaining these results.) The Fifteenth ward again follows immediately upon the Fourteenth, while the Thirtieth, with its huge voting poulation of 21,-910, gives to the Socialists but one fiftyfourth of the voting strength of the ward, spite of its 425 votes.

If we now make a more accurate comparison between the Socialist total and the total vote cast in the respective wards, the alteration in rank will be even more startling. Dividing the total vote of each ward by the vote for Debs and Harriman, as shown in the earlie table, the following result is obtainedthe division being carried to but three decimal places:

The change of boundaries will rather aid than hinder the Socialist vote, only that portion of the old ward west of the evening meeting, and marching in Humboldt Park being cut off. The Socialists of the new Twenty-eighth ward -the old Fifteenth-are also finely organized, public Socialist meetings being held every week. Apparently in this case the change in boundaries will not aid the Socialist vote. The new Tenth and Eleventh wards are both slightly increased in size over the old wards most nearly corresponding. The columns of the Workers' Call show that here, also, an active propaganda is being conducted for socialism. Twelfth ward is much smaller than under its old name of the Tenth, but still includes Douglas Park and several In each of these hine wards the So-boulevards—boulevards usually mean-cialists cast more than 2 per cent of the socialist territory. The new ward has before it a great future for socialism, owing to the presence of the Illinois Steel company and other manufacturing plants. Thus far, the conparative youth of the Socialist organi zation in the ward, the weariness o employes after their long twelve-hou day of labor, and the influence of "prosperity" have combined to make particularly difficult. But the ward is waking up; the Socialist vote continue to increase, and public meetings conducted by the branch of the Socialist party in the ward are being held every Saturday night at Sherman Hall in South Chicago. Here Socialist literature of all kinds should be constantly on hand, and a delegated comrade present to answer questions at noon, as well as in the early evning During March, also, public Socialist meetings should be held at the ward headquaiters on every evening of the week. Programs could be varied by debates with non-Socialists, and livened by Socialist songs. Always there should be the freest discussion at the close of the address, together with questions from the audience. Other public meetings should be held at important points in the ward, especially during the week before election. Less important wards may well spare for these meetings such speakers as Comrades Herron, Walter Thomas Mills and our candidate for mayor, Comrade John Collins.

> The matter of advertising is of primary importance. Not only should there be cards containing a program of the principal meetings, and printed on the back with the Socialist party ticket for the city and ward, suitable for sending by mail, but handbills should be distributed at all the stores and public places of the ward, and left on a sinproviously arranged canvass. Huge posters, also, should be pasted on billboards, announcing the principal meetings and the Socialist party candidates. On the day on which an important meeting is to be held a wagon containing banners and posters announcing the event could be driven about the ward, accompanied by the drum, which one ward, so simple a device as securing the services of five small boys, car rying flags and a banner announcing of three or four blocks in the neighborhood of the hall-has had astonishing results in increasing the audience. ACCEPTS THE NOMINATION.

Chas. H. Vail. Socialist Candidate for Governor of New Jersey, to His Constituents.

George H. Strobell, Chairman New Jersey Campaign Committee, Social

Democratic Party. Dear Sir and Comrade:-

Your letter of recent date, advising me of my nomination by the Social Democratic party for the office of gov ernor of the state of New Jersey, received. I wish through you to thank the members of the party for the honor thus conferred upon me. It is indeed, an honor to receive such a nomination from the Social Democratic party—the party that stands for the interest of the proletariat class.

The economic development has separ ated society into two antagonistic class es-the capitalist and the proletariat The interest of these two classes being diametrically opposed, a class strug-gle is inevitable—it is the necessary outcome of class distinctions which in volve class interests. The Social Democratic party is distinctively a party of the working class, and is based upor the class struggle. It emphasizes the essity of class-consciousness on the part of the working class, for only as laborers become conscious of their class interests will they unite to secure their While socialism represent the class interests of the proletariat. it also represents the higher interests of every member of society, because it will realize a-higher and nobier civili-

The first step is mastery of the public powers. Political power is necessary to any class which desires to better its economic condition. Political power is the key to economic emancipation, and political action, on class-conscious lines will secure to the working class posession of the key. That the working class is sorely in

need of a betterment in its material condition none will deny. The disgrace of the century just closed, is that with the hundred fold increase in our power of wealth production sufficient to supply many times over the needs of all the people, we have only succeeded in adding chiefly to the individual wealth and luxury of the few. The great mass of the people, when we consider all their circumstances, are no better off today than they were thirty years ago and many are worse off, and this condition will remain until we make the equality of opportunity-a realized present class 'organized 'society Abe great bulk of the people have no opportunity for the full development of all their faculties and powers. We have attained the material basis for the abolition of all poverty, but its realization is prevented by our perverse economic system. Poverty today has no excuse for existence, and would be impossible were the industrial system such as to compel every man to live by the fruit of his own industry. The distinctive feature of every system of social injustice, chattel slavery, of feudalism, and capitalism, is the power of the non-producers to appropriate the wealth of the producers. Slavery is abolished only in name: the fact still exists. No man is free so long as he s dependent upon some other man for an opportunity to earn a livelihood. If It will realize the golden age of p virtually owns me. If he owns my brend or the means by which I get my being. voman and child to be well housed, tothed and fed. When industry is scintifically organized this can be acimplished by two or three hours' daily abor, thus giving time and opportunity or mental and moral development. Let us resolve at the beginning of

this new century, that we will more completely consecrate curselves to our beloved cause. It is worthy our enhusiasm and zeal, for it presents to the world the only solution to the vexed problems that confront modern society. Let us who have seen the fight proclaim the gospel of emancipation in ason and out of season. Carry to those of our fellows sitting in darkness the light of Socialist teachings, Point out to them the cause of their servitude and oppression, and fearlessly proclaim the remedy-the collective ownership of the means of production and distribuion. Show them that the old political parties represent the interests of the capitalist class. The petty political isues which the Republican and Demo tratic parties raise are only for the purpose of fleeding the laborers on the one hand and throwing dust in their eyes on the other lest they see the only real issue-Socialism versus Capitalism. The old parties defend the present system of wage slavery and exploitation; the Social Democratic party preperes to abolish it and substitute therefor a social democracy in which the industries will be owned by the people and carried on for use-not for private profit. A vote for either old party is but putting another rivet into the chains of economic sevitude.

As Socialists we have a great responsibility resting upon us. Into our hands has been committed the new gospelthe good news for the world's disinherited. A danger confronts the twentieth century-the danger of an unintelnot distinctly understood and awhich could only result in anarchy and disintegration. Socialism, by educating the masses on the economic question, is the only power that can avert such a catastrophe. It is ours to be missionaries of progress and divilization: All over our land, and, in fact, the whole civilized world, the proletariat is organizing under the banner of the Social Democratic party into class-conscious bodies having for their aim the mastery of the public powers, to the end that the present system may be supplanted by the Co-operative Commonwealth.

Conditions are now ripe for the transformation. The pineteenth century was distinctively the evolutionary period of ocialism. First, during the germinating period, evolution proceeds slowly, but it gains in rapidity and finally the decisive step is usually accomplished once, and is termed revolution. Revolution is the decisive step in evolution and is generally the last step in a peried of slow growth and preparation. Christianity in the Roman empire, the fact in our social organization. In the Reformation, the French revolution, the abolition of chattel slavery, are notable examples of the working of this princi-ple. Every careful discerner of the times realizes that we are nearing the decisive point. The trust is the immediate forerunner of the social revolution. The sun of the Co-operative Commonwealth is already beginning to redden the eastern horizon, bringing prom-ise of the gladsome day. Tuesday, March 5th, 8 p. m., Socialist tage and Milwaukeee avenues to listen to an address upon "Expansion." from Comrade Wanhope, who was advertised as the speaker of the evening. The closest attention was paid to the address, and an extremely interesting discussion followed, which was participated in by many of the branch members. This branch is holding a series of meetings in which the opportunity is given of hearing most of the local speakers on socialism. On next Sunday at 8 p. m., the address will be given by P. Hisman.

The comrades of the Eighteenth ward have arranged for an agitation meeting at Madison Hail, Empire building, on Madison street, opposite union street. Wednesday evening March eth, at a o'clock. Comrade Walter Thomas Mills will speak. It is especially urged that every member of the Eighteenth Ward branch do his best to make this meeting a success, and to get out a good crowd. This branch, while not so strong numerically as most of the other West Side wards, has good material in it for an active campaign. If every comrade will get a hustle one himself for the next few weeks, it is certain that the Eighteenth ward will soon have as large and useful a branch as any in the city.

ward will soon have as large and useful a branch as any in the city.

Machinists' Local Union No. 124 held a stag party on last Saturday evening at 8 p. m., at the Empire building in W. Madison street, and managed to obtain a general good time. There were three speakers on hand to address the meeting and Brother Broderick opened the proceedings with a most impressive speech on the necessity of organization. He was followed by John Collins, the candidate for mayor on the Socialist thicket, and between six and seven hundred men heard Brother Broderick's upsech, supplemented by an address upon the necessity of political as well as economic organization. The absurding of fighting the boss furing a strike and voting for him on election day was well flustrated. The spe age then exceed the two where the bower out the boss as derived from and showed that this ower was the gift of the workers hemselves, through their votes being ast for the two old capitalist parties, ho were equally their encodes and exceeding the stage of the two old capitalist parties.

ing of the Eighth Ward branch last week:

'James B. Smiley, the author of "Too What 'Are Trusts Leading?" lectured Saturday night at Sherman Hall, under the auspices of the Socialist club on the subject, "Public Ownership." He said that the real cost of transportation was but a fraction of what is now charged, and claimed, on the authority of official reports, that the actual cost of carrying a passenger from Chicago to New York was not over one dollar. He held that the same principle applied to industry as well, and that under public administration of manufacture much that is now regarded as luxury would be within the reach of all. Public meetings are held by the club every Saturday night. The subject for the next meeting is. The Effect of Machine Production on Social Organization."

SOCIALIST REVIEW

This is the only periodical in the English language reckoning among its contributors all the great Socialist writers of the world. Among those whose writings have appeared in its columns in the last seven monthes are Charles H. Vail, Leonard D. Abbott, W. T. Brown, H. M. Hyndman, Paul Lafargue, E. V. Debs, Job Harriman, Ernest Crosby and Emile Vandervelde, while Edwin Markham, Kier Hardie, Rev. T. McGrady and Jane Adams have promised articles

PROF. GEORGE D. HERRON conducts a department each month on SOCIALISM AND RELIGION, containing matter of great interest and value to all students of social questions. It is the only instance in the history of Socialist literature where a regular department was conducted upon this subject by a man who combines such yars natural talents with a thorough knowledge of the literature and decirines of both Religion and P

MAX S. HAYES, equally well-known as a writer and speaker in both the Socialist and trade union movement, edits a department on THE LA-BOR WORLD. This consists of a thorough summary of the happenings in the field of organized labor, with descriptions of the more important me-chanical and industrial changes of each month.

The department on SOCIALISM ADROAD, is infinitely superior to anything of the kind ever attempted in the English language. In addition to a full and able corps of foreign correspondents, several Socialist dallies of Europe are subscribed for and nearly all the important weeklies and monthlies are received on exchange and made use of in its preparation. "These lessons are not only interesting and instructive, but they unfold to us our own life's meaning in this study of socialism. The whole world is made so beautiful and our own relations to it so direct and simple that we cannot help but understand; and it is so presented that we FEEL, the truth as surely as we understand it, and so it cannot be forgotten."

"Anyone of average intelligence can take these lessons, as nothing could be more simple or more tucid than are his explanations."

Geo R. Rosenberg.

"These lessons are dealing with topics which I have studied before, but some way the whole world is being transformed before my eyes. Things which were familiar to me are put into such new and unexpected relations as to produce results of which I have never even dreamed before. I am only half way through the course, but life must always mean to me more than it has meant before, and socialism is simply the means by which real life is revealed and made possible for all."

Dr. Herbert E. Phillips.

IGNIFIED and scientific as Lassalle's "Workingman's Programme" was, the Prussian government could not tolerate it, and brought him before the court to answer an indictment of having publicly incited the unpropertied classes to hatred and con-tempt of the propertied classes. "Science and the Workingmen" is the speech Lassalle made in his own defense. Here it is that Lassalle in language bold, and with a spirit of confidence and sincerity, assumes the dignified attitude of a champion of the workingmen. Undoubtedly the author is extravagant in his fluency, yet not for his personal defense, and his brilliant and systematic array of historic facts and philosophic deductions at once inspires the reader with a vision of a herald proclaiming world-wide the cause of the workingmen.

The distinct literary style of this work endows it with a special interest and a desirable quality.

General Committee Meeting Like a Small-sized Parliament.

LOCAL ACTIVITY INCREASES

Enormous Growth of Movement Render Imperative New Methods of Organization Work.

The most interesting and most largely attended meeting of the general commiftee of the Socialist Party of Chicago since its reorganization took place last Saturday night at 104 East Randolph street. No better index of the progress of socialism in Chicago and the prosperous condition of the Socialist Party is needed than the increased interest manifested by the various branches throughout the city in the sessions of the general committee. Since there are forty-one organizations in the city represented in the councils of the party, and since each organization is entitled to two or more delegates, the sessions of the general committee present all the aspects of a small-sized parliament.

As a result of the activity of the past two weeks ninety-five applications for membership were received and accept-This record for two weeks exceeds anything accomplished in the past by the comrades in Chicago.

There were fifty delegates, representing thirty-four branches, who responded to the roll-call. Besides these there were the following new delegates who presented credentials and were scated: Third ward, John McEachan and Louis Daigaard; Twenty-third ward, S. Sparks and A. W. Martin: Twenty-first ward, W. T. Russell in place of J. Min wegan; Thirty-third ward, H. Deboer; Twenty-seventh ward No. 5, P. Wha mond: Twenty-eighth ward, Adam Harvey in place of J. M. MEETING A PROBLEM

Negro to Be "Educated" in Cotton Manufacture.

A CHECK ON WHITE WORKERS

Southern. Capitaliste Quietly Take Steps to Insure a Constant Supply of Cheap Labor.

Experiments that have been so far made in utilizing the negroes of the southern states in the textile industry have shown that while cheap labor power undoubtedly exists there in large quantities, it is not, however, of such haracter as to secure the exploiter, a reliable and constant supply. Emancipated from chattel slavery only a generation ago, it is not particularly strange that the negro yet sees in idleness and leisure a state of happiness. He has not had time to assimilate the idea that "work" in Itself is a thing to be desired, an idea that only takes root after several generations of wage slavery, and intermittent idleness, with its necessary adjuncts of want and suffering, have accustomed men to confuse the opportunity to work with the work itself.

Consequently those who have invested capital in the new cotton factories of the south now begin to discover thatstant employment in the new factories ticket, John Collins, is both a socialist the men employed at the Denby from ticket, John Collins, is both a socialist tand a member of a labor union, and his stand towards striking workingmen in case of election would be identically the same as that of the mayor of Marsellies.

Do you expect that Carter Harrison will take such a position? Do you remember how the "sympathy" you got from him during the recent lockout, joan manufacturer must reduce wages. It has not employment in the new factories at the fourteen at low wages, and the question now is how for gradicate this, in capitalistic eyes, criminal tendency. The Boston Transcript, in an editorial dealing with this subject, unwittingly exposes the intentions of the southern factory owners to be a combination ers to "emancipate" the colored race from "idleness and worthlessness."

Later on we may hear that the American manufacturer must reduce wages the constant labor supply of cotton mili

the constant labor supply of cotton mill operatives in the eastern states and the ncertainty of this commodity in the outh, and asks what will the southern manufacturers do when "the demand for labor is equal or greater than the supply of white workers." The danger which the capitalist anticipates from this condition of affairs is stated by the Transcript as follows: "Fhey (the white workers) will then have it in their power to insist upon the reforms for which they are at present agitating in a tentative way."

That is just where the trouble lies And in order to counteract the demands of the white workers, the southern capitalist is resolved to exercise his philanthropy by "helping in practical ways industrial education of the negro This is the solution of the industrial enigma, and as it is exactly the work of Booker T. Washington is doing, it explains the reason, why that educated decoy duck is persona grata to the southern capitalist. He is helping to the best of his ability to make efficient wage slaves of his race for the use of the new industrial capitalist, the successors of the slave holders of forty years ago, shaping and moulding from colored labor an instrument which can not only be used for cheaper production but which can be manipulated to pauperize and degrade the white workman by competition,

The fact that they are so careful to conceal their pilanthropy in this case arises not from modesty, as might be supposed, but from the recognition of the element of danger which its publication would entail in forcing upon the white workers what practically amounts to a choice between Socialism and slavery.

A WARNING APPARRITION

Now that the inexorable developmen of capitalist production has reached the point where the billion dollar, steel trust appears on the scene, the cham pions of vested interests begin to vaguely perceive the spectre of socialism from up on the political horizon as a possibility of the future, and here and there in the financial columns of the capitalist press it is broadly hinted that this latest and greatest combination of dapital, although immensely profitable from the present industrial point of view, may perhaps ultimately give an impetus to social and political upocav also which can only culminate in the destruction of the capitalist system which produced it.

The very nature of these comments is essentially capitalistic. In the imagination of the writers, the formation of certain combinations of capital, such as his place is with one of the old parties the new trust, which has caused these where he can whoop it up for reform predictions, is determined solely by the will of those who own and control the material elements which enter into its composition, and as a consequence the wiselum and expediency of forming them, is discussed, as if the capitalist class were mesters of industrial evolution instead of merely the puppets through, which it operates. And so the watchdogs of capitalist

> interests set up a warning how! against the menace, which they discern lurking in the shadow of the great trust But this warning will fall upon dea! ears. The necessity which understes and impels the capitalist class to pre pare the industrial conditions for collective ownership in the future is such that no amount of predictions of disaster can serve to stay its course for i moment. The concentration of indus try is inherent in capitalist production and even though every member of the ruling class were fully aware of the uttinfate tendency towards, socialism. they would be powerless to avert the consummation. The only resource left to the capitalist class to retain eco nomic supremacy seems to lie in a direct policy of repression, the political disfranchisement of the workers and the rule of the strong hand generally, have already determined upon the adoption of this policy.

LAYING ASIDE THE WASK

A general survey of the manner in which the subject of expansion is now being handled by the capitalist journals will unavoidably leave the impression that its advocates already consider the of concealing their real object under a mass of canting platitudes about the blessings of civilization, the elevation of inferior races, etc., etc., with which their columns were filled twelve months tues while deploring the deprayity of ago. Even "benevolent assimilation" seems to have outlived its usefulness in this respect and is now seldon met with. "Public opinion," which was set in motion three years ago by flag-waying demonstrations of patriotism and sentimental sorrowing for the woes of Cuba, is now being moulded to accept what has been done as cold "business" propositions, which must of necessity he considered.

Cuba was to be "free"-but now the 'best citizens" of that Island, the hostless men, the property owners, desirannexation, and we must reconsider the ituation. The sentimental outburst of patriotism and humanitarian generosity which drove the Spanlards from Cuba in 1858 was all very well, but now we understand that the question of freedom is an economic one-that business interests are after all predominant and that the future disposition of luba must be determined alone from that standpoint.

As regards the Philippines, the same easoning holds with the juxgiers of public opinion," and the justification

ceeds from the same duty" to these undeveloped peoples our mission as pioneers of civilization and the gospel are now being relegates to a secondary position. The most im portant fact in regard to these people and their territories that we now have to consider, is that here is an opportunity for the investment of capital that must not be neglected. It is notorious that there is now a plethera of capital seeking investment which cannot be used profitably within our national boundaries, but must seek ar outlet in other lands. It would be flying in the face of "providence," capltalist "providence," if we did not take the fullest advantage of the opportunity now offered and exploit it to the lutmost.

In this straightforward manner do the moulders of "public opinion" deal with these questions, justifying to the hill the reiterated statements of the So cialist press, since the first shot was fired against Spain down to the present The exponents of socialism have invariably maintained that the exigencie of capitalist society, alone necessitated the movement for expansion, and now every outspoken capitalist journal practically admits and emphasizes the correctness of the Socialist attitude.

The enormous concentration wealth in the hands of numerically small groups of capitalists has forced tha supremacy of what is known as 'business interests" into the foreground so prominently that it is not unnecessary to conceal these operations under a hypocritical cloak of mo rality any longer. Bryan has been de feated overwhelmingly, the howl of the "anti-imperialist" has sunk to a merpitiful whimper, the sentimental opposition to expansion has been silenced or ignored, and it is no longer, needful to advocate expansion by similar methods. The capitalist class feel themselves so entirely masters of the situation that they can now afford to discard so much of their hypocrisy as is no

This partial throwing off of the disguise will have the effect of making a perception of the class struggle more easy and distinct, and the point of attack upon which the Socialist press can analysis and exposure of the "we," in whose name the plundering classes still needs of the world's children.

There was an interesting session of the executive committee of the Socialist party of Chicago last Monday nigh at 36 North Clark street. The important matter that came up for con sideration was a statement of the party regarding socialist unity which Comrade Taft was delegated to draft at a preceding session of the committee. Th statement, after being discussed in all its phases was adopted substantially as Comrade Taft had submitted it. The statement is as follows:

"STATEMENT OF THE EXECUTIVE COMMITTEE OF THE SOCIALIST PARTY OF CHICAGO REGARDING UNITY

"In view of the fact that two of the three national boards of Socialist parties of this country have now under onsideration plans for the holding o a foint convention of all socialists, the ocialist Party of Chicago deems it wise to make the following statement of its position:

The act of participation in the c vention to be equivalent to a pledge to abide by its decisions, disunion among socialists thus ceasing with its No objection, however, can be had to the taking of 'a referendum the socialists there represented on alternative propositions submitted by the convention itself.

"Sixth-The Socialist Party of Chicago regards the holding of a joint so cialist convention under even imperfect conditions as preferable to the continuance of present disunion, believing tha the socialists of this country are already one in spirit and in principles and that the experience of working in common will bring harmony out of apparent differences.

In the second place, when the ministers declare that revivals cannot be held, they are nearer the truth than Mr. Farson, who denies the statement with a bet of \$1,000 cash. The cold figures of ecclesiastical statistics are on the side of the preachers, rather than on that of Mr. Farson. The old revivaliam does not revive. This is simply the truth about it, and honest men say so.

But why has the old evangelism failed? First, because the people are immossible task to put the entire. But why has the old evangelism failed? First, because the people are tired of a religion which makes them good or holy or saved while the rich that support it go through their pockats. Uncle Tom was a more valuable asset because of his religion. For this reason the irreligious capitalist gladly contributes to the support of religion today, because the wage laborer when saved gives seldom any trouble.

"In the next place, the people are institutively turning to the religion of brotherhood and a heaven on earth to be realized now. They are awaiting the evangelism that will announce a king-doff or government where men can go forth to be brothers. They are fungering for the co-operative ideal. An exciting scene occurred on Sun-tay last at the meeting of the Chicago An exciting scene occurred on Sunday last at the meeting of the Chicago Federation of Labor when the resolutions 'scoring' Sampson for his report upon Gunner Morgan's application for a commission in the naval service came up for discussion. Comrade John Collins seized the oppertunity to point out the futility of the proceedings, uraing the very evident fact that the workers have no concern with quarrels arising between the tools of the capitalist class who were all equally willing to found their weapons against the laborers however much they might winning monst themselies. To this one of the member of the capitalist class who were all equally willing to going to suppress it till after election, and then they will continue to help the service of the resolution rejoined that merit should always be recognized and that as Gennest inclined that merit along in the service of the reasolution of the standard of the capitalist to purify (?) The republican and democratic parties stand for the interests that demand the continuation of the present system of the private ownership of the means of life and the attendant increased breeding of vice and crim

The socialist points out that the interests of the workers do not demand the suppression of vice and crime, but the destruction of the conditions that make these things a possibility and a necessity. This can be done in only one way, namely, every woman and every man must have the right to work, not at degrading soul and body-breaking to work, and they must be able to control, own and dispose of their own product. In order to have this, we m have the collective ownership of the means of production and distribution by our class. To achieve this we must organize a party of our own class, put men of our own class, con clous as to the interest of our class, into nomination and elect them. SGIENCE AND THE WORKINGMEN

IGNIFIED and scientific as Lassalle's "Workingman's Programme" was, the Prussian government could not tolerate it, and brought him before the court to answer an indictment of having publicly incited the unpropertied classes to hatred and con-tempt of the propertied classes. "Science and the Workingmen' is the speech Lassalle made in his own defense. Here it is that Lassalle in language bold, and with a spirit of confidence and sincerity, assumes the dignified attitude of a champion of the workingmen. Undoubtedly the author is extravagant in his fluency, yet not for his personal defense, and his brilliant and systematic array of historic facts and philosophic deductions at once inspires the reader with a vision of a herald proclaiming

world-wide the cause of the workingmen. The distinct literary style of this work endows it with a special interest

and a desirable quality. PRESS COMMENTS

Mr. W. G. Bowdoin in the Brooolyn Citizen:

Casting aside all prejudices it is impossible not to be impressed with the fact that the larguage and feechings of Lassale, as revealed in the book new considered, have a sincerity of purpose and a manifest trend toward the uplifting of those whose cause be championed.

Capitalist Candidates Profess Love for the Workers.

"Friends of Labor" Get Flattering References from Union-Smashing "Business Men."

The capitalists have named their candidates for the mayoralty, but there ems to be some doubt whether they have the names right or not. A controversy has been started over the name of the republican nominee as to whether he should be called Hancey or Hennessy. Perhaps "Mr. Dooley" of ad" fame could throw some Archey ro · light on this vexed question, he having an intimate acquaintance of the latter name. At any rate we have our own opinion on the matter. By a most careful analysis of the evidence adduced, weighing minutely every point, and taking into consideration the present aspect of the political field, we have arived at the conclusion that the name of the republican nominee for mayor is neither Hancey nor Hennessy, but

As for Carter Harrison, that artful dodger, who attempts to guil the workingmen, by his pretended friendship, his name is Demagogue. The latest service he has performed for the workers consists in discarding a labor misleader in favor of his own protege, who possesses no other qualification than being the son of a millionaire. Insincere, trivial, lying and hypocritical, his name would be Mud if the workingmen did their duty to themselves by voting for John Collins, the socialist candidate, who is in reality one of their class.

Hancey, or Hennessy or whatever his ame may be, opens his campaign by stating that the continuance of Harrison in office is a menace to "society," meaning thereby the interests of "prop-Harrison defends himself by appealing for and receiving the indersement of a long list of "business men," in which list the following names appear: O. W. Norton, of May-wood, can manufacturer; C. Mandel, of Mandel Brothers; E. Hillman, de partment store; Barnheisel, president of the H. H. Kohisaat Co.; Conover, secretary of Hibbard, Spencer, Bartlett & Co.: D. Mayer, department store, along with a large list of building contractors in the city, these who ed out the building trades workmen for an entire year. Other skinners of labor also come to the rescue, and er their signatures give evidence that Harrison has been true to THEIR and that they are willing to entrust him with THEIR interests for another term. In this list may be found scores of names of those who have always been the deadlest eneof organized labor in Chicago, and yet this charlatan Harrison has unspeakable gall to pose as a "friend of labor" and ask the laborers to elect him to office with their votes

We appeal to the ordinary commo sense of the members of labor organi-zations to consider this matter. If those mentioned in the above list con-THEIR interests safe in the hands of Carter Harrison, how about Harrison, and they are right in doing so. He protected their interests with his police, and has earned their in-

Harvison, has secured the alder-sic nomination for the Twenty-first

ons of their fathers. But Honore is decidedly the son of his mother, and his political-sponsor, Carter Harrison gives an interesting account of how he conferred with this "society" dame on the political future of her son. There are many atractions about this young man that should induce the voters of the Twenty-first ward to elect him. The ward contains many Irieh voters who YOUNG HONORE' IN TRAINING will doubtless find much gratification in hustling for the son of a woman who was recently presented at the court of Queen Victoria, and got down on her knees before that figurehead of the might majesty and dominion of the British empire, which Irishmen so much admire and love. But Robert Emmett Burke (mark the name) and James Aloysius Quin have stepped into the breach and overborne all opposition and the Hibernian Dolan retires in favor of the aspiring young politician, those mamma was presented at the court of St. James.

> But it must not be suposed that an aldermanic nomination on the democratic ticket is easy to secure, even if Mrs. Potter Palmer's fledgeling succeeded in appropriating the coveted prize. Mr. Gubbins, president of the International Bricklayers' union, it seems had political aspirations in the same direction, which were very properly squelched. A workingman, or one who holds an official position of trust in a workingman's organization, who seeks to dabble in capitalist politics, should meet with disappointment. It will not be long before the workingmen will realize that faithful service on the part of their officials cannot be performed in the-slime of capitalist politics. What the republicans and democrats have to offer workingmen in the guise of political office is at best only corrupting.

Many things are now happening abroad which have a direct application to the local situation here, so far as Marseilles are out on a strike, and since they didn't ask for enough at first, and have since remedied this oversight by enlarging their demands. The party who occupies the mayoral chair in Marseilles is not a "friend of labor" of the Harrison stripe. Not on your life, a man from the ranks of organfeed labor itself, a member of the dock laborers' union in that city, and a sotalist also. He didn't receive the indorsement of the strike-breaking capiitalists of Marseilles, but was placed in the mayorle office by the ballots of the workingmen of that city, and he is he does it, too. There is one candidate for the mayoralty in Chicago, who stands upon exactly the same ground as the mayor of Marscilles. His name is John Collins, and he is the nomine of the workingmen of Chicago-not of the capitalists, their enemies. He is a workingman who knows that his class have only themselves to depend on for better material conditions, and the eoffice is fully as capable of exercising the powers vested in him to aid strik ing workmen, as is the mayor of Marscilles.

"Trade is being driven away from Marseilles," says the capitalist press That is to say, that ships that cannot be unloaded there have to go to other ports. The "World" Will Use You Well If You Do Your Part,

Remarks on a Familiar Inquiry Used by Workingmen as a Salutation.

"How is the world using you?" Hardv a day passes but what every man is ecosted in these words, and they are generally answered in an off-handed manner. But this is a question, which, being often asked, ought to be thought about more than it is.

What is meant when this question is treasures, its wealth of material for human happiness, its varying seasons recurring regularly every year?

If that is what is meant, you surely in abundance to comfort every human inhabitant. Its soil, fertilized by nature's rain and air and sunshine, is the application to it of intelligent labor This is a fact which we take for granted and which no one will deny.

Then, certainly, the earth is not meant when this question is asked. What is meant is rather as to how you are being used in the distribution of the goods of the world. Sometimes, if you are one of the unemployed, it might mean as to whether you are being al lowed to take any part in the labor necessary to get practical use out of what organized Mbor and its political stand the earth contains. If you are not, it is are concerned. The dock laborers of not because you are unwilling, for you surely appreciate the comforts necesstriking, they have discovered that sary to withstand the cold of winter, and that they can be gathered in sun mer, and the comforts necessary in case of sickness and those which prevent occasions for sickness, and you are willing to labor to possess all of them. The system of running the affairs of the world, however, seems to be working against a great many people, whilst a few are simply "dirty" riches. Ah, there is the point. Although you are hard pressed to get along are by turn worked to the breaking point and then out of work altogether, and all the while worried for there to look after their interests, and the future, both for yourselves and for your children, others are making a nockery of your straits by the display of riches, a small fraction of which might mean life instead of starvation to those dear to you.

The people who do the work of the world fare worst in the distribution of the products which their work brings forth. They strike and are hounded. They petition and are locked out. They works and when that work has pro-duced more than their labor will buy, they are discharged. Their necessity thus caused is selzed upon by some capitalist who gets their labor cheap. This causes competition in other coun The capitalists there are disturbed. They have united workmen to deal with and cannot cut down wages without trouble. That until a way is found to provide these things for all members of society in less fime so as to leave considerable leisure for everyone, we can have no time to use our liberty; that to be entitled to a thing and yet be deprived of the use of it is a case of "allenated" liberty.

But it is not our postulates that give on-Socialists the most trouble. They can generally understand these. What bothers them is our paradoxes. A paradox is the opposite of a postulate, it is a proposition which instead of being self-evident, appears to be self-contradictory, but yet is true in fact. For example, we say we are for all the peo ple, yet we favor the labor class alone Because this class can and should include all. All should get into

We oppose class struggles; therefore we say the labor class should rise and overthrow all other classes. Why? So that by one final class struggle all such struggles in the future will become im-

So that by giving the people direct control of themselves without the interven tion of a hostile governing class stand ing apart from the people, a continual state of peaceful revolution by law may be made possible. This was contemplated by Jefferson and some of his associates, but ingenious constitutional limitations have defeated it and enable the capitalists to beast that the present system cannot be changed until human nature, (i. e., THEIR human nature)

From Polish Comrades

The central committee of the Social-ist party of Chicago have received the following communication from the exer-utive committee of the Polish Socialist Alliance, which it was decided to pub-lish in the Workers Call, with the reply of the central committee immediately appended:

"Chicago, March 7, 1991.

"Dear Comrades—The disruption in the ranks of the S. L. In support of the above resolutions we would like to add a few words that will show that they will not only not injure socialism, but that, on the contrary, the execution of these resolutions will cause more rapid spread of our ideas and have a beneficial result for socialism in America.

"It is well known that the Polish people, among whom we have had to work and agitate, does not speak or understand English, and that, what is partially the consequence of it, their cultural life and interests are entirely different from that of the rest of the American people. "We have to struggle not only with the corruptive influence of the two capitalist parties, but there remain for us yet the not less corruptive and reactionary home influences of the priests, little bourceois, etc., whose influence on the every-day life of the Polish worker is much stronger yet, because the language they speak, the interests they represent, are more comprehensible to him, and, being based dopon tradition, casily kindle his imagination.

whose members act in perfect concord and are not weakened by internal dissentions.

"This work imperatively demands our utmost exertions, which express themselves not only in the constantly increasing volume of personal services of many of our members, but also in the amount of money expended.

"We publish a weekly paper, arrangemeetings, distribute socialist literature and try to arouse life and consciousness in many other directions.

"That under such circumstances we are not able to financially support our comrades from the other American parties, and that only with the greatest difficulty we succeed in making both ends, meet, we think that our present non-paying of the organization dues, should not react upon your sentiments towards us and in no way injure the amicable relations that have single towards us and in no way injure the amicable relations that have single serviced between us and the rest of the American socialists.

Election Tactics.

Editor Workers' Call-In the issue o

Editor Workers' Call—In the issue of The Workers' Call of two weeks agg Collected Taft, after giving a splendid analysis of the Socialist vote in this city last November, draws the conclusion that we should concentrate the strength of the party on certain selected wards in order that we may be able to elect an alderman.

Comrade Taft, it appears to me, gives no good reason why the party should adopt her suggestion. How the election of an alderman would be of such an advantage to the cause of socialism I cannot perceive. Whether it is possible to do so is rot the point I wish to diguiss. The question is whether the taotics suggested are appropriate and whether such a departure from our usual course of proceedure in making propaganda would be offset even if the desired object were attained. I think not, and believe I have good reasons for so thinking. for so thinking.
It must be apparent that the election

It must be apparent that the election of one or even two socialist addermen to a chamber containing seventy could not be expected to make much differences so far as the passing of ordinancs benefiting the working class are concerned. These solitary individuals would have practically no influence whatever in the council chamber, and save as they threw their votes towards one or other of the political factions, their presence would be absolutely unfeit.

Comrade Taft quotes Haverhill as an example and states that the election of an alderman there was the opening wedge. Now let us be candid. What did the aidermen and mayor of Haverhill accomplish? Practically nothing.
Mayer Chase told us his story in the Central Music Hall. It dealt mainly with a struggle to obtain cheap gas, etc., etc., and was rather interesting to me at least) in showing the source and extent of the power with which the socialists had to contend, and the necessity of diffusing the leaven of socialism throughout the entire mass instead of concentrating it upon one localism.

It wouldn't hurt Harrison's prospects if he were obliged to swing his veto freely during the same and the necessity.

And in Payerhill, there are not the socialism of the were obliged to swing his veto freely during the same and the necessity of diffusing the leaven of socialism throughout the entire mass instead of concentrating it upon one localism.

stead of concentrating it upon one lo-cality.

And in Faverhill, there are only a total of five or six aldermen, I forget which. We had the mayor also, and yet results were practically nil. How much less could one alderman accom-pilsh here amongst 69 representatives of capitalism and a capitalist mayor to beet?

of capitalism and a capitalist mayor to beet?

What could he do? Introduce bills. Yes, he could—hundreds of them—bit what would become of them? He could make speeches. Yes, but who would no bish them? The capitalist papers? No. Socialist papers? Yes. But the socialist papers circulate already amongst those who know what they want. I am of the opinion that when we do elect an alderman in this city, the socialist vote will be at least five-fold what it is now, and I believe that even then not much will result from it. But forty thousand votes are a better background than eight, and I would consider the election of an alderman now to be premature, even if possible.

It seems to me that encouragement or iscouragement over the results of an iection have no place in the mind of a ocialist. Those who do not vote for socialist. Those who do not vote for acclaim on the pretense that they are throwing their votes away are simply foolish, and they will not vote for socialism until conditions force them to do so. We want the votes of men who know what they want, and not the yotes of those who want to be on the winning side. Our work is a work of education that must perforce take a political form, but differs essentially frem being the same form of political movement as those conducted by the capitalist parties. Our chief work is to point out to the working class the conditions that exist now, to show them in what way industrial development is rending and to prepare a great army of workers to a consciousness of their historic mission as capitalist society decays. We are not here to capture jobs, to engage in the spoils of office, or even to elect isolated socialists here and there.

Why then do we go to the ballot box?

to elect isolated socialists here and there.

Why then do we go to the ballot box?
To ORGANIZE openly. To show that a great army of militant socialist workingmen are gathering to do their DUTY. These men cannot possibly know each other by word or mouth, but they can be registered at the ballot, and when they are needed we will know just how many we are and where we are situated.

There may be more reasons for using the ballot, but to me it is principally an instrument by which we can count heads and thereby learn what progress we are making. What is the working class to-day? Nothing. What would they be? Everything How can they accomplish this by electing an alternan?

No let them discover that they are

But universal suffrage is unjusti limited by the fact that the electors of the first four classes, after voting in cast a second vote in the fifth class.

In Bohemia the election lists have ben the objects of the most flagrant violations. This short description openly reveals the fact that the Austrian election law assumes a manifestly unfair attitud toward the working class of the cities and the industrial centers. Incontestably, their representation is forced down to a level of fumerical inferiority. Especially in Bohemia in Syris and in Poland the question of national differences has reached the point of a most acute crisis. At a certain time no so long ago this was so serious that the - national sentiments even outweighed the international senting of the socialists. This was notably the of 1897. But since then, thanks to the transformation of the first party orthe Social Democracy has doubled the cape of division. Ever since its unity is Under these difficult conditions the

During the election of 1897 the social ists concentrated their strength princi pally on Vienna and Bohemia, Fourteen of these candidates penetrated into the reichsrath, seven of them coming from Bohemiz, and five from Czech Provinces. In Vienna, although beater by the Christian Socialist demagogues they nevertheless received no less than 90,000 votes against 120,000 of their opconents. In the fifth class, they ob ained a total or 503,600 votes.

The fraternal understanding existing between the different sections of Austrian socialists, the marked prog ress of the organization and their press the new tactics solving the problem of nationalism by federalism, added to these factors the loss of conidence suffered by the conservative and demagogic parties in consequence of their violent language and odious be havior in parliament - all this should have contributed to the succes of the socialist candidates. nomic System which Makes War a Necessity.

Two years ago a "peace conference vas held at The Hague in response to a tocrat of all the Presias. It was at nded by some of the most prominent men of all countries. Discussions were held, and over and over again the hall rang with the eloquence of the men of peace. Schemes for disarmament and discussed, and finally dismissed. Everyne was vibrating with emotion in expectation of the coming solution of the world's greatest problem. And then the back to their respective countries.

Great sending a mighty army to shoot "peace into the burghers of the South African epublicas, while the free and liberty loving citizens of these United States ent thirteen-inch' cannon to celebrate the triumph of "peace" in the Philippines. And to-day the representative of nations which were foremost in the farce enacted at The Hague, are busily engaged in establishing the regime of 'peace" in China by removing the heads of Chinese officials as a guaran tee for "peace." And on the last day of the year 1900

the whole "civflized" world celebrated the passing away of the most marvellous century the world has ever seer and the great writers in thousands of reagazines and journals expressed the n what they called the "progress of manity." which they evidently identified with the continuance of capitalism, ignoring the fact that such progress is of necessity accompanied by poverty, crime and war. When they alluded to humanity they meant the capitalist class alone, and no doubt aw in the great international commer cial trusts and combinations a prospec of peace amongst the real rulers of the earth. As Karl Marx wrote, "the executive of the modern state is but the omnittee for managing the comn affairs of the whole bourgoisle," so to day is it with the different national governments. They are but the tools of the capitalist class and may perhap find a common basis in exploiting the proletariat without regard to nation

Could Force Recognition.

The anthracite coal operators have given notice that the wage scale adopted last November is to remain in force during the present year. It is suited that they have so decided in effect to avoid a conference with the representatives of the labor organizations in the coal mining industry. These capitalists know their business. They don't want to recognize the organizations of the workers, and yet the latter appeal to the organized capitalists for recognition. This is the result of vorting the wrong way. Workingmen in Pennsylvania have it in their power to elect every executive officer in the state. They could elect a majority of the legislators and the judges and could by the possession of these powers, actually place the organizations of the bosses outside the law, and established for themselves such material conditions of life as their necessities require. But on election day they hand this power over to the ensemy, and having written themselves down as foois, as a for consideration as men. They said get what they deserve, after all.

SGIENCE AND THE WORKINGMEN

IGNIFIED and scientific as Lassalle's "Workingman's Programme" was, the Prussian government could not tolerate it, and brought him before the court to answer an indictment of having publicly incited the unpropertied classes to hatred and contempt of the propertied classes. "Science and the Workingmen' is the speech Lassalle made in his own defense. Here it is that Lassalle in language bold, and with a spirit of confidence and sincerity, assumes the dignified attitude of a champion of the workingmen. Undoubtedly the author is extravagant in his fluency, yet not for his personal defense, and his brilliant and systematic array of historic facts and philosophic deduc-

From the present outlook it would eem that the Harrison forces are in The hall was afterwards cleared for rather sore straits, and, strange to say, not that they are in fear of defeat, but self as only socialists can. At 12 p. m. that their victory may be too over-the company dispersed, thus bringing whelming. Next to a defeat, the thing that the average capitalist politician does not want is a too easy triumph. The pretence of a contest must be maintained, the mystification, humbug and hurrah of a campaign must be dinned into the ears of the voters, for to let things go as they are, and secure office as easily as plucking a ripe fruit from a tree, would tend to set many people thinking that the amount of Harrison's majority was not after all such an important matter. One of the most reliable methods of distracting the attention of the workingmen from the things that concern them, is to make plenty of noise and maintain the delusion of the closeness and importance of the conflict between the capitalist candidates.

> Just here we might call the attention of the striking pressmen to the fact that none of the papers who are scabing it on them are supporting the can-didacy of John Collins for mayor. It would be advantageous to the pressme to consider what this means and supplement the justice of their strike by casting a vote which will enforce and fortify the justice they are seeking. This can only be done by voting the ticket of the Socialist party, headed

> The daily press and the Municipal Voters' League, both of which are merely expressions of the class interests of capitalism, are attempting to make the public believe that the asertion of the city traction companies that their franchises have still 50 or more to run, amounts to nothing. If either Harrison or Hancey be elected the council may go through the form of extending the franchise for 20 years, but if it should prove obdurate and refuse to pass measures satisfac tory to the street railway companies the supreme court of the state can b relied upon to do the work for which they have been elected—that is, to austain the demands made by the capitalist class upon the people. Harrison is for municipal ownership after 29 years. this question will vote either for him or his opponent on the republican ticket. Those who want a municipal own of a farce, will vote for the candidate of the Socialist party, John Collins,

On the question of franchises in the present campaign, the Municipal Vot-ers' League has formulated a piedge which they will exact from candi-dates for office. There is little dates for office. There is little doubt but that the majority of candiintend to keep it or not. It is a docu nent which appeared in every daily paper in the city and should be read arefully by every workingman. Not ne item concerning the interests of the ng wages, no proposal for shorter lours of labor, nothing but an attemp mands. IMPORTANT NOTICE.

They Can Now Sav How the City To the Members of the Socialist Party:

Comrades-We have filed a city tick et, six town tickets and aldermanitickets in twenty-six wards. Our ticke will appear on the official ballot under the caption, SOCIALIST PARTY.

You are no doubt well aware that w oust fight hard for everything we get, and if we want to have the votes cast for the SOCIALIST PARTY, YOU, the comrades of the party who have been delegated for that purpose, must go to the polling places in your respective wards on April 2d, at 3:45 p, m. and present the proper credentials to the oper officials in charge, and REMAIN UNTIL EACH AND EVERY VOTE CAST FOR THE SOCIALIST PARTY OR ANY OF ITS CANDIDATES IS streets, 8 p. m., State street, in front PROPERLY COUNTED and MARKED of Rotlischilds, all day, Western ave-UPON THE OFFICIAL TALLY SHEET.

In carrying out your duties as watch ers, do not touch any of the ballots and give no offense to any one in the polling booths. Attend strictly to the business of seeing that the vote of the SOCIALIST PARTY is counted and placed upon the tally sheets.

The secretary of your ward branch will supply you with the requisite credentials and badge of a watcher.

Branch secretaries will take notice that Organizer August Kienke will send o'clock. The Ninth and Tenth ward them a letter of information on this subject. They will also hereby take no tice that they are requested to call a special meeting of their ward branches AT ONCE to arrange this matter of credentials without delay.

After this meeting, or before it, if possible, send word to the organizer at 36 N. Clark street, stating how many watchers' budges and blanks your branch can use. This matter must ON NO ACCOUNT be delayed.

Remember, if we are to get our vote counted, the party members must be on hand to see that it is counted. We cannot expect the representatives of the capitalist candidates to count the votes of the SOCIALIST PARTY.

Comrades, actions speak louder than words. Let us get to work and do for ourselves what we cannot and must not leave to others.

Fraternally, THE EXECUTIVE COMMITTEE.

Hancey says "he believes in recognizing the dif. United States will take no part in the to get a drink when and where they please." Who said our liberties were in danger if Hancey becomes mayor? He will recognize all nationalities and PERMIT them to get a drink.! Isn't has been sent to emphasize the necesthat enough in itself to fetch the vote of any laboring man?

But the injuities of Carter Harrison are eloquently depicted by Hancey Pan't Carter levying blackmall on inoffensive saloonkeepers and threatening their licenses if they don't hang his lithograph in their windows? Why, it is plain from this that it is Harrison and not Hancey who wished to close the saloons: it is the villain Harrison who will not permit all nationalities to exercise the privilege of free men-in getting a drink.

But the question of "What has Harrion done for labor" is not a subject which Hanecy delights to dwell upon at any length. He might, of course, charge that Harrison had instructed the police to break the heads of the union men who were picketing the buildings last year where sonb labor was employed. He might allude to the instructions which his opponent gave to the justices as to the "full limit of the law," or he might recall to the cun parade of the olice under Hares-on's orders, and his friendship for the

None of the capitalist candidates dar pen their mouths upon these matters for they understand only too well the nature of the game to be played. The "talks to union men" will embrace everything with which the latter are unoncerned, and avoid everything with which they are for the ignorance of "laboring men" upon their interests as a class, is the best bower of both Hanecy and Harrison.

So when Hancey insists that Harrison has "done nothing for labor," and the latter retorts with a similar charge against Hanecy, both may be safely believed, and the "laboring man", who is not utterly devoid of understanding may easily see that both these people neutralize each other. When this conclusion has been reached, his attention might be drawn to the fact that, if the "laboring man" is unwilling to do anything for himself, it is certainly not the ousiness of either Harrison or Hanecy to help him. And when he has grasped the necessity of independent political Just at present the "laboring man" is action on the part of his class, the claim of the candidate of the Socialist party, John Collins, to his vote might be appropriately introduced. SMAP SHOTS BY THE WAYSIDE.

Wages are rising; there is no of it. Last week it was announced that one Schwab had received a raise from his employers, the United States Iron and Steel Co. (the trust).

etermined that Schwab should have \$1,000,000 per annum for the present Unlike most employers, they also delared that he was was worth all he was to receive-that, in fact, he would "earn" every penny of it.

Mr. J. Pierpont Morgan informed his partners that Schwab could make \$5,000,000 per annum for the company. How? By producing finished articles in iron and steel?

No. By consolidating the differen offices and eliminating useless employes, by applying the most improved ethods of production and dispensing with as many individual workers as possible. By these methods \$5,000,000 in wages could be "saved" which would appear as dividends to the idle and eless stockholders. But what about those whose wages will have been saved" by this process? How about the office help who will now be looking for a job, and the skilled mechanics who have been displaced by the more general application of improved meth-ods? They will enroll themselves in the army of the unemployed, and most of them will ultimately find employment elsewhere, which will almost certainly be less remunerative than the position from which they have been ousted.

But before this happens and while they are still searching for employment the majority of them will have ample leigure to read in the capitalist press the unmistakable evidences of prosper ity, as illustrated by the increased sizof dividends declared by the steel trust.

And this will compel at least some of ose whose wages have been "sayed" to think the matter over and recognize he existence of classes with antagonis tic interests, and that the natural channel for the expression of this hostility is through the ballot box.

Andrew Carnegie will no doubt be much interested in the efficient work of Schwab, and he may perhaps figure out how many more libraries he could have "donated" if he had in his service such an accomplished "wage saver" as

Schwab is to have a yearly remuner ation of \$1,000,000, and for this sum he is expected to "save" \$5,000,000 for his for the capitalists whether they pay \$1 or \$1,000,000, so long as they get fourfifths of the total swag. And they will get it, until the workers who produce it all, awake to a knowledge of their class interests and unite politically to enforce them.

Governor Wells of Utah has vetoed he amendment to the proposed bill which would render plural marriages exempt from legal proceedings against hose contracting them, and every sniv elling hypocritical capitalist fourna expresses the greatest possible satisfaction over this triumph of "virtue." So the old established principle of doned when no longer attractive, still survives. It's cheaper, and more in harmony with existing property rela

Editor The Workers' Call:

Dear Comrades—Did you ever hear of such a thing as a lot of trades unions putting their heads together and nominating candidates for office and getting out on election day and "legging" for them? Well, such a thing has just happened; right here in this prosaic old town of Des Molnes. The carpenters and the printers rightly thought that their crafts would be better treated by the school board if they had some of their own men on the board. Accordingly, they got several other unions to join with them in holding a convention and putting up two candidates for director, one a carpenter and the other a printer. Messrs. H. U. Keasey and H. J. Kelland. A committee was appointed to take charge of the campaign, and it did so with ability and push. Circulars were/sent out by the thousand calling the ditention of the workingmen to the fact that their class was entitled to and ought to have representation on the school board. Some thirty or forty workingmen volunteered to lose their day's work on election day in order to work at the polls. Of course the labor ticket was handicappead for want of a campaign fund. There was not sufficient money to hire carriages to transport voters to the polls and to watch the poll books in order to check up those who had voted. As was to be expected in their first trial, they lost the election. The highest vote for the opposition was 1.822. The highest vote for election. The highest vote for the oppo-sition was 1,822. The highest vote for the labor ticket was 1,123. On election the labor, ticket was 1,123. On election night returns were received at the Trades and Labor Asembly Hall. Think of that! Who will say again that the workingmen are not becoming class conscious and waking up to the fact that they must get into politics in their first campaign, it is safe to say that the next time they try it the Des Moines tollers will make a clean sweep. Such fine schooling in class-conscious pease ought to be very encouraging to the socialist comrades the country over.

JOHN W. WORK.

ANSWERS TO CORRESPONDENTS.

S. Finver—What is known as the "fron law of wages" was enunciated first by Ricardo, a political economist of the early part of the last century. Briefly stated, it is as follows: The prices of products are regulated by the cost of production. Wages, therefore, are the cost of production of the laborer—that is to say, the minimum cost of his means of subsistence—food, clothing, shelter, etc.,etc." This theory opposed the older one that wages were regulated by "the law of supply and demand." The iron law of supply and demand." The iron law of wages" is generally accepted by socialists in the main, but it is not recognized as being as absolutely rigid and inflexible, as the term "iron" would imply. Different standards of living in different countries affect it considerably, and the measure of success which has attended the efforts of labor unions and organizations in maintaining and raising wages, show also that a certain latitude exists in the wage system. Most socialists would qualify Ricardo's law by stating that under the capitalist mode of production wages CONSTANTLY TEND towards this minimum, that is, the cost of production of the laborer. This so-called "iron law" is not looked upon socialists as a statement of very great importance, as it has since been superseded by the Marxian theory, which not only modified it as above S. Finver-What is known as the great importance, as it has since been superseded by the Marxian theory, which not only modified it as above stated, but added also the concept of "surplus value," which was then fully worked out for the first time. The pamphlet, "What is Capital," by Ferdinand Lasalle, will give you considerable information on this subject. It can be procured for 5 cents from Kerr & Co., 56 Fifth avenue, this city, or the international Pub. Co., 23 Duane street, New York city.

They're strong enough the web of life to rend."

"Earth holds no spot in all her wide domintons, For us, of life's great blessings dispossessed, But Death's dark dwellings offer us a refuge; In them is room, in them is endless rest."

Hear the cry of the forty thousand, distaherited sons of men; Dreary direc of despair and horror; listen, brothers, yet once again— 'we'tis Yraught with sin'ster meaning—caust interpret it, trusty pen?

VIII

IX "And yet, why should we die? 'Twill serve no purpose— Why, rather, should we not resolve to live?' Can we not take RY FORCE the world'. Sets treasures, Seize and hold all, since naught to us 'twill give?'

"They will not let us? Ha! we shall not ask them,
We are the many—millions from all lands
O'er mountain peak, drear plain, and storm-tossed ocean
Reach forth to us their strong fraternal hands.

"The very air we're breathing now is haunted
By wolfish eyes where hate and hunger glean
So, ere we die, we'll strew the world with corpses,
And dye with blood full many a crystal stream.

"Have we not done it in the years long vanished?

Have ye forgotten France and what was sees
In that fair land whose soil gave birth to freedo
Where tyrants fell beneath the guilletine?

"Twas not in vain that glorious uprising—
"Twill serve to guide us on our onward way;
"The dogs of war' in ev'ry land are 'howling'—
No power on earth the people's course can stay."

Hear the cry of the forty thousand! Loud and louder its echoes ring! Gone for aye is its mouraful cadence; men and women and children sing— Sing and shout, but the world will shudder over deeds from such songs will spring.

"Aye! we will live—now suicide were treason,
And on the sweets of vengeance will we feast;
For torch and axe and dynamite and cannon
Shall rid the world of plutocrat and priest.

"The lesson they have taught us will we practice,
The mercy they have shown us will we show;
We will not turn our cheek unto the smiter,
Nor give a kiss where we've received a blow.

XVI. "What is't ye say? The rich have standing armies— We shall be food for powder, shot and shell? Well, let them come, but ere they can o'erpower us We'll send whole legions of their tribe to hell.

"Down to the dust we'll rase each marble palace
And make great bonfires of their works of artTheir temples grand, where gold, not God, is worst
(The rich and poor, as elsewhere far apart). XVIII

"All—all shall go that marks the present order.

We will not 'scotch' the serpent now, but kill!
And from the wreck and universal chaos
Create a world, newfashioned, to our will. XIX

"And death at last to all mankind's appointed.
So hetter far to die as heroes die
Than linger on and wait the flend Starvation,
Who even now is swiftly drawing nigh."

Hear these cries of thy maddened children. Thou who'rt worshiped as God alone. Forshiped by men and the hosts of heaven, crowned with light on Thygreat, while throne. Theil this tempest of blood and terror: Nay! we cry to a god of stone.

"What can we lose, then, save a life of torture.

E'en if our cause should be foredoomed to fail?
But fail we will not-vict'ry lies before usThe gates of hell 'gainst us shall not prevail.

XXI "And, listen yet, a secret word we'd whisper: The standing armies of our foes are mer a like ourselves, with human hearts and passions. And they'll REFUSE TO SHOOT THEIR BRETHREN THEN.

"O, yes, 'tils true: We know whereof we're speaking— Revoit and mutiny are in the air; They'll be our armies when the hour approaches, And Mammon's slaves shall grove! in despair.

XXIII reed be the eye that then shall beam with pity, Cursed be the tongue imploring us to spare, g those who dare to prate to us of mercy Of our swift vengeance must themselves beware."

Very we heard them. O, men and brothers? Hast thou heard them my sister fair? Timb the gens on thy snowy bosom, blood-red rubies setors thy hair; But they snear if, the forty thousand, "Blood-red drops soon shall trickle there?" XXIV

"But see, O, see! Whence aprings this light supernal"
What voice divine doth thrill the 'ambient air'
The Angel, Hope, hath spread her snowy pinions
And zillied the tones of vengeance and despair.

peaks: "O, friends! what mean these cries of fury! hese vergeful words surcharged with blood and flame? rethren, dear, are ye then no more human, hat kindred ties have on your bearts no claim?

XXVII

Who've reared proud mansions which they may not e Planted great vineyards of whose inscious fruits They may not taste, but, housed and fed like cattle, They live the lives and die the death of brutes.

XXVIII "They weave soft fabrics for the rich and idle,
Mine gold and gems to form their jewels rare.
And, like yourselves, know oft the pangs of hunger.
While pampered mentals have rich food to spare.

Aid these, brothers, O. Forty Thousand! They are with you, they feel your wrongs. Labor's legions are marching onward—strong indeed are the gathering throngs. Join your forces and work together, claim the earth which to you belongs!

"Yes, yours the task to work out your salvation,"
With fear and trembing? No, with hearts aglow,
Who feared and trembied never yet succeeded;
Great deeds, brave actions, from strong courage flow.

XXX "Hearken, O, Brothers, to the word I utter— This is no work for each to do alone, For to himself be sure that 'no man liveth' So no man's life is his to call his own.

XXXI

"Since this is true, ye all must band together;
One heart, one soul, the law of love demands
Yet this great heart must be all pure and holy,
Nor spot ensanguined stain your helpful hands.

XXXII "Ye are the builders of the coming city,
Which poets call "The City of the Light,"
This home of horror where ye now are dwelling
They well have named the realm of dreadful night."

· xxxIII "For all your sorrows spring from false conditions.

Which ye today are called upon to change;

Change them by bullets? No, by BALLOTS, Brothers—
These words are true, the seeming cold and strange."

This is the call to the forty thousand, this is the message which hope proclaims. Hear it and heed it. O. men and brothers! Feel its spirit in all your aims.—
Then your lives shall be filled with glory—all the world shall revere your names.

XXXIV

"'A ballot? Pahaw! A filmsy bit of paper!'

Despise it not—its still, small voice can drown
The roar of cannon—all the din of battle,
Can throttle kings and topple empires down.

XXXV

"The deadly bonib, the torch, assassin's dagger— Not these the weapons for the coming time; They held full sway in past barbaric ages, But shall not mar your destiny sublime.

XXXVI

"No man shall claim what all must hold in common; Our joint inheritance, the earth, shall yield To all her children who together labor The fruits of toil from forest, farm and field.

XXXVII "From out all lands the landlord shall be banished,
And forced like other men to earn his bread,
Whereas he lives te-day on others labor,
Nor deigns the soil he wrongly holds to tread.

"The mines which hold the wealth of all the ages,
(Dame Nature's treasures, an exhaustless hoard),
Of which to-day the tollers are defrauded
By private greed, shall be to them restored."

Hear the shouts of the forty thousand! List to their glad exultant cry:
"Angel of Hope, we greet thy coming—our redemption is drawing nigh!"
Light springs up in the coon darkness, hall the dayspring which beams on high!" XXXXIX

"Claim next the tools, the great machines which Labor To-day requires to supplement her skill, In private hands for private gain now centered, These must be yours to execute your will.

"No man is free who's forced to work for wages;
WHO OWNS THE LABOR OWNS THE LABORER, TOO—
Labor is life—the principle of being;
Existence means the right to be and do.

XLI

"O, men! Brave heralds of the human era,
Which all signs show is surely now at hand,
Rejoice, be glad, for in that hour triumphant,
Wage-slavery's power shall cease in ev'ry land,

XLU "Then shall ye grasp Humanity's fruition,
Then 'reap in joy' what ye have sown in tears,'
The morning stars and ye shall sing together
Love's own immortal 'music of the spheres.'

XLIII "Lift up your heads. O gates of pearl and jasper!
Lift, Lift your heads ye everlasting doors,
That man may enter Freedom's holy Temple.
And tread with awe her opalescent floors."

Hear the cry of the forty thousand: "Ah! Our struggles were not in vain!
Fell Injustice, so long triumphant, now is vanquished and error stain.
Hall the dawn of the human era, Joy and Peace o'er the earth shall rebyn!"

Great Premium Offer

It is with pleasure that the Workers' Call announces to its friends and pat-ons that it has completed arrangements with one of the largest Socialist pub-ishing houses in the country, whereby it has obtained a quantity of the best socialist books published in the English language to be given as premiums socialist books jubilished in the English language to be given as premiums to its subscription hustlers. The terms upon which these books have been obtained make it possible for us to extend to active workers the best premium offer that has ever been made by a Socialist publication. The books which we offer are the very cream of Socialist literature, and should be in the home of every active comrade. With a little hustling—in a good cause—it is possible for every comrade to obtain them free of cost. This remarkable offer is as

Address. The Chicago School of Social Economy,

The present number is SGIENCE AND THE WORKINGMEN

IGNIFIED and scientific as Lassalle's "Workingman's Programme" was, the Prussian government could not tolerate it, and brought him before the court to answer an indictment of having publicly incited the unpropertied classes to hatred and con-the propertied classes. "Science and the Workingmen" is the speech Lassalle made in his own defense. Here it is that Lassalle in language bold, and with a spirit of confidence and sincerity, assumes the dignified attitude of a champion of the workingmen. Undoubtedly the author is extravagant in his fluency, yet not for his personal defense, and his brilliant and systematic array of historic facts and philosophic deductions at once inspires the reader with a vision of a herald proclaiming

world-wide the cause of the workingmen. The distinct literary style of this work endows it with a special interest and a desirable quality.

POLITICAL TRICK FRUSTRATED

Harrison Intrudes and Audience Files Out Cheering for the Socialist Party Candidate.

Our truthful capitalist daily press, in its eagerness to beem the candidacy of of the "hearty reception" accorded to Mueller's halt. North avenue and Sedgewick street, last Sunday. This is the substance of the account given by every morning daily in the city:

by every morning daily in the city:

"Mayor Harrison was heartily welcomed yesterday at a reception given him at Mueller's hall, Sedgewick street and North avenue, by nineteen Turner and other German societies. Both floors of the building were crowded. The number of people present was estimated at 2,500. The occasion was a flag presentation to the Lasalle Turn Verein, and the mayor had been invited as the guest of honor. His appearance was cheered and he was greeted with considerable enthusiasm by all present. The societies which took part in the affair were: Chicago Turngemeinde, Sennetelder Liederikram, Chicago Turngemeinde Mannerchor, Liedertafet Freiheit, Socialistischer Sängerbund, and a number of turnvereins."

This account is a deilberate falsehood.

This account is a deliberate falsehood from start to fluish. Harrison was not invited—no reception whatever was planned. The whole affair was a paipplanned. The whole affair was a pair able political trick engineered, presun-ably, by Police Inspector Heidelmale who took advantage of the meetin (which really had po political signif-cance whatever) to ring in Marrison of the addirace. The "hearty reception

mainly of hoose, yells and catcalis, in-terppersed with cries of "Rurva's for John Collins!" Hurrah for the Social-ist Party!" Harrison didn't appear to be delighted with this "hearty come," and when the immense maj of the audience got up in disgust quit the hall, leaving the "man of c tiny" facing a beggarly array of em benches, the expression of his countenance was hardly to be m for one of keen enjoyment, while deimeler looked across the aching with an eye which flashed clubs in ery glance. The socialist singing cieties rose in a body and went way to their own headquarters and concluded their programme, which had been interrupted by the entrance of the capitalist politicians.

Don't forget that the ticket of THE SOCIALIST PARTY, headed by JOHN COLLINS, stands LAST on the ballot.

THE SUBSERVIENCY OF THE MODERN ALDERMAN TO CORPORATE INTERESTS IS ONLY ONE OF THE MANIFESTATIONS OF THE EVOLUTION OF MODERN INDUSTRY. THE REFORMERS WHO SO LOUDLY DECLAIM AGAINST THE "HUNGRY GRAY WOLVES" CAN FIND THE REASON FOR THEIR EXISTENCE IN THESE PROPERTIC WORDS OF LINCOLN:

"I see in the near future a crisis arising, which unnerves me and makes me tremble for the safety of my country. As a result of the war, corporations have been enthroned, and an era of corruption in high places will follow, and the money power will endeavor to prolong its reign, by working on the prejudices of the people, until all wealth is aggregated in the hands of the few, and the republic is lost."—Abraham Lincoln, 1865.

If the candidates of the the people. If the candidates of the SOCIALIST PARTY are elected, there will be no franchise question, least of all any question of the extension of franchises. The expiring franchises revert to the city, and the control of the city attaches immediately, the companies having no rights in the renewal or extension of franchises that will for a moment be considered. Whatever else may be said regarding this statement, its distinctness cannot be called in guestion.

As a side show to the big circus the antics of "Reformer" Harian are worthy of a passing notice. According to the press reports, he is about to "open fire" upon the "gray wolves" in the interest of a "pure" city council. The particular wards on which his batteries are to open are those selected by the Monicipal Voters League and the corporations, and in each of them he will champion the cause of the "raspectable" candidate whe has received the independent of that assemt body.

The big capitalists, the men who are interested in the corporations that fat-ten on your flesh and blood, don't care whether public school keeps or not. The capitalists can afford to build their own schools. They can train their own teachers who will educate the rich men's children in such a way that they will understand how to stay on the backs of your children. They always have money to endow colleges, where they can raise men who will tell lies to you in school, on the pulpit and through the recess.

What, then, has happened during Harrison's administration that should lead you to want some more of the same kind? vant some more of the same kind?

Well, there was the big building strike, when the workers of this city fought for the right to stand together as men in their unious and their federated bodies. The SOCIALIST PARTY.

Short, concise and expressive - the SOCIALIST PARTY.

Do not fall to mark your ballet on the op of the column where the words SO-CIALIST PARTY appear.

The SOCIALIST PARTY comprises eago. Outside of its organization there NO SOCIALIST factors of any importance whatever in this city.

ranks practically all the men who have been identified with the movement in Chicago. The rough good and evil repute have fought for socialism when it was weak and insignificant are still in its waks, now that it is strong and aggres-

The SOCIALIST PARTY stands, as it has always stood, for uncomproing, class-conscious, revolutionary so nt for the emancipation of the m through political action at the ballot box: for the collective ownership of the means of production and distriion by the working class; for the operative commonwealth.

CIALIST PARTY emphasiz the working class character of the so etalist movement, and insists that, of all classes, the working class alone pos sufficient power to emancipate elf from wage slavery. It repudiates the idea that the assistance of the middie class (us a class)) is essential to the triumph of socialist principles, and requires that individuals of that class at the standpoint of the proletariat.

The SOCIALIST PARTY calls upon very wage worker who comprehend his distinct class interests, to vote its entire ticket in the coming election the ticket headed by JOHN COLLINS, the candidate of the SOCIALIST PAR-TY for MAYOR. The SOCIALIST PARTY has nothing to conceal, nothing to fear, no empty promises to make Existing as it does solely of, for, and gh, the working class, it relies en tirely for political support upon the de velopment of intelligent class-conness amongst the workers. Vote the ticket of the SOCIALIST PARTY.

The organization of a new Bulldin Trades Council is in line with what has been predicted in these columns. The union of workmen in related crafts is an absolute necessity to maintain even temporarily whatever concessions may be wrung from the employing classes tever degree of success the new or canization may achieve will be dependest upon the ability and inclination ing it to entirely exclude capitalist dities from its councils. The disaseffects of permitting this discord factor to obtain entrance into hat struggle with the Contro

ciation, and we hope that the new atral hade will profit by that expece to guard against the disruption are permitted to find lodgement in a presnigation which avewedly champi ons the cause of one distinct ciena.

Some of the contortions of the capi alist cardidates on the street railway franchises are distinctly funny. Carte Harrison now comes out in the daily press with a so-called "pledge to the cople." This champion of municipal wnership embodies his pledge in six distinct demands for petty reforms the latter of which states that the 'ninety-nine-year clause must be strickes out of FUTURE GRANTS and plain statement made which will pave the way for ultimate MUNICIPAL OWNERSHIP." The piedges are fellowed by a signed statement which reads as follows: "These are some of the things which will be secured for the people of Chicago under NEW FRAN-CHISES." The "municipal ownership" which Harrison advocates is evidently a thing to be worshiped from afar off. and those who pursue this plianter may console themselves by remember ing that "distance lends enchantment to the view."

A PARABOXICAL SITUATION. Anthracite coal miners, it would seem are at present in unusual luck owing to the peculiar nature of the situation as it regards their claims. Paradoxical as it may seem, yet for the present the interests of the two hostile camps of capitalist and laborer apparently are co incident. It is not to the interests of the miners to declare a strike when the sufthe united forces of Socialism in Chi- fering entailed upon them through such action is taken into consideration, and yet they are often compelled to do so. The question of wages and recognition of their union is pressing to the front tour and "see the large cities," as hi just at present, and the capitalists do not want to have anything to do with either question, but it looks as if they must, in spite of themselves. And here s where the paradox appears. At pres ent a strike would be disastrous to many capitalist interests. There is, for instance, the great steel trust, just reently formed, which must market its took and cannot afford to have a strike upon its hands during the operation -particularly a strike in an industry so closely connected with steel and iron production as coal mining undoubtedly s. So J. Pierpont Morgen is bringing all his influence to bear upon the operators to induce them to come to terms with their men. When Morgan has un loaded, it will be time to attend to the "demands" of the miners in the usual capitalist fashion, but until then the pest policy is to carry it fair to the Meanwhile the men should take advan tage of the situation to get all they pos sibly can, and if they also understand that whatever success they may obtain is of necessity limited, and resultant only upon the temporary exigencies of their masters, they will make use of such success to prepare for the conflict which must ensue in the near future with still greater intensity. If their eaders are really sincere, they in turn will not fall to teach the men who have placed confidence in them, the value of the ballot in bringing permanent suc-

cess to the cause of labor.

The school teachers are to be cor gratulated on their success in exposing he methods by which the "highly repectable" citizens attempt to shift the public burdens upon the shoulders of heir weaker brethren. But it is jus as well to allow a large discount upon the anticipated effectiveness of thes exposures. It does not require much penetration to understand that those who have practised lying, forgery bribery and perjury to avoid the drain of taxation upon the wealth which the have plundered from labor are not particularly sensitive to "exposure." They know well that these exposures have been so frequent that they now merely create a momentary sensation which is beginning to be looked for periodically as a spur to the jaded appetite of th "public" for "news." Consequently they orcome callous over the "expos ures," and treat them as a matter of

The capitalist for has not exhausted his tricks, and be fore he is made to discorge, will man age to convince many of the teachers of their exact position in society to-day -that they are not amongst the shear ers, but the shorn, that they are war workers, to be bought like all other enricers in the cheanest market.

If the teachers desire to take th est means of securing a just compen ation for their services, let them rol up a heavy vote for John Collins, the andidate of the Socialist party for mayor. His election would do more o secure for them the object of their efforts than a hundred "exposures, which only serve to show that the captialist hide is of unusual thickness.

LET HIS OWN CLASS ELECT HIM.

In giving reasons why her son should e returned as alderman in the Twen ty-first ward, Mrs. Potter Palmer expresses her distinct recognition of the in this country. The young aspiran for political honors (?) steps into the arena with the following advantages: He has a university education and has een large cities both in Europe and are such) he acquired at the expense o the working class, which he now expects to elect him by their votes. This young man, so far as recorded, has never done a stroke of useful work in his life, with a doubtful exception of a period of six weeks in which he posed as a hank employe and which position he abandoned to make a European maternal parent says. These recom mendations for office are, of course, neither better nor worse than thos furnished by other capitalist candidates, and even if they are to be con sidered an exceptional qualification for office, there is certainly nothing in them which should induce any work ngman of average intelligence to vote or their possessor. Palmer stands bove all for the system which depris the laborers of opportunity for the very ducation and travel by virtue of which Palmer bases his claim for political rec gnition. The working class of th Twenty-first ward have nothing to gain by returning this man to office, as h has not the slightest interest in com mon with them, belonging as he does o a class for whom culture and lets ire are only possible through & system which robs the laborer of his produc for their benefit. There is a socialist candidate for alderman in the Twentyfirst ward, and the amount of votes he will receive will be a precise indication of the number of workers in that ward who are intelligent enough to under stand that Palmer cannot possibly represent any interest of theirs.

A bill has been introduced in the Illi-ois legislature by Representative D C. Sullivan which provides for assist ng intoxicated voters at the ballo ox. This solicitude for inebriates un ubtedly arises from a recognition of the fact that those who need this sort of "State help" are not very likely to ust a socialist vote.

The Chicago Chronicle some time ago ublished a disputch from Washington D. C., to the effect that the trusts had entered into a "conspiracy" to elect McKinley for the third term. The "conspiracy" in question amounted to this that it was proposed that "prosperity" should be continued for four years nore, and that through this McKinley was to be re-elected. The discoveries of modern science are often totally overshadowed by the "discoveries" in nodern politics.

The humburs that rave against the trusts in the daily press and who sys ematically magnify every opposition to these overgrown combinations of capital, have been provided with another opportunity to exercise their pecultar talent in this direction. Big type headlines announce the fact that Col. Ellwood is fighting the steel trust, and some unthinking workingmen and nall fry business men generally get inspired with the hope that the trust pay be "downed" in the struggle. But what is Ellwood fighting for? His suit is simply the result of dissatisfaction with his share of the swag, though the head lines used by the anti-trust pres are deliberately calculated to give different impression

A great many women understand this already; they are inspired by socialist principles. They have organized them selves into professional unions, or have united with the mixed unions of laborers. They have entered the socialist Co-operatives. The organization of Brussels consists of twenty groups of women and mixed groups affiliated with the Parti Ouvrier. At Ghent the unions of women laborers have attained a rapid development; in the greater par of the other industrial localities the nion movement grows, among the his efforts and examples to be imi-afed. Convict System in Georgia Permits the Escape of the "Business Man" From Punishment.

Wood Simons.)

The Macon, (Ga.), Telegraph states hat the convict system of Georgia is rotten from center to circumference and rives the following incident as an ilustration:

Some months ago a Bryan county bailiff arrested a negro who was employed at a turpenine still in that county, charged with some trivial offense. The owner of the still was not present when the arrest was made, but soon learned of what had occurred, and arming himself with a shot gun, persued the bailiff and his prisoner. He overtook the bailiff in the road and attacked the officer, beating him over sued the balliff and his prisoner. He overtook the balliff in the road and attacked the officer, beating him over the head with the gun and taking the negro away from him. The man then carried the negro back to the still and put him to work as usual. Later this man, who is quite wealthy, and who conducts a large business in his line, was arrested, charged with interfering with an officer in the discharge of his duty, and for assault and battery, and upon trial was found guilty and sentenced to pay a fine of \$1,000 or work twelve months on the chain gang. He declined to pay the fine, and, was sentenced to pay the fine, and the providence of the first and the payon the first and the payon the pa declined to pay the one, and was sent to Decatur county, where it seems that the Bryan county misdemeanor convicts are hired out to work for a company of lessees who operate a misdemeanor convict camp in that county. It developed later that the man had not been put to work but had instead been allowed to return to his home and resume the conduct of his business—that of a turpentine distiller—and that he is there today managing his business affairs, having freed himself of the sentence imposed upon him by the court that tried him. It is understood that the man secured his freedom in this way: The lessee, it seemed, paid the county of Bryan \$100 for the man, and that the man surnished the lessee the money to make the deal with. This being done, the lessee allowed the man to return to his home, and in that transaction the distiller in effect paid a fine of \$1,000 with \$100 and seved \$100 and secured his liberty.

This story has leaked out through one of the county officials of Bryan county, being paid \$16 as his share of the proceeds of the hire of the man had been allowed to return to his home. allowed to return to his home allowed to return the his business, and presumed if such was the case he had paid the entire amount of the fine, \$1,000. An investigation by him developed the facts in the case.

We are inclined to think that the Tab.

We are inclined to think that the Telgraph has made its point as to the 'tottenness' of the convict system, but he Telegraph evidently is in blissful rance of the cause of this rottenignorance of the cause of this rotten-ness. It deals merely with the fruit of the tree of capitalism, whose roots are private ownership of the means of pro-duction and distribution, and the fruit is only rotten because the tree itself is puried, root and branch.

CORRESPONDENCE.

Editor Workers' Call.

Dear Sirs:—I received the bundle of Workers' Calls you sent me to distribute, for which accept any thanks.

I believe that I can put them into the hands of those who will give to the matter contained in them an intelligent and respectful hearing, and I shall proceed with the matter at once.

We have a number of thinking menhere, who see in socialism the only hope of the future, and I think there are a great many others, who, though not classed as Socialists, feel within inemselves a craving, fill defined and inexpressible though it may be), for a hetter order of thinks not outlined in the platforms of any of the old parties.

The latter class are more than half won to socialism, for when one sees that things are not as they should be, and cannot be righted by either the Republican or Democratic party, or by any other old-time organization based upon capitalism, then he is in a condition to listen to the truth.

One of the hardest things to overcome, is prejudice, but when a person once yields prejudice to an open and receptive reason, then does he prove his willingness to give truth a hearing.

willingness to give truth a hearing. To such, the Workers' Call cannot help but prove a blessing, for it, (as do other forms of Socialist literature), gives expression to thoughts which he may have already possessed in part, yet was probably unaware of it until put into form by those more advanced in socialistic study. When one is seeking the truth, they who see the truth should use every opportunity to impress it upon him. That is one duty of the Socialist, to impress the truth upon those who are receptive. Another and a harder task is the overcoming of prejudices. In proportion as prejudice melts away, the millenium looms before us, assuming definite and tangible form. If you care to read one, I would like to tell you of my first experience in a Socialist meeting. There being an excursion to your city last week, I took the opportunity to visit it, primarily for the purpose of attending the meetings at the Socialist Temple on the West Side, and listening to Prof. Hetron at Central Music Hall. I was disappointed in my plans of attending the West Side meetings, but was present at. Central Music Hall Sunday afternoon! Although again disappointed in not hearing Prof. Herron, (owing to his sickness), I was well paid in hearing one of his associates, Franklin H. Wentworth, in an earnest an able address upon the present situation; and in feeling the stimulus which only a meeting together of kindred spiris working and hoping along the same lines, can arouse.

working and hoping along the same lines, can arouse.

Although confronted by strange face-and unfamiliar surroundings, I did not feel a "stranger among the multitude." for the same motives that brought the others there brought me also, and I feit that we held many thoughts in common. "Stranger" is a term used to denote one who does not KNOW that he has thoughts in common with certain other persons, although he may have them. Getting acquainted then consists in discovering our common thoughts. What a vast acquaintance each will have when the new era of socialism is ushered; in for when ALL the means of production are held in common, where will any strangers be? I was particularly impressed with the intelligent and earnest appearance of these who had assembled, not for the purpose of studying each others' clothes and showing off their own, or of lengthening their faces in "Sunday piousness." (a comparison involuntarily suggested to me, with the usual Sunday meetings" over the land?, but to reason deeply and consciously concerning the methods of living a truly Christian life here upon earth. Those not conversing one with another, were deeply absorbed in some form of literature bearing upon the 'all-important subject of "socialism." I noticed a considerable number of Workers' Calis among the papers and magazines being perused, also a number of International Socialist Reviews and Social Crusaders. How different, thought I, was spent this period of waiting for the appearance of the speaker of the occasion, from that of most assemblies; yet no audience ever gave better attention to what a speaker said when he appard, than did this assemblage. That they were in sympath, with his address was shown by the way in which they received his statements; no polite conentionality agreed as a barrier to restrict their expressions of emotion.

Those who look upon Socialists as wild-eyed bomb throwers with horns and cloven feet, would do well to associate with them at one of their meetings and have the veil lifted from their eyes.

One Fowler, a capitalist aldermanic having sent a letter to Comrade J. A Brenan requesting the latter to vote for him, Comrade Brenan sent the fol-

lowing reply:

for him, Comrade Brenan sent the following reply:

Dear Sir:—

I am in receipt of a circular letter asking me to vote for you on April 2nd, dust why you should ask any wage worker to vote for you is somewhat beyond my comprehension. You say that your nomination is enforsed by "members of all political parties." You are mistaken. The members of the Socialist party have not endorsed your candidacy, and will not, nor that of any other capitalist candidate on earth. You say that "newspapers of all political beliefs" have done so. You are again mistaken. The official organ of the Socialist party, the Workers' Call, has not and will not. You say you will look after "my interests." You are once more mistaken. You will do no such thing as I am a wage worker and "my interests" are not yours. Do you think the wage workers have ALL forgotten the stand you took on the resolution from the Federation of Labor fast summer? And yet you say that your platform will be "your acts and attitude in the past." If that is so, you must possess an unlimited nerse to ask any wage earners to vote for you. Now Mr. Fowler, I challenge you to a public debate on the question, "Why should the wage earners yothe for you in preference to 'Theo, Williams, the Socialist party; candidate for aiderman in the Fourteenth ward."

IT. to limit the day's work was a thorn in the side of the contractors, and was the object of their special vituperation. That adjunct of capitalism, the press printed columns of matter denouncing as criminal any action of the unions, that would in any way curtail the timehonored wholesale exploitation of labor. Their columns were filled with letters from "labor skinners," eulogizing the gospel of "hard work," and a peculiar fact apparent was that all this preaching came from men who did no work at all, but who grew wealthy from the legal robbery of the tollers.

The contractors are veritable slave drivers, recognizing no standard for a day's work, but continually urging their slaves to greater exertion, and when a slacks his pace, he is immediately discharged and his place filled from the waiting on the job. It logically follows that the economic conditions of the toilers determines the amount of buildozing they will be subjected to.

A few years ago, before the development of industry curtailed the market 1.500 brick was considered a good strength to lay from 2,000 to 3,000 brick cannot hold his job with many contractors. The new stock yards of this city demanded and received 3,500 bricks per day from each bricklayer. It will be readily seen that the effect of upmercifully driving men to their utmost physical limit has made human wrecks of men comparatively young. One of the most pathetic scenes in a labor organization is the spectacle of a man 50 or 60 years of age, confessing his inability to secure or hold his job and demand union wages, and begging the union to grant him an "exempt card," that he may hire himself to contractor for whatever he can get.

Parian, though serely disgruntled over the result of the momination, is pre-vented by a please from repeating his performance of four years ago, and as he has no intention of retiring from the mas no intention of retiring from the litical field, he takes this opportunity making his peace with the capitalist ma, and particularly corporations, by shing the fight for a "clean" council. "his champion of the "people" starts is speeches by defining HIS position. he is not opposed to corporations or in any way antagonistic to its interests; that all he wants is to secure the elec-tion of aldermen who, when the fran-chines are renewed, will see that the city gets a "just" compensation for its

It is only necessary to refer to the fally capitalist press to procure suffi-tient evidence of the farcical nature of thing called capitalist politics, so far as it concerns the wage working class. The materials from which the bove notes were taken were supplied throughout by the capitalist journals of this city during the last week. It ents nothing but trickery, evaon, hypocrisy and treachery upon the part of the political actors who appear in it, and the only difference between them is of degree, not of kind. And one reality appears which is common to all, viz, the interests of the class who der, degrade and deceive the work-Not one word that they speak or te, not one action that they perform, an in any manner whatever tend to etter the material conditions of those , and this is so plainly evident to one who will use his brains to nk the matter over, that one is at a oss to decide which is the most wonrful—the colossal assurance of the ols of capitalism, or the unspeakable dity of the workingmen, who can still be deceived by them.

Ne apology, therefore, is needed in ng the claims of a political orga-on whose very existence is rooted orking class interests exclusively. in bringing the claims of the SOCIAL IST PARTY to the attention of the wage earners of Chicago and urging a perusal of fix platform, upon their possible between its concise and dis-ect statements and the shuffling ating and evasive programme equivocating and evasive programmes of the capitalist parties—a contrast in-stead is at once established. And the same contrast exists between the state-ments of those who publicly advecate the principles of the SOCIALIST PAR-Ty and those who speak for capitalism. A vote for the latter is worse than a thrown tway, whilst a ballot cast for the SOCIALIST PARTY, whose candidate for mayor is JOHN COLLINS. m, but a protest against being sade to play a part in a useless, disnasting and degrading farce enacted or the sole benefit of that class which robe the laborer of the fruit of his toil.

an eloquent testimonial as to what he would do if mayor. Whenever an op portunity came for him to grant any special favor to concentrated wealth against the workers of Chicago, we may be sure that he would use all the en ergy at his disposal in assisting his own class—the employers. Surely when workingmen are seeking for some one to carry out their wishes in the mayoralty chair, they can find nothing to

What kind of a man do the laborers want then? In the first place he should be a union man, a man familiar with the difficulties and struggles of ia bor in all fields. He should be a man a product of human toll either of hand or the brain, it can belong only to the toilers. He should be a man ent government is in the hands of the capitalist class and that the fundamental reason for his election is to change that fact and make the government of that fact and make the government of the city of Chicago a government of, for and by the laborers of Chicago. In other words, he must be a SOCIALIST, There is a man who fills all these con-ditions and who is the only man in

whom the workers of Chicago can have any interest. That man is JOHN COLLINS and he is at the head of the SOCIALIST ticket. If he is elected he is pledged to us

the interest of the workers. Every vote that is cast for him whether he se elected or not is a protest against the conditions that give rise to injunctions, strikes, tramps and destroyed homand is the only way in which such s protest can be made. Every cross put above his name is a declaration that one more man has had intelligence enough to know that in a quarrel be tween masters, slaves get only blows person casting it believes in the aboli

Rain did not keep the people away on Sunday. The morning meeting enjoyed the usual music treat from the Schubert String Quartette. Comrade Strickland spoke on "Martyrdom, Famaticism and Liberty."

A full house greeted Comrade Walter Thomas Mills Sunday afternoon. The speaker was at his best, and the andience greeted him again and again with applause and cheers. His presentation of the present political situation was wilty and effective. Votes were made for the Socialist-party.

Sunday evening Comrade Smiley traced the historical development of the socialist movement. It was an exceedingly instructive lecture.

The Socialist School at 2:30 p. m., was well attended. Primary, Intermediate and Advanced classes were conducted, The teachings of Comrade Simons is most highly appreciated. Comrades in any part of the city who can reach the Temple Sunday afternoons should avail themselves of this instruction by Comrade Simons. Remember the time and come.

DIFFERENCES IN WAGES. One Man Who Produces Nothin Can Barn as Much as 13,000 Others Who Do Produce.

All Welcome.

Many remarkable discoveries hav een made by investigators from the Chicago university, but none more wonderful than the one published in las Sunday's papers. It seems almost incredible that, in spite of the "prosperity" that everybody is enjoying, the re port of a student of that institution, re garding conditions of life in the sweat-shops of Chicago should be true. This investigator declares that the average wages in those centers of industry are comewhere about \$77 per annum. But this is not all. The further discovery has been made that even this meagr average tends to become still lower. And yet, while this downward tender has been proceeding, it was generally supposed that the conditions of the working class were almost ideal. The "advance agent of prosperity" had been in office for four years and was re-

the fulfillment of the promises made by and for him, and still the tendency It is satisfactory to notice, however, that outside the sweatshops instances can be given to show that this tendency is not absolutely universal. An employe of the United States Steel and Iron Co.

It does not at all follow that Sowab really needs 12,387 times as much food, or clothing or fuel, or other physical necessaries as the ordinary sweatshop employe in Chicago. been cleared away and the capitalist duly elected, we feel the comrades throughout the city should be enlightd somewhat as to the actual state of affairs in the local Socialist move-ment. That this has not been done before is due to the fact that the Socialist party was too busily engaged in directing the fight against the common enemy, to waste time in exploit-ing the unfortunate division which resuited in three distinct parties claiming the name of Socialist being placed on the ballot. Doubtless this confusion ballot. Doubtless this confusion no small extent tended to diminish the vote, which might otherwise have afidently anticipated, and which would certainly have installed the So cialist party of this city upon the offisult of the election shows conclusively that those who, for reasons best known to themselves, stubbornly opposed the unity of Socialist forces in this city, have gone down in-well-merited disas-

It now, however, becomes appropriate to place before our resders a short sketch of the events which occurred in the local movement subsequent to the national election in November. The Socialist party have consistently stood for unity ever since that date, and in their convention 165 delegates emphasized that position plainly and dis-tinctly. The faction with headquar-Washington street, however, every advance made in that a, though everything possible rejected every advance made in that direction, though everything possible was done to make it acceptable without loss of self-respect. Nothing came of this, and the Socialist party perforce had to abide the result of the decice as a final test. That result owed beyond a shadow of doubt that e Socialist party was thoroughly stifled in the position it took. The alcontents have been overwhelmingly feated, and will in all probability have no further significance as a poli-ical party in Chicago,

It was no light task, with the limitmeans at our command to accomthe Socialist party braced themselve or the effort. The agitation was carried on with the utmost vigor, large ings being continuously held in meetings being continuous.

the party had changed its name.

The character of "Socialism" advonated by this insignificant clique is aino worthy of a passing notice.

Throughout the campaign it largely
took the form of abuse and misrapresentation of the party by which it
was so thoroughly thrashed on last
Tuesday. To these tactics no reply
was necessary. The Socialist party,
as before stated, was too busily enguged in Socialist propagands to notice
the calumnies huried at it by conscious
impotence. Sourrility and falsehood
spread broadcast through anonymous
handbills may serve the turn of those
who see in them a necessary adjunct to
a suspicious cause, but such weapons
we leave to those who prefer to use
them. They have no part in our propacands.

Now that the smoke of battle has | der this editor informed the Dally News reporter on the day before election that his party stood for "conservative ideas" and not for "revolution." It might be as well to remark in pass-ing, that this precinct polled twenty votes for the Socialist party ticket.

These matters, however, are but transient phases through which the Socialist movement must pass, and possible doubt which may remain in the people whom he fleeces would suffer the minds of our readers as to the nature of the internal dissensions which ple of Andrew Carnegie in retiring from have to some extent retarded the prog-ress of Socialism in Chicago. For the rest, the election of April 2d has mented upon by many of his brethren abundantly justified our position and as the ideal course to pursue, and these repudiated the actions of the disruptionists. From this time forward our Sage, who declares bluntly that he attention will, as usual, be exclusively means to keep control until death loosgiven to Socialist agitation and organfacination to trouble about the rem-nants of disunion which may yet survive. The outlook for the future is cheering and the battle against capitalism must be pressed with unabated vigor. Comrade Collins delivered a powerful address, in which he exposed the falsity of the claims of the capitalist candidates to pose as "friends of labor," and showed conclusively that the laborers, instead of depending upon their enemies for "favors" which they never received, must unite together and enforce their own demands by the collective strength of their numbers. He described how the capitalist class mainly depended upon trickery and missive depended upon trickery and missive presentation, and taking advantage of race and religious prejudices to keep the workers in ignorances of their true interests, and how socialism alone could rend the web of deception woven around the unsuspecting working class by the avarantical irely working class. could rend the web of deception wove around the unsuspecting working class by the parasitical tribe who lived upo their labor. He was followed by Con rades Mills, Morgan and Smiley, wh in brief and pointed addresses on phasized what had been said before Three rousing cheers were then give for the socialist candidate and thre more for the party and the meetin was then declared adjourned.

To Step Exedus.

Conditions in Porto Rico are such that thousands of laborers are emigrating to Venezuela, leaving the capitalist planters without the supply of wage labor necessary to properly employ their capital. Prompt action has been taken in Washington to meet this emergency, and two tons of American flags are to be shipped at once to the island to restore configure and check the tide of immigradence and check the tide of immigra-tion which is proving so disastrous to the local exploiter. Wage laborers have often been scared by the threat that their masters would take their capital out of the country in case the workers refused to submit to the rate of exploitation, but the folly of this threat is well evidenced by the fact that the rapitalist will move heaven and earth to retain the supply of wage labor, without which his capital is ab-solutely usoless. At all hazards, the delusion that the Upon every possible occasion the ex-"business" (with an annual income of mented upon by many of his brethren ens his grip), almost invariably express ization as we have neither time nor a strong desire to follow the example of the benevolent (?) Scotchman, but unfortunately the interests of their employes imperatively forbid all hope of entertaining such an idea. An interview with Abraham S. Hewitt, recently reported in the daily papers, may be taken as characteristic of the hypocrisy

despairing cry, "I can't get out!" "; tunity becomes an invitation to inspect the structure of his cage. By the bye, we hope our readers will overlook the rather strained comparison by which this prisoner of capitalism is likened to a starling. We know, of course, that a vulture would have made a more ap-propriate simile, but then vultures don't talk. They simply gorge themselves to a standstill, and say nothing.

ole should be "thrown out of work." Seems to be a flaw in this fastening When 500 times 500 men are tramping over the length and breadth of this country, do not the organs which express the interests of Hewitt's class assert over and over again that these men will not-work, that they will run away from work, that there is nothing more abhorrent to them than work, and that their greatest trenble is designing and their greatest trenble is designing and avoiding the remunerative work which is thrust upon them at every turn? Is not this the ers of "unparalleled proswill not work, that they will run away from work, that there is nothing more abhorrent to them than work, and that their greatest trouble to doriging and avoiding the remunerative work which is thrust upon them at every turn? Is not this the era of "unparalleled properity," the idyline eloch in which the "job seeks the man?" Why should Hewitt fear that these 550 will suffer? They are not dependent upon him, unless he will admit that the political tools of his class are living who against ally deceive the workers—an admission which it is not very probable to this class. If Hewitt "can't got out,"

it is certainly not this excuse which will prevent him.

Again, the Trenton works (whatever

they may be), are certainly not run merely for the sake of "giving employment." If they ceased to yield profit, would Hewitt have any scruples about closing them down regardless of the in-terests of the 500 employes? Hardly. profits extracted from the Trenton works is at least sufficient consolation to reconcile the prisoner to his captivity? If there were no profits, he could get out, in fact, he would have to. As it is, Mr. Hewitt is evidently a victim, the profits which they insist upon thrusting on him.

Surely, the withdrawal of an individual whose sole function is to appropriate what others gentry (with the exception of Russell produce, need not necessitate the closing down of the works. There are lots of fellows ready to release Hewitt from this task, and give him the freedom which he envies Carnegie. Indeed, he could "emancipate" himself in the same manner without much exertion were he so inclined. The bolts and bars of his prison are by no means so strong as he imagines.

One day last week a number of "salone of their ewner's buildings to listen the audience, who were persent mereto put in an appearance at the har-angue, as they didn't wish to run the risk of looking for another job, and from them we learn that Harrison expressed himself vigorously upon the conduct of the Socialists who refused to listen to his twaddle in Mueller's Hall two weeks ago. The remainder of his speech is of no consequence to our readers-or for that matter to the audience who listened to it-though but few of them were aware of the fact.

The "man of destiny" asserted that cause the Socialists in Mueller's Hall refused to listen to his vaporings, they were "no gentlemen." Be it so

street in the latter part of last October when the Socialists attempted to hold a series of open air meetings just before the national election. A body of "gentlemen," every one of whom would have listened quietly to Harrison's oratory, and who for years have voted him into office, made a systema-tic and determined onslaught upon the cialist speakers. They were saulted beaten and in some cases stabbed, their stands were overturned and their meetings broken up by the "gentlemanly" dregs and soum of the levee district. The authorities had been duly notified of these meetings, police protection had been requested in due form, and again and again when the form, and again and again when the howling mob of "gentlemen" were engaged in their cowardly attacks, the intervention of Harrison's police was asked in vain. Harrison, bosonics was a Prince

as mayor was responsible for the preservation of public peace, knew that they would be attacked—and did nothing to prevent it. If he did not encourage, he undoubtedly permitted his "gentlemen" to work their own sweet will undisturbed and unhindered.

And this is the man who considers himself aggrieved because a Socialist audience, who had hired and paid for the use of a hall, and upon whom he was impertinently thrust, refused to listen to his stupid and useless harangue! It was well for him that they were not "gentlemen," or he might have fared worse.

It is about time that capitalist politicians were acquainted with the fact that of all people in this city, the Socialists have no manner of use for them. Whether they label themseves Republican or Democrat, we recognize them equally as enemies of the working class. We know perfectly well what they have to say and why they say it, and have iong ago come to the constusion that it is a useless waste of our time and their efforts to attempt to convince us that the system for which they stand can ever gain our support. Once a Socialist, always a Socialist, and neither Harrison, Hancey, nor any of their following of capitalist windbags need entertain any idea of making converts from our ranks We know what we want, and how to get it, and we know forther that between us there is a great guif fixed, which cannot be bridged until capitalism has disappared.

If any of these men wish to obtain THE VAIL MEETINGS a hearing from Socialists they can only obtain it by championing capitalism as against Socialism in debate. Harrison can have an opportunity to speak to Socialists upon no other terms, but he will be gladly afforded this chance if he dares to accept the challenge. Otherwise we have no time to waste in listening to him, being too busily engaged in undeceiving those who are yet the dupes of his class.

Suggestions for Agitation.

Springfield, Mass., March 20, 1901. To All Locals of the S. D. P. and Other

Socialist Organizations: Greeting:—The warm and pleasant weather will soon be here and it is for us as Socialists to take advantage of same by getting out on the highway and byway, teaching Socialism to the people as they stroll along enjoying the pleasantness of the gentle evening zephyr after their day of wearisome

toil in factory or shop.

The N. E. C., being anxious to do all it possibly can to advance the cause of Socialism this coming spring, summer and fall, has adopted a plan of ar ranging circuits for open-air speakers and hopes to get the co-operation of every local, and other organizations as well, in making this a grand success. We propose to arrange monthly tours in the various states and have one speaker or more if necessary stump for Socialism.

The idea is to get every local to agree to hold at least one open air meeling each month, and if any organ ization desires to hold them oftener the N. E. C. will see that speakers are supplied,

Our object/is to reduce the expens of each local or organization to the minimum, and the following has been adopted: Each local is required to pay the speaker \$2 for his day's services, his railroad fare from the point he had previously left, and to take care of him while he stays with them.

We shall try and arrange the tours so that the railroad expense will be triffing to each local, which will make the entire expense of each meeting a

Tours are now being arranged so as to begin our open-air campaign on May 1st at the latest. We submit this to your local or organization, and hope that you comrades are interested enough in the cause to agree to arrange at least one meeting a month on the above basis.

Noted Socialist Writer Speaks for the Candidates on the Socialist Party Ticket.

Local Socialist agitation received a strong impulse during the last days of March from the visit of Comrade Chas. H. Vail, the Socialist candidate for governor of New Jersey. A series of four meetings was arranged; which were carried out in the most success ful manner and were probably attended by upwards of 3,000 people. Com-rade Vall is a strong and forceful speaker, and his expositions of the principles of Sociali-m left nothing to be desired in the way of effective propaganda. He lef, this city on Monday morning to continue his tour of agitation through the middle West, and his itinerary may be found in an-

The first meeting, which was held on Friday evening, the 29th ult., in Phoenix hall, corner of Division and Sedgwick streets, at 8 p. m., attracted an audience of between six and seven hundred people, who paid the closest attention to the lecturer throughout the entire address and by their fre-quent applause showed that the points made were duly appreciated. The speaker concluded with a strong ap-peal for the support of the candidate for mayor on the ticket of the Social-int party, the name of John Collins allelting load and continued applause. an audience of between six and seven eliciting loud and continued applause from the audience. On the following evening at the same hour Comrade Valt addressed a very large audience at Aurora hall, corner of Milwaukee avenue and Huron street. The house was grounded to its utmost capacity and the manner in which the speaker's remarks were received left no doubt of the fact that a deep impression had been made. Another speaker, Comrade J. Stitt Wilson, also delivered a short and forceful address, which was keenly appreciated by those present. TREASON AND LOYALTY.

It all depends whose ox is gored. The perpetrator of the trick by which Aguinaldo was captured is now being showered with laudations for the brayery skill ingenuity, perseverance, etc. displayed in bringing the plot to a sucpessful issue. Had it failed, and Funs ton and his party lost their lives in the indeavor, the entire press would teem with condemnation of the attempted feat and those who permitted it. It would have been represented as foolbardy and hopeless from the beginning, and the commander who sanctioned it as incapable of being entrusted with the lives of those under his orders. But it succeeded, and nothng succeeds like success. It is also instructive to observe that the treachery involved in the plot is atterly lost sight of in the chorus of praise which greeted its successful consummation. But how would it have been if Aguinaldo or some of his lieutenants had 'corrupted" a body of American prisoners to perpetrate a similar scheme upon the person of General MacArthur? The how! of denunciation anent trenchery and traitors would have resounded loud and long through the length and breadth of the United patriotism which cannot be too highly onsmended. Capitalist Press Deprecates the Indis-cretion of Exposing the Class

It is interesting to observe the attitude of the ruling classes of society when any prominent individual amongst them sounds a note of alarm which brings to public view undisputable evidence of the reality of the class struggle. A Marx or a Liebknecht may devote years of study to plain expositions of this central sociological truth, and their efforts will be largely neutralized through a policy of silence upon the part of those to whom the idea is unwelcome; but let a Kaiser the same thing in a public speech and the capitalist press, which cannot ignore the utterances of such an exalted personage, handles the entire s-bject in a manner calculated to make one in a manner calculated to make one admire their cleverness in concealing the significance of the statement.

The German emperor in a speech his troops tells them to be ready to suppress any revolt upon the part of refers to a revolutionary struggle of ample which he fears may be repeated

How, then, does the capitalist press represent the matter? Do they express agreement with the emperor? Or do they resent his murderous antici-Neither. They take the stand that the kaiser is needlessly alarmed; that there is no fear of a revolution; that pretend to be astounded that the idea should ever be entertained by the emperor that any such revolt as he speaks of should be possible. The conditions which used to engender revolts no longer exist, they tell us, and intimate that the kaiser's words are merely the effect of undue excitement produced

So the dispatches from Germany inform us, that "nobody is aware of anything upon which the idea of an outbreak can be based." The organs of "public opinion" are afraid to state bluntly that the emperor is talking nonsense, and still more afraid to admit that he displays great judgment in preparing for emergencies. In

SOCIALISM AND LIBERTY.

Triumph of the New Order Will Abolish Classes and Emphasise the Unity of Human Life.

The movement which moves in hese times is the Socialist movement. Slow in getting started, true to the American spirit, once started it goes forward with leaps and bounds. For the hungering souls desiring the kingdom of love," the one mighty task to fire this great movement with "the ove of comrades.

This is-more than sentiment. Every new historic movement must find its deep springs in human love or it recoils upon itself. The real emancipa tion the workers need is the emancipation of life, the setting free of the soul. The struggle to own the tools, the means of production and distribution, is but the external of the commo life coming to its inner freedom and harmony. The prolessire really craves life, abundant life. The task of firing the Socialist

been of necessity engendered in the past must now be laid aside, as we doff a worn-out garment. The great phleg-matic world will be aroused only by an appeal to its noblest and manliest instincts. The dinner-pail argument is monopolized by the enemy. Let us offer not a full dinner-pail, per se, but a full life. Socialism offers the pos-sibility of the freedom of each soul. Capitalism has invented and perfected the machine that will free us from drudgery. We need no longer be chained to material things because material things may be made free. No achs, because meat and drink may b as free as air and sunshine. Social-ism comes to appropriate the machine and free the man.

But, you say, man will accept all this because of self-interest, Indeed, but it will be that self-interest so fine ly wrought out that its synonym is love. The self-interest of the ignoble man is the mess of pottage for today at the cost of liberty tomorrow.

The sentiment, "Give me liberty ample which he fears may be repeated and states that he relies upon the bayonets of his troops to repel the insolent insurgents.

How, then, does the capitalist press

appear.
Socialism comes not to plunge world into a class struggle, but to free us from a class struggle which is al-ready here. It comes not to invert so-ciety and make the ruling class the miblects of the working class, but to abolish all classes and absorb human-ity into the one great working class abolish all classes and absorb humanity into the one great working class of equals and brothers. In other words, it is the next historic and inevitable step of the human race toward the unity of human life which is the underlying fact.

The organs of "public opinion" are afraid to state bluntly that the emperor is talking nonsense, and still more afraid to admit that he displays great judgment in preparing for emergencies. In this dilemma they find it safest to assume an attitude of astonishment and deprecation toward the incident.

But the emperor, however; has some reason for his alarm. The presence of fifty-eight members in the German reichstag, sent there three years ago as the choice of nearly two and a quarter millions of German workingmen who frankly avow revolution as their object, should at least account to some extent for the recent utterances of the kaiser, but the existence of this revolutionary body (which is constantly increasing) is adroitly concealed in the press dispatches, which contain instead the reassuring news that "the press dispatches, which contain instead the reassuring news that "the press dispatches, which contain instead the reassuring news that "the press dispatches, which contain instead the reassuring news that "the press dispatches, which contain instead the reassuring news that "the press dispatches, which contain instead the reassuring news that "the press dispatches, which contain instead the reassuring news that "the press dispatches, which contain instead the reassuring news that "the pressent that our boasted "civilization" prevagent in the press dispatches, which contain instead the reassuring news that "the pressent that our boasted "civilization" prevagent in the press dispatches of the people is unquestioned."

The present number is a SGIENCE AND THE WORKINGMEN

IGNIFIED and scientific as Lassalle's "Workingman's Programme" was, the Prussian government could not tolerate it, and brought him before the court to answer an indictment of having publicly incited the unpropertied classes to hatred and con-tempt of the propertied classes. "Science and the Workingmen' is the speech Lassalle made in his own defense. Here it is that Lassalls in language bold, and with a spirit of confidence and sincerity, assumes the dignified attitude of a champion of the workingmen. Undoubtedly the author is extravagant in his fluency, yet not for his personal defense, and his brilliant and systematic array of historic facts and philosophic deducions at once inspires the reader with a vision of a herald proclaiming world-wide the cause of the workingmen.

The distinct literary style of this work endows it with a special interest and a desirable quality.

PRESS COMMENTS

Mr. W. G. Bougloin in the The Workers' Cell:
Brooolyn Citizen: Those who wish to

Casting selds all prejudices it is impossible not to be impressed with the fact that the language and teachings of Lassale, as revealed in the book now considered, have a sincerity of purpose and a manifest tread toward the up-lifting of those whose cause he champlessed.

Those who wish to get a comprehension of the extraordinary talent of Laszalle in oratory, debute, satire, and depth of knowledge, cannot de

better thus purchase it?

The New York People:

The defense did not save Lazalle from prison. That was not his chief purpose. It did, however, call attention to his propagand and cance men to think of the position of the railing class that had to depend on criminal law to present itself from the result of scientific researches. It did agreed service for, socialism and is new of deep historical interest

For this reason the wives of socialists sust interest themselves in the probems which interest their husbands. The unity of the family depends upon

that the wives of socialists are almost

the pitfalls which the men have fallen into-the party strifes, jealousies, en-vyings and personalities. Self-giorification is no part of socialism. The movement is first and the individual, as a personality, is last.

The co-operative commonwealth will come if we socialists should all die to-morrow. Perhaps it would not come so soon, not in the way we wish it to come, but it will come because it does not depend upon any ONE man or woman, no matter what part he or she may be taking in the movement today. not depend upon any ONE man or woman, no matter what part he or she may be taking in the movement today. The people who are suffering the most from the evils of the present system, know nothing of this man or that woman whom we consider "prominent." And it is because of this fact that I would urge so strongly upon each earnest worker that all differences except in principles be forgotten; there is more than enough for each of us to do, and we can work along the line that our abilities best fit us for. And if we do our work thoroughly, we shall have no time for petty goesip and blekerings. No one but a socialist can understand the hardships and self-denials which many of us practice for the sake of the cause. And, remembering that, and honoring they commune for it, let us give works of encouragement for decide.

EXPENSES PAID BY MASTERS.

To Convince Them That They Must Work Harder To Retain Something They Don't Possess.

One of the "problems" which our "reformers" never feel called upon to handle, but which is often of much interest to the socialists of a speculative them. turn of mind, may be found in a study of the question as to whether the audacity of the exploiter or the stupidity of the exploited, is the more wonderful. A scheme which is being hatched in England for the purpose of vitalizing absolutely no further concern with it. British trade is thus worded in a press It belongs to those who own the tools

"London, April 25,-The managers of a number of iron manufacturers of the Manchester district have decided to Manchester district have decided to send out a picked party of British workmen to the United States for the purpose of studying American methods of workmanship in the automatic-tool trade. The districts of New England, Philadelphia, Cieveland, Cincinnati and Chicago, and other steel centers, will be visited, in the hope of convincing the British workmen of the necessity of improved methods IF THEY DESIRE TO RETAIN THEIR SHARE OF THE WORLD'S TRADE.

Hundreds of thousands, probably millions, of American workingmen must have read this notice, coming as it did

through the ordinary channels or into through the ordinary channels or into mation controlled by the Associated culty whatever is reversing this post mation controlled by the Associated culty whatever is reversing this post tion and declaring that the working.

Press, which secured its publication in man has a "share in the world's trade."

The British workman's "share of the world's trade!" How much is that? We know what is coming to us, thanks to the kindness of Hanna. Depew, and the slavery of the worker still more to there of their ilk, who informed us intolerable by eliminating his skill and last fall that the PROMISE of a full threeby diminishing his economic powiast fall that the PROMISE of a full dinner pall was about our limit. But the British workman seems to be getting a "share of the world's trade." If that is the case, he is evidently better off than we are, and yet he is sent here to see for himself what tools we work with, and limitate our example by adopting the same. Yet it is said that it will be for his benefit, and, if so, it full product of their labor, becomes a

full dinner pail which we enjoy.

It would seem as if there is some tradiction lurking in this matter. Let us see if we can discover it.

Are these workmen coming over here of their own accord? No. "The managers of a number of iron manufacturers" are sending them. What is their object in going to this trouble? Accord; ing to the dispatch they hope that the visitors will be convinced that the condition of their class will be improved by adopting the improved tools which they will see in operation over here. The tour, therefore, is purely philanthropic in character, being engineered solely for the interests of the British workman. Those who send the party across and pay its expenses, do so with no interests of their own in view. They merely desire that the aforesaid British workman may, through what he observes here, be enabled to "retain his share of the world's trade." They they have now got. The expedition is, therefore, not a "business" one in any sense. It is gotten up-solely by a few altruists who are willing to spend their substance doing good and hoping for a strange co-incidence that these phi-tanthropists are all engaged in the iron ndustry themselves, that is, so far as taking profits can be described as en-

industry themselves, that is, so far as taking profits can be described as engaging in industry.

This explanation will, of course, be accused as absurd by those who read it. But, nevertheless, it is exactly what the dispatch declares without any ambiguity whatever, and in the plainest possible language. And yet there are few workingmen so stupid as not know that these manufacturers are really looking after their own interests instead of those of the workman, and still fewer, who are watchful enough to detect the fact that the wording of the dispatch makes its meaning appear precisely the reverse.

It is only necessary to take this paragraph in its literal sense to show that it is an absurdity, and that it states what everybody knows is untrue. Why, then, is it worded in such a manner? Because those who construct it rightly assume that a lie, by constant repetition, will be received as truth by workingmen who are too indolent to examine it for a moment. It is merely one of a thousand phrases by which the falsehood that the laborer and the capitalist have identical interests, is precausated. Every American workingman knows that the British workmen have "no share in the world's irade." He knows perfectly well that not only, do they work for wages, but for less wages than are paid on this side. The capi-

patiating upon "prosperity." And he knows also that what wages they do British Wage Slaves To Inspect get have been only secured after desperate struggles with the employers through the trades unions. Yet, in spite of this knowledge upon his part, the lie is published with the certain expec-tation that it will be swallowed with out examination and leave the desired ORGANIZED LABOR IGNORED. impression on the reader.

The party of workmen who are to visit this side of the Atlantic are "picked" by their masters for that purpose. That is to say, they are men who can be made to entertain the delusion that their class has a "share in the world's trade," and they will see just as their masters want them to see From this it may be safely inferred that there are no socialists amongs

The modern wage worker is not gaged in "trade." He does not own the tools with which he produces, much less the product created by his labor. When that product is completed, he has and raw material with and upon which he labors. It is they who do the "tradthing whatever to do with the process of exchange. The function of the wage worker lies entirely within the process of production. And every time that a labor organization bases its demand for higher wages upon the assertion, that Chicago, and other steel centers, will be visited, in the hope of convincing the British workmen of the necessity of improved methods IF THEY DESIRE TO RETAIN THEIR SHARE."

Hundreds of thousands, probably millions, of American workingmen must have read this notice, coming as it did through the ordinary channels of information controlled by the Associated the eyery important dally paper in the country. But out of the multitude, how many recognized the extraordinary assumption with which itended?

Possibly a few thousands only—and it is safe to say that of these few thousands 39 per cent were socialists.

The British workman's "share of the world's trade."

The British workman's "share of the water are making big profits, their masters are making big profits, their masters are making big profits, they are speedlly informed by the said the said they are speedlly informed by the said the said they are speedlly informed by the said the their masters are making big profits,

Latest Voting Returns.

The total vote of the Socialist party in the recent election amounts to 5,453, with a few precincts missing. However, this total is approximately correct and shows an increase of 741 over the first published police reports. We have not yet received the count for the S. D. P. but a total of 2,000 will most probably come close to the real figure, while the S. L. P. vote will total 700 or thereabouts, making a combined socialist vote of over 8,200, which is the largest ever cust in Chicago.

The Daity Mail, a London capitalist organ, declares that the billion dollar steel trust recently formed in this coun-try contains no danger to British cap-tialist interests which the latter are not able to defend themselves against sucready begun, and it consists in a general reduction in the wages of the British miners and iron workers, amounting to between 13 and 11 per cent cut on present rates. In the ments of Wales to between is and it per cent out on present rates. In the month of Febru-ary, for instance, increases in wages affected \$,342 persons, averaging \$4 cents per week increase to each indi-vidual, and decreases in wages affected vidual, and decreases in wages affected 211,881 persons, at an average reduction of 54 cents per week. It is not difficult to see that the main defence of the British capitalist against the American combination must take the form of a reduction of the laborers share in the value created, and the cheerfulness with which the British employer adopts this course irresistibly calls to mind the patriotism of the individual who was willing to sacrifice all his wife's relations in order that the Union might be preserved.

The labor papers are pounding Bry-an's "Commones" because it does not bear the union label, and the paper is receiving a lot of free advertising thereby. Presently, Mr. Bryan's paper will exhibit the union label and the la-hor papers will give him some more advertising, telling about it. This "con-version" of Mr. Bryan will be hailed as a great victory for frash unionism, and

Harrison's Empty Message to the Council on Franchises.

Municipal Ownership Promised Before Election, Vanishes When the Office is Secured

Carter Harrison has been re-elected nayor of Chicago by the votes of the workingmen of the city. Thousands of them were influenced by the fact that the platform upon which he stood contained a "municipal ownership plank." The speakers and writers of the Socialist party tried to make plain the fact that it was meaningless, but the great majority of the working class voters who put Harrison in office either did not hear or heed the warning. Now, how-Harrison himself comes forward to corroborate the statements of the social-It may, perhaps, interest those ists. ANNEXATION SENTIMENT.

A son of the notorious usurer. Hetty en has just returned from Mexico. re he has been spying out the land ofth an eye for future exploitation. Mr. en came away with a strong "Im don" upon his capitalistic minhat the "petter classes" of Mexico are

attailed with the prospect, as there are 'vast natural resources' in the South ern republic which need "developing" by American capital. This "public sen timent" Mr. Green was entirely una ware of until he saw a stage perform nce in one of the theaters in the city of Mexico, wherein an actor, impera sting Uncle Sam, evicted a make selieve President Diaz from his chai of office, and, to the surprise of Mr Green, the audience, composed of the aforesaid "better classes," applauded the scene most vociferously. If this story is true, and it looks probable nough. It is an interesting illustration of the devices resorted to by the capialist class to form a "public opinion" which is to ultimately serve their ma terial interests. The annexation o Mexico, which a few years ago would have been scouted as an impossibility, is evidently drawing within the range of "practical politics," now that our capitalist rulers have made a start elsewhere-and if "public sentiment" in Mexico can be developed to the proper pitch, there seems to be no good reason why it should not meet with the acquiescence of the exploiting class in this country. Working up a "public sentiment" in this manner, produces less friction and makes the transfer less expensive, than the other method of declaring the victims "incapable of self-government." We venture to predict that instead of this subject being dropped by the capitalist press, more

THE LIMIT OF SUBSISTENCE

will be heard of it in the near future.

It is not particularly strange that a hand of reformers dubbing themselves a "Social Economies Club" should un dertake the discussion of the question as to the possibility of a human being existing on \$2.50 per week, seeing that most of them accept the wage system as a permanent institution, and, along with other capitalist superstitions, regard, abstinence from enjoyment upon the part of the working class as a commendable action. But it is worthy of remark that most of the participants fectared that the sum mentioned was nsufficient to sustain life, and that nothing but poverty and misery could result if the attempt were made - a netuiton which certainly does not re uire a vast amount of intelligence to irrive at, but shows, nevertheless, that ven a reformer recognizes a limit to the possibilities of capitalist exploita-The daily journals also comtion. mented unfavorably upon the advisa bility of making the subject a matter of discussion, hypocritically claiming that in these times of prosperity nobody 'ought' to attempt to live upon \$2.50 per week, as if it was a matter of choice or voluntary experiment upon the part of those who must perforce manage to exist upon it.

In reading the press reports of the discussion and the editorial comment thereon, the impartial reader would receive the impression that while it was a good thing to live upon the narrow est margin of existence possible, still a weekly sum of \$2.50 might be considered have power to do so. Unity cannot be as rather below that margin, and that while \$2.50 might be made to serve, and \$4.56 would permit of some things not absolutely necessary, the sum of \$2.50 was positively too small to attempt to eke out a living upon without injury to the party attempting it.

But, nevertheless, the gospel of abstihich will enable the speaker to do pence must be preached to the workers of the first election as a test. athering a crowd. Then there should was forthcoming that better life conditions for the working class were only possible through securing to them t and that subscriptions are taken to the larger portion of their labor product. possibly appropriate to themselves the use for a branch, in Chicago at | full product seemed to be altogether st, to ask a man to speak from a beyond the conception of the "social economists" or their critics, who doubtless pride themselves upon taking a socalled "practical" view of the question.

The "problem," as they see it, resolves itself into an endeavor to determine the exact sum upon which human beings can subsist without too rapidly impairing their power for producing profit for their masters. It is the view consciously or unconsciously taken by every supporter of the system by which the workers are plundered and enslaved for the benefit of the possessing

One noticeable feature usual in such discussions was omitted. None of the election strongly corroborate that poparticipants suggested that any individual existing upon \$2.50 per week would certainly accumulate a sufficient amount to tide over the hypothetical "rainy day," which always figured targely in capitalist culogies of the virtues of "thrift and abstinence." At any ate, as we have reached the point where the pretence that the laborer

lay, becomes too threadbare for fur ther use, there may be some grounds for believing that the "reformers," who occupy their time in determining the subsistence point for the laborers, will not be able to pose much longer a "friends" of the working class

HOW TO SECURE UNITY.

The result of the recent election shows beyond dispute that socialism te slowly, steadily and surely gaining the attention of the working class in Chicago. But while this in itself is eminently satisfactory, it should never be lost sight of that what has been accomplished is after all trifling in com parison with what yet remains to be done. It is of course true that every forward step taken makes the succeeding steps easier, and that the move med, generally speaking, gains in momentum as its volume increases, but, nevertheless, it is useless to disguise the fact that as a political organization socialism is yet in its infancy. That th rate of growth has been remarkably rapid will be plain to all when it is congidered that in the space of four years the vote has increased fully tenfold in Chicago alone, and that in the few months which have ensued since the last national election 1,400 or 1,500 votes have been secured in spite of the division which have existed within the party, and which cannot but have affected it injuriously in the recent election.

Those divisions yet exist, and it may be that the methods employed to elim inate them in the past have not been absolutely the best, though they were undoubtedly the best, that could be devised. Like the rest of mankind, socialists must learn from experience. and if the local events which have oc curred in this city in the socialist movement during the last twelve months bear any lesson, for us, it as suredly is obligatory-upon us to discover it and profit thereby.

If there is one thing that this election teaches us, that seems to be as nearly certain as possible, it is that the tactics employed by capitalist political organizations to ensure unity, harmony, and concerted action, are not and cannot be applicable to a socialist movement.

It is quite possible for the "leaders" in the Republican and Democratic parties to make bargains, truces and agreements, in the name of their respective parties with a tolerable cer tainty that the great mass of the voters attached to each, will ratify their action at the polls. The conscious strength of these parties is embodied in those leaders, while a mass of stupid and apathetic voters merely obey their behests without question. On the con trary, the conscious strength of a so cialist party must lie in the rank and file of the individuals composing it.

It is worse than useless to cry: Peace!" 'when there is no seace. It is a waste of time attempting to induce certain individuals to "swing their followers" into line for united action when it is recognized that they secured by saying. "Let us be wise; let us get together and present a united front to the common enemy." The most efficient method, in fact, the only methed, by which this result can be obtained is by putting every atom of energy possessed by the party into agitation for socialism, and await the result

candidates on April 2d, while the combined of the other two bodies barely ing the campaign. Had time been wasted in calling attention to the iniquities, real or supposed, of other socialist parties on the political field, the probabilities are that no one body would have secured a marked numerical preponderance, while the total socialist vote would have been much

smaller than it was. If these differences must arise and run their appointed course, it will be found that the party which makes the greatest and clearest socialist agitation. will ultimately compel unity as a consequence of their efforts in that direction and as the results of the recent sition, there is little likelihood that the Socialist party will abandon it to in dulge in internal controversy and vain efforts to secure unity by approaching individuals with proposals to that effect. Socialist unity must come through socialist agitation, and an ever broader recognition of the fact that the

The little capialist will be still paying the taxes and the big corporations will be still run-ning the government, and the laborer will be still producing the wealth upon which both capitalist classes are living,

The suppresion of the Cuban newspaper "Discusion" for the publication of a cartoon representing Cuba crucified between two thieves, labeled respectively President McKinley and Governor Gen eral Wood will come as a shock to those shortsighted though patriotic American citizens who urged the war with Spain in the name of "humanity" and "Cuba Libre." McKinley and the class he represents have been continuously represented as plunderers and thieves by the opposition political press in the United States, but there was n talk of suppression in such cases. It is when a Cuban journal makes a similar representation. In such case the interests of the American capitalists are di rectly aimed at, and no reply being possible which gould satisfy the Cubans, suppression is resorted to for the purpose of compelling silence.

Not so long ago every large city in the United States, where a municipal election was pending, started a "vice crusade" in the interests of "public morality." The efforts of Chicago reformers in this direction dwindled perceptibly when it became apparent that s between Harrison and Hanecy, the capitalist class had no particular choice, and after election it promptly however, the sham as it fizzled out. seems to have undergone a peculiar transformation. All the efforts that were directed against prostitution, intemperance, blackmail, "divorcing the police from politics," etc., are now conpectoration in street cars and public already been arrested and fined. In a very short time even this, the last vestier of what was to have been a "grea moral awakening," will have disappeared, to revive again when demande by the political needs of capitalism.

An examination of the recent censu eturns from India show that fully 5,000,000 human beings have perished from hunger during the last five years, in that country, or at the rate of one million per year. That starvation and capitalist "civilization" are inseparably bound together is proved by the fact that similar conditions, though in less degree, exist in every capitalist country world, and it is even more observable in those localities where "pro gress" is thrust upon the inhabitants with sword and flame. The British occupation of the Transvaal, for instance remnant of the population, while the presence of the forces of the "powers" n Northern China was sufficient to ring such privation that cannibalism in the occupied region became, so to speak, the order of the day,

Monday, the ist of April being customarily known as 'April-Fools' Day," was fittingly eciebrated by the majority of the working nes in this city, who, under the guidance of those decoywechers of capitalism (the leaders of pure and simpledom) again acted the foll of the meek, unsuspecting alsespand blindly followed these traitions bufforns into the capitalist voting shambles. This, notwithstanding that there was almost a complete socialist ticket in the fisti, represented by real workingmen almost to a man. However, our first essay into local politics caused to fittle amount of discussion and cousequently much anxiety to the old parties, not so much from fear of our carrying the city, but by the very fact that the socialist idea had taken on a concrete form in local affairs, and would have to be reckoned with in the future as a factor of no mean importance. Amongst other measures formulated in our municipal platform was one demanding that the city should give employment to laborers seeking it when private employment could not be obtained; also that the city should parties greatly, and they took very hasty action in assuring the unions of their disinterested solicitude for their well-being, although up to the date of our party's appearance in the political arena, both Republicans and Democrats had always treated the unions with indifference and contempt. A Century of Economic Development.

Translated from the Polish.

(Continued from last week.)

With the development of the new be of ever greater importance. For the sic handicraft and peasant form of production, commerce was not indis-pensable. The peasant and the artisan could buy their means of production di-rectly from the producer and sell their commodities directly to the consumer. The more capitalist production develops becomes the evolution of commerce.

as the maintenance of the population, depends upon the normal condition of commerce. To-day its significance for the entire social life has grown to dibecoming less possible; in case of its would bring to the people much greater destruction than even the most powerful guns out the battlefield. Of no less importance became the development of credit. The latter has entirely changed its coonomical significance. The mediaeval usurer was nothing but a parasite on the body social. The credit of the nineteenth century grew to be one of the most powerful levers of economic evolution. Financial institutions and banks became the reservoirs into which there flows all the moneys of the noncapitalists, and from which they com into the hands of capitalists for the purpose of enlivening production and commerce. Thanks to these reservoirs, alike, with the savings of servants and of the capitalists, enter into the process of production and commerce, and be-come thus capital. On the other hand, the surplus capital accumulated by the capitalists themselves, who are not in a position to use them in productive enterprises, passes through these reservoirs into the hands of other capi-Thus the least stimulation is able to spread industry more quickly than ever before. But, on the other hand, credit is to-day more sensitive than ever. It serves not only to enliven the process of production and to sharpen the economical contradictions, but it shakes also the foundations of the whole mechanism of production at the nent when the creditors, in fear of sea, begin to withdraw their capitals

The ever closer connection of com-merce and credit with production has not only caused the latter's previously inheard-of development, but has also brought about a further division of eco-nomic functions. The merchant comblined in his person, not only the func-tions of buying and seiling, but he also imported commodities, divided, assorted, and stored them. Now there not only exist separate wholesale and retail divisions, but also separate trans-portation and storing enterprises (transportation companies' elevators and store-houses). At last buying and have so largely separated from the other functions of the merchant that "on change" goods that are far away, or have not been produced yet, are bought and sold; one sells commodities he does not own, another buys though he does not need them. At this place we should also consider the de-velopment of the bank's functions. If usly we could not imagine a cappreviously we could not imagine a trailist without a store-house of gold, so now the functions of paying and the administrareceiving, as well as the administrations of money passed into the hands of the banker, by whose mediation the modern capitalist regulates all his money transactions, notwithstanding all the different economical functions have grown to be entirely separated and become critically independent from each other, so is this independence only

With the developmen of industry grew the importance of the industrial capital, which is to-day the main source from which comes the wealth of not only the factory owner but also that of the whole capitalis class. Whoever desires to understand the present true character of capital, must accept as the starting point of his studies the investigation of industria capital divides itself between several categories of the proprietary class. A part of that income goes to the land-owners under the name of ground rent The ground rent owes its existence not so much to the natural limitation of the

The whole present production, as well earth's surface, that cannot be creased at will, as to the fact that land, so necessary to agriculture and indus trial production (building-ground for factories, etc.), became a monopoly, be fore it was taken for the above uses. The capitalist wishing to build a factory of house must rent the ground or buy it, and is thus compelled to divide his profits with the landlord, or, to us the current language, to pay him the

> For this reason ground rent is the righer, the more desirable, becomes the land to the industrial capital, the nearer to the industrial centers is its situation, and reaches its climax in the modern populated cities, where it causes

On the other hand, land, under like conditions, brings a higher income the more fruitful it is and the better its situation. Therefore, by reason of the economic evolution of the nineteenth century in all the civilized countries there took place a rise of rent, and the development of the agricultural credit land with a higher ground rent could not bear the competition of the land of the industrially undeveloped countries, where the ground rent was lower.

.The further consequence of the ec omic evolution of the twentleth cent ury was the increasing of profits as the labor and the fall of the rate of interest from capital, or, to say the same thing in a different way, the lowering of income front a given unit of capital At present, for the purpose of con-

ducting an enterprise, a greater amoun of capital is necessary than previously, an amount that is constantly increasing, proportionately to the development of technics. For this reason the amortisation of the ever-larger capital becomes slower and the rate of interest smaller. But this does not mean that the capitalist draws a lesser income, but that it is becoming ever more difficult to the employee the control of the control of the control of the capitalist of the capitalist draws as lesser income, but that it is becoming ever more difficult to the capitalist to control of the capitalist to capita cult to the small capitalist to compete with the big one. Because, even if the rate of interest should be limited to a minimum, the millionaire will always have yet a big income, and the larger his capital, the greater will be his in-The fall of the rate of interest leads to ejecting, the small capitalists from those fields of production or exchange in which that fall has taker place. Therefore, the immediate result concentration of capital.

The small capitals thus ejected, either disappear entirely (as during the commercial and industrial crises) or turn to the fields in which production on small scale prevalls, and in which create new branches of small produc point of evolution is reached, great capitalistic enterprises do not increase in number, but rather decrease. When enterprises have attained colossal dimensions, there comes a time when these great capitalistic enterprises be gin to combine into one organism of production or exchange. While there superficial, a legal one.

In reality, however, the dependence to the usefulness of competition to the narket, competition is a hindrance, and regulate production in a manner, not to prices at a certain profitable level.

the nineteenth century—the disappear nce of the small capital from the mat fields of the economic life on the one side, and on the other the concentration of the capitalistic enterprises, with the ndividual capitalist disappearing.

No century has ever seen such a magnificent development of the productive forces as the nineteenth century But this development has marked a road full of heavy sacrifices and catas rophes, in which number the commer so be mentioned. They are always caused by overproduction, by the tendency peculiar to the capitalistic systent to produce and reproduce on an ever larger scale and the ever larger production of commodities. The coninuous expansion of the markets, th restian of the international market etc., have favored the growth of production and exchange.

With the growth of production and the greater distances of the market, nomic mechanism be and more sensitive to the slightest ir regularities and disturbances. Favor able circumstances that cause the ice to call into existence a number of other branches, but, on the other hand, some disturbance in one branch (the closing of a foreign market, for instance) is liable to produce a sudden crash in all the fields of economic life. In such times there took place a terrible loss of energy, commodities lost their value, small capital vanished, production fell, only to begin its race new at a much rapid pace. Beside the sudden crises, which sweep along the field, of production like a destructive violent gale along the sea, there ought to be mentioned the less terrible chronic crises, with their chronic overproduc tion and never-ceasing loss of energy,

But commercial crises in the nineteenth century are inevitable; they are simply a conse quence of the law of accumulation of capital, and the necessity of continu ous production. The productivity of lahor grows incessantly; the big capital enters ever new countries; wealth ital and invest in enterprises, increases The ever-increasing market is the nec essary condition of capitalist production, a condition which evolves from the constantly accumulating capital always kept pace with the growing of capital, therefore, during the nine teenth century there very often prevalled long chronic crises that have spread much misery and suffering mong the working population and had not less a hurtful effect than the sud-den and brief crash. The socialist movement is an nomic one, and it enters the political field simply as the means to an end. The means are the organization of the workers into a class-conscious political ody for the subugation of the political powers (government) for the ure of its class; the end the collective ownership of the means of production and distribution, the organization of society in the interests of the working class and

the abolition of class distinctions. It enters politics simply to storm the citadel, the bulwark of the present system, and that is the law-making power namely, the government whose every branch, executive, judiciary and legislative, is used to further the interest of the ruling, owning class, namely, the apitalist class.

It chooses to enter politics as it wishes to proceed along the line of least resistance, knowing that the telligent use of this ballot, change the conditions in society to suit their own

Socialists point out that classes exist to-day. They did not call them into existence, nor do they try and array inherent under the capitalist system and the very system itself arrays the against each other. At every point of contact is there a clash of interests betagonisms. The name under which it is knewn, namely, the wage system, presupposes classek namely, those who accept wages and those who give wages. Now, it must be apparent that any man who can employ himself, or sarjes which others must use, such a factories, workshops, mines, steam-bouts, railroads, telegraph lines and land need not work for wages. They arttic; they appear as advocates of secorder to propagate distrust and even natred against the entire movement. Some of these precious friends of labor avail themselves of national distinctions to incide workingmen against workingmen, other turn religious dis-tinctions to the same account. However, the most intelligent and eminent among their number try to create discord between the trades union and the Social Democratic movement. These people forded by England. While on the continent of Europe the Social Democracy pushes alread irresistibly and victoriously, in spite of special arbitrary legistation and of prescriptions, in spite of June butcheries and of bloody May weeks, the Chartist movement in England came to naught about the lime ing ground, and so it happened that nowhere does the capitalist class wield to-day the political power more su-preme than in England, the country lend, and unless these are in sight the Europe and that their argument and Germany.

Of this nobody was earlier convinced than Marx, who already in 1847 called attention to the English pattern of trades unions; and, if developed so quickly, this is due above all, to the "International" and to the Social Denocracy, both of them influenced most powerfully by Marx's teachings.

But if we have to determine the refation between trades union and Social tions of the working class, the socialist Democracy, between trade and class litical struggles, in that case we can earn from the English nation only how that relation should NOT be.

Never has this become more evident than just at present, when, in conse-quence of the collapse of the liberal party, even the PRETENSE of a political influence on the part of the English working class has disappeared and when English trades unlouism is anxlously striving to promote the forma-tion of a new independent working-men's party, in waich endeavor it finds itself, however, most hampered by the instincts it itself has fostered, the in-LOCAL NEWS AND NOTES.

It has often been remarked that the not go hand in hand with an independent political movement, i. e., where it is not saturated with socialist thought, acquires somewhat the character of the

It has also frequently been pointed out that this guild-like character shows itself first of all in that the workingand constitute, similar to the old-time ocial mire, the quicker it elevates it-eff. Where, however, the trades union movement is at work in the closest inmovement of an independent labor party, there the trades unionists come party, there the trades unionists come to be the chosen champions of the entire protestariat, there they improve, along with their own condition, that of their class. The increase of duties, resulting therefrom, is compensated by having the economic and political basis of their achievements rendered more solid than that of the achievements of a labor aristocracy. The more such an aristocracy of labor feaves the unskilled, unprotected, unorganized parts of the projectoriat to shift economically for themselves, the more these come to be the breeding centers of scales whe

> Then again, of course, England also shows us how much the success of the Social Democracy stands in need of the foundation afforded by a powerful trades union movement. Though, as sured by people that have been Chartnection between Chartism and trades unionism than modern historians of trades unionism suppose, it is a fact that the time when Chartism flourished was one of depression for trades unions; Chartism had no strong and steady economic organizations to fall back upon, and that explains much of the unsteadiness and precariousness of its development.

Modern English socialism, however, placed itself in its beginnings in pretty strong opposition to the trades union movement; a stand that may be easily explained, considering the former conservative character of the trades unwrong and of no advantage to the English Social Democracy. But in the course of time the trades unionists have lost more and more their antipathies to socialism, and, vice versa, the socialists have ever more been losing their antipathies to trades unionism, so we find at an ever-increasing rate the same people at work in both camps, and but surely a relation between the two tional economists on the continent of to the one that has always existed with

The isolation of the trades unions from The isolation of the trades unions from the balance of the proletariat has not only the injurious effect of splitting and weakening the latter, but it also car-talls its chances of development. We have compared the isolated trades unions to the journeymen's organiza-tions of old—the guilds. What has be-

come of the latter? They have disap-peared along with the system of guilds without the least share on their part in surmounting this system. Their prosperity was linked most intimately with that of the masters of the guilds; the downfall of the later meant that of the former. The same fate is menacing the isolated trade union; it can only prosper if the capitalist system of pro-duction at home continues to progress. It progress is very closely bound up with constant and swift enlargement of the capitalist sphere of power and exploitation. "Heart Culture" vs. Class

Ernest Loomis, who is called father of heart-culturism, and who publishes a magazine on heart-culture, says that Chicago, commencing this year and continuing for two or three years, will play an important part is startling events which are imminent, To pass through this time of trouble in safety "love in abundance" will be necessary," says he. "Where thy treasure is, there is thy heart also," sayeth the scriptures, and it is doubt hearts of the class which Loomis is trying to reach. On the other hand the love of life, which, to be sustained must require the treasure the treasur with the hearts of a parasitical class on it impels those who have that life obtain that treasure, and that heart eart of the working class). That is th "love" which is necessary to be possessed of by the working class in order that the period of "startling events" may be passed through in safety.

Authority to Regulate Personal Habit a Gift From Workingmen to the Capitalist Class.

Perhaps one of the most valuacle vices that capitalism must render to its economic successor may be found in the fact that, in its development, the subjection and slavery of the working class becomes always more and more apparent. The old ideas of personal liberty, which it must be admitted had some foundation to rest upon prior to the concentration of capital, are being exploded upon all sides by the restrictions and regulations imposed upon the working classes, through the exigen-cies of capitalist profit-making. As the system develops, the "reserve army of tustry" becomes ever larger, the appetition for the privilege of working ever keener, and the sifting and sorting of the selected ones is carried on in a manner which every year bees more humiliating and degrading. Never was the truth brought out mor learly that the laborer, in the eyes of the employing class, is not a man, but commodity, than at the present.

Applicants for work in most of the

large establishments must submit to an inquisition, in which their most pribeen fortunate enough to secure a master is compelled to submit to a series of rules and regulations of perers, that the fear of want and hunger alone makes bearable.

A few days ago a workingman, who name for good reasons must be with-held from publication, brought to this ffice, a verbatim copy of a circular, issued by the Chicago and Great West-ern Railway, which perhaps will show better than anything else how ther power which they possess over their wage slaves. And, paradoxical as it may seem, there can be no question but that many of the employes of this corporation, whose votes were influ-enced in the recent election by the campaign charges of "blue laws" campaign charges of one of the brought against one or other of the capitalist candidates, will submit to the capitalist candidates. "blue laws" prescribed in this docu-ment without the slightest idea that ild be voted out of existence by nited action on the part of the work-

Dubuque, Iowa, March 1, 1901. CIRCULAR NO. 17.

The term "employe" means engineers, firemen, conductors, brakemen, yard-masters, switchmen, call boys, agents, operators, clerks and other office employes on this division.

Supr. C. G. W. R.Y.
Our informant states that, while this pronunciament o has evoked a considerable amount of carefully concealed "indignation" from the "free men." for whose guidance it was drafted, it will, nevertheless, be universally accepted as a law from which there is no appeal. And this is as it should be. Those who have voted into the hands of another class the power to regulate their personal conduct in this fashion, have no just ground of complaint, when that power is so exercised by those to whom it is given.

of course, more unproductive, than the miscalled socialism which advocates a ward, and so on."

This sounds well for a beginning,

and will be accepted by every socialist as truth, with some reservation. That there may be nothing more stupid than the above may possibly be true, but there are ideas about socialism which are equally stupid and unproductive

"Every intelligent man must study

lion socialists in Germany. Three years ago they polled with a limited franchise nearly two and a quarter million votes. They have a platform stating the aims and objects of the socialist movement, which has been drawn up as clearly and distinctly as the best ability in the party could devise. That platform would be as copted by every socialist in the world It is procurable everywhere and the Chicago American would not experience the alightest difficulty in procu ing it. It is even highly probable that there are copies of it at this momen in their office. But will they publish it in their columns and inform their readers editorially that it defines so cialism according to the ideas of the greatest political party in Germany? No. They would not entertain the idea for one moment.

Every civilized country in the world has a socialist movement, with party platforms and definitions of socialist which are practically identical with each other. You could not get the

owaership, the Postonice, trades un-ions, the "Golden Rule," organized charity, "eternal principles," the "com-mon people," and a thousand and one other miscellaneous oddities of the same nature but socialism will be same nature—but socialism will be avoided as if it were a pestilence. The Chicago American cannot afford to meddle with the genuine article, and will construct a number of counterfeits, all different from each other and all specially designed for the confusions. The sim is, if possible to the confusions of the specially designed for the confusions. The sim is, if possible to the confusions of the specially designed for the confusions. The sim is, if possible to the confusion of the sindividual who attempts to TIONS. all specially designed for the confu-sion of the individual who attempts to

atudy "socialism" from them.
It is true that all "intelligent men should study socialism," as the American says, but that statement bars out those of its readers who expect an exposition of socialism in its columns. An intelligent man who wants information on that subject will not waste time in looking for it in a capitalist

newspaper.

Before concluding, it is perhaps only fair to our readers to give a definition of the central truth from which social-ism springs and which is accepted by ism springs and which is accepted by every political socialist party in the world. We quote from Marx and En-gels, two socialists whose writings and views are not likely to be discussed in the columns of the Chicago American:

elected Sam Jones mayor of Toledo a "in every historical epoch the pretion necessarily following from it, form the basis upon which is built up and from which alone can be explained the political and intellectual history of that epoch; that consequently the whole history of mankind (since the stupid persons, which is an altogether different thing If he were ignorant enough to really believe that these things that he mentions were sociallissolution of primitive tribal so holding land in common ownership has been a history of class struggles contests between exploiting and ex-ploited, ruling and oppressed classes; that the history of these class strugto brand the "dividing up" theory as stupid, he also knows enough to know gies forms a series of evolutions in which, nowadays, — stage has been reached where the exploited and op-pressed class—the working class—can not attain its emancipation from the sway of the exploiting and ruling class that it is not what he represents it to

proposition as a basis? No, it will not even mention it, although it contains the key to the whole philosophy of so-cialism, and is accepted by every so-cialist party on earth.

How "Social Riots" in "Best Circles" Are to be Rebuked.

NO "VICE CRUSADE" REQUIRED

Conditions Which Produce "Easter Offerings" From Gambling Tables Must Not be Disturbed.

A New York clergyman complains that the "holy week" has been marked by "social riots" in that city and asserts that a goodly proportion of the so-called "Easter offerings" came from winnings at the gambling tables. He gives the fellowing incident as an illustration: -

which are practically identical with each other? You could not get the Chicago American to notice one of them, except perhaps to mutilate and falsify it.

But nevertheless the American is going to discuss socialism in future issues, as may be learned from the concluding paragraph of the editorial:

"For the information of our readers we have tried and will try in the editorial columns of the American occasionally to review as intelligently as we can, and without any prejudice, the various movements of the world that come appropriately under the heading of socialism."

That paragraph is false from start to finish. The American has never discussed socialism, is not doing so now, and does not propose to do so in the future. Their incubrations are written especially for stupid persons, for the purpose of adding confusion to stupidity. They have not the slightest intention of writing as "intelligently as they can," and any of their paid writers who would be foolish enough to do so would speedily learn that things are not always what they seem. There will be no writing on socialism for the will be no many the process of a start to the conference, expressing unprise at merital conference, expressing whence the money came.

The same clergyman reports further:

not always what they seem. There will be no writing on socialism for the "information of their readers," as they declare, but there will be writing on things that are not socialism for the confusion of their readers instead.

The changes will be rung upon Louis XI., Oliver Cromwell, the Boston tea party, Sam Jones, Tom Johnson, theosophy, metaphysics, religion, asserthise, dean, streets, municipal tracested in it.

The same clergyman reports further:

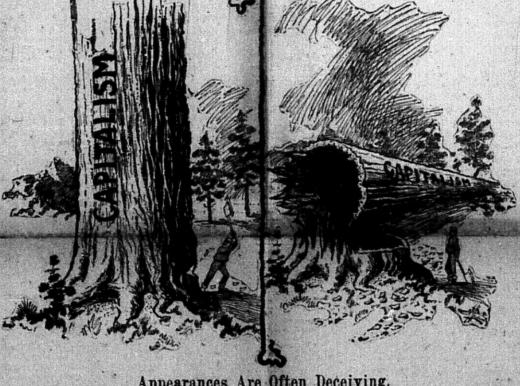

Two unmarried women, officers in a West Side congregation charity, have been making a practice of attending receptions, noting the winners and calling upon them later for contributions. Easter vacation proved a harvest, and, while the clergyman reports for the west, and the called the total provide a harvest and the case did not know the amount they had raised, since it was not put to on the collection plate, he said the charity in question had recently an amount of the recept of considerable sums of money from the young women interested in it.

Special May Day Issue.

In last week's issue the notice of the special May day edition of The Workers' Call contained a serious error which calls for rectification. It was stated that orders for bindles of that issue should reach this office not later than Thursday, May 2d. This should have read "Thursday, May 12d. This should have read "Thursday, May 12d." The should have read "Thursday, May 2d. than Thursday, May 2d, This should have read "Thursday, April 25th," as the paper will appear on Saturday, April 27th. All comrades and party members are urged to see that their branches take as many copies as they can possibly use, as a special effort will be made to make this edition the most striking and attractive that has yet been published, and the management hope to surpass all previous records of copies sold. Many well known socialist writers will contribute articles, and the edition will contain a large five-column cartoon specially

The sort of job that he holds demands that men write things that they know to be both false and stupid, so no blame attaches to him. The policy of the paper is his guide, and that policy demands that socialism be misrepresented.

The editorial states further that the greatest political party in Garmany is the Socialist party. Although its members are poor men, their enthusians makes up for their poverty, and she fund which they raise annually in their political campaign vastly exceeds any other in the empire.

Tha Baltimore man doesn't know his business, or he would never have made a break of this sort.

A PRESSING NECESSITY. It may be well to call the attention

of party members and readers of the Worker's Call to the fact, that as is usual after elections have been decided, the energy of the comrades in circulating party literature relaxes to some extent. This condition of affairs is clearly discernible in the diminished amount of subscriptions reaching this office since April 2, and it is imperative that the activity of the comrade should be renewed as soon as possibl to insure the continuance of the party organ. Some time must yet elapse before the open air meetings are in full swing, and it cannot be better utilized than in increasing the power and scope of the party press. With over 1,200 party members this task should be light if the work can be properly apportioned and every member tak hold to the best of his ability. The seguring of only one subscriber per week by each party member does not appear a very formidable undertaking, and yet were it put in operation the financial difficulties which have intermittently beset the publication of the party organ would quickly vanish. Open ducted always creates an increased de mand for party literature, and prepa rations are being made to make it a marked feature during the coming summer. In the meantime our comrades are urgently requested to put and cannot be neglected without serious danger.

THE INDEPENDENT LABORPARTY. While little is yet known regarding the "Independent Labor Party" which is said to be forming in New York, it will be interesting to Socialists to watch the development of the idea. If newspaper reports are to be trusted the nucleus from which the party is to spring into being is sufficiently large to warrant the belief that a new phase in the labor movement is about to make its appearance. Twenty-one of the largest labor organizations connected with the United Council of the building trades of Greater New York. and claiming to represent 60,000 men, departure-if new departure it be. The value of this movement will de

pend entirely upon the meaning to be "sacred person." The more ignorant given to the word "independent" by ept without question the murderous it. If by "independent" it is meant that the association shall hold relignot altegether certain that the average jously aloof from the politics of either of the capitalist parties, and rely upon on it there is a future for it in working and ultimately merging with them. If, on the other hand, by "indepen dent" is meant acting as a "balance of power" with either the Republicans or Democrats in order to secure "concessions," it may be confidently as serted that failure is inevitable. The capitalist politicians have always proved more than a match for the workingmen when the latter have been duped into playing this game. It requires only a superficial glance at the history of the labor movement to understand that in the numerous cases in which this policy has been adopted the workingmen instead of acting as a "balance of power" became merely-a shuttlecock to be batted to and fro between the expert political players, rep-

> resenting capitalistic inferests. These remarks are necessary because it is not yet quite clear with the mea ger information at hand as to which policy is to be adopted. It is stated that the party is to "fight their enemies who have dealt them a terrible blow by the annulment of the prevail ing rate of wages and the stone dress-

It is not at all difficult to secure the promises of capitalist - politicians regarding "labor legislation" to be enacted, and it is admitted that in varione therenos such laws - have cement of these laws has been eglected, and when an attempt has een made to secure their enforcement, a complaisant body of legislators have always been found to declare them "unconstitutional." and the entire farce has necessarily to be acted over and over again without securing any tangible result.

The capitalist politicians are never does not weary them, they being spe cially trained to play it. The workingmen, on the other hand, should have learned by this time that their efforts must inevitably be neutralized in the attempt to play two sham opponents against each other, just for the reason taat their attitude of mutual opposi tion is only necessary to render the struggle of the workers for better material conditions impotent and abor-

tive. If the Independent Labor party is to accomplish any change for the better in the lot of the workers, it must read into the word "Independent" the only possible meaning it can bear, and determine that it shall hold no paries whatever with the political tools of the capitalist parties. They should be able to see that the path of the labor movement in all lands is strewn with the wrecks of organizations which started out with sanguine hopes of success, but perished through becoming mere adjuncts to the tail of the capitalist kite. In short they must recognize the truth which Socialists long have declared that the emancipation of the working class must be the act of the working class itself. The question is now before them-"How?"

PUBLIC EDUCATION.

One of the fundamental demands of the socialists in all countries has been for an educational system that will provide for a complete and adequate education for every member of the community. One of the strongest complaints that they lodge against the present system is that the vast fund of knowledge which is already at the disposal of man is monopolized by a few, and that therefore its possible benefits to mankind are restricted to a very small minority of the population. The socialists demand that this knowledge shall be diffused throughout the entire community and used to lighten the burdens of all the people. instead of being confined to laboratories and libraries and used simply as a means to maintain the rule of the few and the exploitation of the mass.

Hence it is that the socialists demand that provision be made for the education of every child in the com munity. They demand that all possible obstacles shall be removed to the attainment of such an education, and finally that the education itself shall be of a character to develop the entire personality, and not a mere process of stuffing and preparation for future submissive slavery.

As has always been the case with all measures advocated by the socialists. bourgeois reformers and politician have pretended to champion these ed ucational measures. And as is also in variably the case, whenever an opportunity is offered for any positive action along these lines the socialists are left to fight the battle alone. Thus it has happened that while the Social Settlement, Teachers' Federation, Kindergarten Associations, Civic Federation and reformers in general have always advocated such measures, now secure them, all these various bodies are discretely silent and it remains for the socialist laborers to alone agitate to the end that the introduction of such bills shall not become wholly a farce.

Indeed so little has been raid by these friends of education that few people are even aware that bills have been introduced into the Illinois legislature, which if enacted into law would go a long way toward giving very child in this state an opportunity to fit himself for manhood and citizenship. These bills provide for the maintenance of kindergartens in all the public schools of the state, for the establishment of libraries in the larger villages and cities, for the transportation of children to and from the school, where their homes are too far distant to permit walking, for free text-books to be owned by the state and loaned to the pupils, and for a system of high schools which would make it possible for a much larger proportion of the children to obtain an advanced education. To be sure

opportunity to impress upon the workers of Chicago and of Illinois the ne cessity of uniting with the only party the first to cry quits at this game. It that has the courage to demand that the children of the workers of this state shall not be shut out from the possession and control of the treasury opportunity to gain an education. As to the merits of the bills there is absolutely no question. The premise that an adequate education should be guaranteed to every individual is so thoroughly demonstrated as to admit of no denial. That such an education can be secured without all these meas ures and many additional, is equally certain.

The opposition to them come wholly from two sources,-one open the other concealed. The first is from the parochial schools which see their material interests threatened by the appearance of efficient public schools These are raising a great hue and cry, but as their motive is so apparent they need no further notice. The other source of opposition is the general hostility on the part of capitalism to the growing intelligence of its slaves. This hostility does not show itself in the newspapers nor cry from the house-tops save when it uses the religious bodies as mouth-pieces. It works quietly and gains its ends by a policy of suppression. This is what is threatened in the present instance. The bills will be quietly smothered in committee and nothing more will be heard of them, save when at some fu ture time it is necessary to throw dust in the eyes of some branch of the workers by telling them how hard Mr. So-and-so worked to secure better educational "privileges for the masses."

Oficial Election Returns.

The official returns of the socialist in the recent municipal elections show that the candidate of the Socialist party, John Collins, received 5,334, Hoyt (Social Democratic party) 2,043, and Pepin (Socialist Labor Party) 679, making a combined total of 8,196 votes, The returns for the Socialist Party ticket, by wards, are as follows:

The "intelligent" man who calls himself a Socialist, but who votes the ticket of a capitalist party because he is waiting until the Socialist vote grows bigger, no doubt expects that ignorance will lead wisdom into the Socialist ranks by force of numbers an advanced education. To be sure these bills fall far short of the socialist ranks by force of numbers that ignorance by force of numbers holds him in the capitalist voting ranks. It might be well to inform him that it will be children, which is demanded by any rational system of education. More-tower the socialists are fully aware that

> The question is not whether the reasury is to be looted, but rather who will do the looting. And it apparently ems that if the Cuban really "won't be happy till he gets it," he may make up his mind to accept his pilgrimage here below as a progress through "vale of tears." There are quite number of boys "too strong to as Mr. Dooley would say, who stand ready to perpetuate the unhappiness of the Cuban so far as the treasury is All looting and other concerned. And this looks all the more certain because of the action of the Cuban convention in rejecting the so-called Platt amendment. It has given the capitalist press of this country an oportunity to declare that Cuba has forfeited all its "rights" and that congress must now assume a "protecto rate" over the island in the interest of "good government" and unrestricted capitalist exploitation. And so the dream of "Cuba Libre" vanishes into thin air, to await realization when capitalism gives place to socialism.

In affairs relating to Porto Rico, how ever, Washington officialdom has had in opportunity to pose as a friend of "lower classes," which it has not the neglected to make the most of. A deputation of Porto Ricans, who came to the capital to protest against the Holander tax law, which was passed by the local legislature, have been turned down on the ground that they represented the rich land owners of the island, who were endeavoring to shirk taxation of their property and throw the burden upon the lower classes With righteous indignation the United States government rejected the plea of the representatives of the propertied classes and insisted that the tax must stand.

This stinging rebuke to greed is no juite so disinterested as might be supposed at first glance. Here is the rea on as given by the correspondent of the Chicago Tribune at Washington: "It appears that the planters are opposing the Hollander law, because it requires payment of taxes on land. This will make it unprofitable to hold large tracts of unoccupied land. > suicides were recorded as occurring on ast Friday in this city. Five of the tragedles are attributed to poverty and despondency through lack of employment, which is a pretty fair endorse ment of the competitive system, which "brings out the best that is in us." One of the cases was that a boy of 17, the sole support of his family, who had vainly tried for months to secure work, and, becoming desperate, sent bullet through his head. It really ooks as if the most correct measure of capitalist "prosperity" will in the future be found in the statistics of suicides amongst the workers.

The test of strength which seems to be impending between the workers and the iron and steel trust is important for the possibilities that may follow. The trust for stock jobbing reasons may yield for the time being, but the struggle cannot be deferred perma ently and the lesson must ultimately be learned. All the efforts of Social ists are not half so potent upon or-ganized labor as the disintegrating inluence exercised upon them by trust. PROFESSIONAL BEGGARS

by the Mendicant Who Piles His Trad

According to the Tribune of April 14 pastor and congregation of dale Presbyterian Church in Cincinnati. O., are at their wits' end be there are no "poor" in the par ish, and consequently the church members are deprived of the opportunity to exercise the virtue of "charity. They have gone into the highways and byways seeking in vain for sor but have one in want of "relief," found none such. To such straits have hey been reduced in consequence that "Ladies' Aid Society" of the parish determined to borrow 'poor" from neighboring parishes of even to kidnap them in order to justify their existence as an "aid" The prospect of living in a "beggarles Is so repugnant to thes 'good" ladies that they must have re ourse to unusual methods to procure what the "good" people of other cities consider a nuisance.

In the same paper an article appears n which. Chicago is said to be the mecca of professional beggars," and proposes methods for getting relief from, instead of giving relief to, the beggars in question. This is how the superintendent of Associated Charitles would proceed, according to the re

"The remedy for these impositions?" repeated Superintendent Bicknell. "It is in the hands of the people. Between now and sunrise temorrow morning the people of Chicago could break up street begging past all hope of resurrection. Simply for each citizen to resolve to give nothing to the

street alms-seeker under any consid-

eration would be the end of it."

So it seems that the "charitable" people of Cincinnati are suffering from a lack of the things that the "charitable" people of Chicago consider a nuis-ance. How can these things be? Is it possible that "human nature" is differ-ent in these cities? If a limited supply of beggars is a desirable thing, why should an attempt be made to get rid of all of them in Chicago? Suppose it should succeed, would not the people of Chicago be reduced to the lamentable condition of their Cincin nati neighbors?"

But there is after all no contradic tion involved. 'The "Ladies' Aid Soclety" wants beggars all right, but not street beggars. The "charitable" peo ple of Chicago do not object to beggary as such, but to the form it takes when outside of their control. It is the street beggar that is objectionable the fellow who advertises his condition to all and sundry, instead of applying for relief from the "proper channels." to-wit.—the "Ladies" Aid Societies" and other organized bodies of the same And this individual is just as object

He refuses to be exploited, preferring rather to exploi others, which is good capitalistic doc-trine. He regards all efforts to discover whether he is "deserving" or not, as unwarrantable interference with his "business"—which it is from his standpoint. He is in some sort a vis-ible contradiction to the alleged prosperity of the community, a thing which cannot stand too much exposure. Hapreferesoliciting alms from the gen eral-public who don't know anything about him, rather than apply to thos who insist upon getting every detail of his inside history as a preliminary to determine whether they shall give him anything or not, for he is essentially a "business man" in his way and has no time to waste on irrelevant matters; the stock speech which he has prepared for all occasions must suffice. Finally he is objected to because he usually has a comfortable home and money in the bank, which if true, is perhaps the strongest reason why he should continue on the street, instead of getting himself tagged and numbered and listed on the books of an organized association, which will take good care that he doesn't get a chance to accumulate anything under their supervision.

Three suicides and three attempted suicides were recorded as occurring on ast Friday in this city. Fig. 21. tion during that economic stage, and his calling was by no means regarded as objectionable. The church recognized him as a component part of society and relieved his wants without "organize" him. But with the gradual growth of capitalism the profession fell into disrepute. The system which demanded organized con-trol of the laborers and perforce to deal with the professional mendicant nd it did so through legal regulation and restrictions which have gradually evolved the organized charitable societies of the present. Unorganized beggary is therefore out of harmony with the system of capitalism and is accordingly despised and contemned by the ruling class.

It is not difficult to understand why this Cincinnati parish may lack beg-gars. It is most apobably a so-called "residence district" peopled by the "better classes," in which an unorganzed beggar dare not ply his business under pain of instant arrest, and where under pain of instant arrest, and where the increased value of the ground pro-hibits the settlement of "deserving poor" in the locality. Such places ex-ist in all large cities, and as their at-mosphere is not healthy for the wan-dering mendicant that individual mosphere is not healthy for the wandering mendicant, that individual avoids them, preferring the "business" district as a more fruitful field of operation. And this perverse habit makes him a "problem" which 'organized charity" is unable to solve, and which is likely to remain unsolved until "buman nature" is changed or capitalism has passed away.

"The Strennous Lite."

The following description of an orgie which evidently escaped the notice of the numerous societies for the suppression of "vice" appears in the Chicago Inter Ocean of April 9th:

"Clad only in a narrow band of hiack velvet ribbon fastened around her shapely neck. Mile. Millie Delano-danced, to the delight of the best element of Milwaukee society Saturday night, and wound up the entertainment with a champagne bath.

"She appeared on the stage attired in street costume and went through her sinuous movements. The gray and bald heads had seen these in costume before, and, after watching her a few minutes, they turned to converse with each other and to sip their beer.

"In a little while those who glanced at the stage uttered exclamations of surprise which attracted the attention of the others. Mile. Defano had begun to disrobe in the presence of the audience, and was at the same time keepng step with the music. As each article of feminine apparel was cast aside the applause grew louder.

"It took a full half hour for her todivest herself of all she wore but the ittle narrow strip of ribbon around her neck. That was forgotten under the inspiration and excitement of the applause which had reached a perfect frenzy. Men who had for nearly half a century been in the center of the most strenuous of Milwankee life lost their self-control and cavorted about the hall like yearlings.

When the imposing form of Mile. Delano had disappeared behind the scenes, unable longer to restrain themselves, the members rushed upon the stage as one man and carried the dancer about the hall on their shoul-ders. This revelry was kept up until all were nearly exhausted.

"At the conclusion of the entertain-ment in the hall most of the members and the dancer repaired to the Oriental cafe for lunch. After the mest champagne was ordered and Mile Delano consented to repeat her performance. At the conclusion of the dance this time the members placed her on a table and, filling their glasses to the brim, threw the contents over her, giving

her a champagne bath."

Do away with him, and the capitalist would immediately secure the services of a harder taskmaster. Another false impression entertained by many is that contractor does not work, except to about here and there and collect his profits. While this may be true of a few, the great majority of men engaged in the contracting business do a eat deal of mental work, as well as physical-laying out work, 'devising mic means or gathering material and fitting It up in place, instructing incompetent mechanics, and, in fine, bringing order out of chaos.

In any social system such an overseer would always be essential to systematic progress. Theoretically the profit system upon which the contractor depends for an existence, might large dividends. Practically, with the few exceptions, he gets but a fair living wage for his efforts in the capacity of a man in charge of affairs. So it happens that the contractor is a laboringman and belongs to the laboring class, and is compensated for his bers. services by a profit system, which to him amounts to but little more than a wage. The process may be said to be The capitalist engages the contractor to secure the labor and col-lect the material and see that it is assembled so as to form the desired structure. His profit, or wage, is the difference between the amount given him and the amount expended for labor and material. It may be more or less, and frequently, in these days of competition, amounts to but very little, if anything.

In order to compete with his fellows on an equal feeting, the conscientious contractor desires that labor be given an established fee per day, so that in estimating, he may know what to de-Therefore I think I am right when I say that almost without excepgreat favor upon all labor unions in In fact, I have heard more opposition to the union from men in the ranks than from the contractors themselves. I think I am safe in saying that it is immaterial to the average contractor how high the scale of wages, or how short the hours, provided he is given reasonable assurance that they are

in length of time. Another great fallacy is the idea that centractors are fighting the mechanics, and as an example the recent lockout and strike is cited. Before the organieation of labor, unscrupulous contrac tractors may have beat down the wages of their employes, but, thanks to the labor unions, this is no longer possible, and both contractors and workmen rejoice in it. But this was not the cause of the recent trouble. The real cause, to my mind, lay in the desire of the contractors to bring about the very thing the labor unions were striving to attain, viz. stability in wages, length of working hours, etc. I do not say that the contractors had in mind the welfare of their employes, or were aware of the good they were doing, except in so far as it reverted to themselves. But the facts are that due to unscrupulous and shortisphted members of the unions, matters were getting in a chaotic state. Mechanics on buildings were becoming Mechanics on buildings were becoming arbitrary and unreasonable. Every-where there seemed to be a concerted it on the part of certain mem movement on the part of certain mem-bers of the unions to make as much inconvenience as possible and barass the contractor to the limit of his pa-tience. Chicago made the best showing of any of the big cities in the spring election. Chicago is all right and it is for union with a big U and the kind that sticks.

An alderman complains that street work is hampered because old men at hired as laborers. The old men should be shot. The capitalists are through with them.

The steel trust manager gets \$1,000,000 a year and he don't belong to any labor union. He is only looking out for his fellow laborers to see where he can cut their wages.

The labor unions have been success-ful in the past because their enemies were divided. Now they meet the trust and the only place they can hold it down is at the ballot box.

The building trade laborers of New York are talking about independent political action. Independent of their brother laborers they will accomplish nothing. In union there is strength.

Any copurade who will join this school as a regular correspondence station and do good work may organize a class of his own and we will furnish him the printed lessons in any quantity he may need them for the use of his statednix.

Such classes are now being undertaken in many places. The best time for meeting is usually og Stoday.

These lessons can be studied and appreciated by children twelve years old or over. Controle Mills will follow this series of lessons with a course fo? children as soon as he can arrange to do so.

Organize a Sunday School and we will supply you with the lessons.

Comrade Herman Groesbeck of Wyoming, in closing his review of the second lesson said;—"I here lessons are grand and I take the greatest delight in them. Better establish classes in every town of importance and then socialism will come by the overwhelming weight of public sentiment."

That is exactly what are want to do.

The best way to help the coming of socialism is to learn how to get hold of the subject. "by the handle" yourself.

I saw that nothing would ever solve the money short of an elemental eaval of the working masses, and that when such a movement came it would olve many other things besides; that the money question then would become only an incidental matter. This led me to study socialism, and I became a so

The study of bimetallism and government paper ey is an excellent preparation for this transition. A man who can see that a gold dollar, though of fixed weight, is not at all times and under all freumstances the same dollar, is in fair way to see some other things. Moreover, a lawyer can see, if he re-flects a little, that legal and political stitutions are amended and changed on time to time to correspond with anges in economic and industrial additions; that economic relations are in reality the basic relations of human ty; that legal relations are only the shadow of such economic relations; and that after all the "business men" are only acting in self-defense in as-serting secretly or openly, as exigencies lose a leaflet in which this idea is satisfactory philosophy of history that has ever been suggested. It is the only nce of politics or science of gov-nent, a study which I believe you have endeavored to promote in some of our colleges. Dear Sir and Comrade:
Pursuant to the action of the late
national convention of the Social Democratic Party, with headquarters at
Chicago, Ill., held in said city, beginning
January 1tth, it becomes my duty, as it
is my pleasure, to advise you, and
through you the party you represent,
of the approval by referendum vote of
the membership of our party of the enclosed resolutions adopted at said convention.
It is respectfully requested that you

Dear Sir and Comrade:

I recleved a certified copy of the call
for a unity convention of all organized
socialists of this country, adopted by
the last national convention of your party, as well as your communication of
March Eth. 1991, advising me of the
fact that the said call had been approved by a referendum vote of your
membership, and agreeably to your request. I submitted both documents to

the National Executive Committee of
our party.

Our party has always stood for organised unity of all true socialists of
the United States, and welcomes the
stand taken by your convention as an
important step towards the accomplishment of that great object.

While your party was voting upon
your call, our party, by practical unamilous vote, adopted a resolution, a copy
of which I enclosed and which, you will
notice, calls for a general convention
of the socialists in terms similar to
those in your call. It is with great
pleasure that we exercise the authority
conferred on us by the said resolution
and accept your invitation for a joint
unity convention.

We have appointed comrades Greenbaum and Putnam of St. Louis, Mahoney and Hamilton of Indianapolis and
Heyes of Useveland, as a committee to
your party in all necessary preparations
and arrangements for the convention,

In advising that course, we follow the example of our comrades in all European countries on similar occasions, and do not in any way offend against the principles of democracy within our ranks, as the party members have opportunity to manifest and enforce their desires in electing and instructing their desires in electing and instructing their designs.

Heating in 12th St. Turner Hall and Hear The Voice of The Workers on Public Education.

The attention of every workingman and friend of education should be called to the fact that there have been recently introduced into the legislature of the state of lilinois a number of bills relating to education, of the greatest in terest to the laborers of this state. It is generally admitted that every child be given the very best facilities possible to secure an education, and further that such an education to be in any sense adequate should commence with the kindergarten and include at the very least a high echool course, ipanied at all stages with ma nual training, in order that hand as well as mind should be given the fullest opportunity for development. Now it a young man who assured me that he so happens that the bills referred to understood the Chinese language deabove, taken as a whole, provide this very thing in a fairly adequate man-

At the present time it is a matter of for text books, if these are to be in any sense adequate to the requirements of modern education, is so great as to make it impossible for large numbers of children to receive any schooling whatever, unless those books are re-ceived by the child in the degrading role of an applicant for charity. Furthermore, if such books are supplied by the general government to all alike, the economy thus made possible re-duces the total cost far below what is possible through individual purchase. House Bill No. 223 provides "for the furnishing to the pupils free of expense or charge to them, all necessary textbooks", all such books to be the property of the school authorities and to be aned to the pupils as needed. In the country districts distance from the ol may prove an equal barrier with poverty in the city, and House Bill No. ides for what has already been done in many districts in Massachusetts and some western states—that in districts covering more than four square miles, conveyance shall be provided for the children to and from school.

One of the best established principle iern education is the necessity of kindergarten and manual training as a part of any thorough system of edu-cation. It has been repeatedly demonstrated that the introduction of such training not only gives room for complete developement of the whole perconslity, but actually lessens the time and labor necessary for the acquirement of what are commonly recognized as the requirements of education. se Bill No. 66 provides for the establishment of kindergartens "for all children between the ages of four and six years" and for "manual training courses for all pupils in all grades above kindergarten, including high school

COURAGE.

Take me into the heart of your dem ocracy men of America whose timid fot-steps move so warily along the lines of yesterday; for never since the solidarity of labor first dawned upon us was there such urgency for men of courage as to day is calling. We need in this marching, men of purpose, full braced for revolution - men who can carry the lamp of history in their pitchers up to Jericho, who by the union wage wars in the workshop, have been tried and sifted. The band of Gideon ye, who will not tarry by the river nor lie down; but swift on the path of purpose snatch your needs while running on to battle for lo, one flush of the races' solidarity has beaten through you and swept all lesser thoughts and tremors of the self before it out for ever. March, march, march, march ye, around the walls of the falling city. March and doubt not, thick though they frown, and after each election's march around they be unstirred yet march again, the sevenfold term of evolutions believing footsteps march, and as you go let blare the blast of and as you go let mare the blank of your class conscious warfare for the race and so, at last, just at the moment when it has slain itself, the city falls. IL

March, march, march; the social flame, the social thought if once it burns within you will snap your chair like threads on fire and set the limbs of all the wage slaves free. Long trained to hardship, sinewy, and sifted down to worker's trim, you work. FRANCE.

One of the arguments used by the theClericals in favor of the religious orders is that they spread the influence of France abroad. But it appears that this is not so. For instance, M. Boell, who has lived in China, has recently proved that the language taught by them to their pupils is not French at all, but English, and also that many of the orders engage in trade. In fact, in some cases they compel their converts to work for lower wages than they would get elsewere. There is quite enough of that kind of thing being done in Europe without our introduc ing it in the "backward East".

Mr. Bigslew is partly correct; but the "cranks" who will do the delivery act, will not be impelled thereto because the will not be impelled thereto because the consciences of public servants are being blighted, but rather because capitalism has managed to couple slavery and starvation together, and force them upon the mass of the people. These "cranks" understand that official corruption is an effect instead of a cause and that it will disappear when the cause (capitalism) is removed. They call themselves socialists, and Mr. Birscall themselves socialists, and Mr.Bige-low will no doubt find it interesting to watch the spread of the "epidemic."

The Real"Get Together Club'

It is stated that negotiations are pending towards the consolidation of five of the largest machinery manufac-turing companies in the United States. The proposed combine includes two Chicago firms, those of Fraser & Chai-Chicago firma, those of Fraser & Chai-mers and the Gates Iron Works Co. The Milwaukee firm of E. P. Allis & Co. is also included with two other Eastern companies, and the combined capital will amount to \$25,000,000. At present

upon the operative machinists and other workmen in its employ, which is equivalent to saying that combinations of capital do not promote combinations of labor, a statement that will be disproved by the first strike that eccurs

Matrimony and Competition.

The latest proposition for reducing the number of women engaged in un-healthy occupations is that the med en-gaged in the same trade should marry them. The extraordinary simplicity i cessary to evolve such a "remedy" this, makes one wonder whether its originator is not merely having some fun at the expense of these victims of capitalism. If so, the joke is a rather ghastly one . But it would seem that it was propounded in all seriousness from the fact that he heads of several firms engaged in these unhealthy industries have endorsed it, anaction that they never would have taken had they not recognized its utter futility. The originator of this idiotic proposalshould ask himself who profits by the cheap labor of these women, and whether they would be likely to approve of any scheme that would curtail their profits. If he can successfully solve this problem he might be on the road to fresh discoveries.

Proof Can Be Given.

The president of the Metal Polishers' Union is reported as stating that he had discovered the existence of an ex-tensive detective system organized for the disintegration of all unions. Laying aside the undoubted fact that the trust organizations will adopt this as a part of their program, there is plenty of evidence that such a system does exist, and that its circulars are periodically mailed to employers of union labor throughout the country, offering them news as to the inside workings of the unions and stating plainly that such information is gathered by paid spies. One of these circulars is at present in the possession of this office, and as some labor laders are represented in the daily press, as having no positive evidence that such a system has been established, they can easily have their doubts removed upon that score . Had we supposed that this was not already well known, the circular in question would have appeared in these column months ago.

Universal Bone of Contention

Sir Alfred Milner says the war in South Africa is over, and that now the Boers are "fighting mainly for sup-plies." As that is practically what the piles." As that is practically what the whole world is fighting about, the conduct of the Boers in this respect is by no means exceptional. But what Sir Alfred really objects to is the method of their fighting. Were they to fight with each other in the labor market for "supplies" as the world's working class do, Sir Alfred would not complain. The Boers, however, consider that they might as well take what "supplies" they need by force, as acquire them by wage labor from those who have by force stolen their country from them. They certainly have as good a "right" to ancertainly have as good a "right" to an-nex "supplies" as the British have to annex the Transvaal.

A Sure Thing Gambler.

A story of a fare game in which a big steel "magnate" was said to have lost \$50,000 was recently published by a New York paper, which stated that John W. Gates was the loser. Mr. John W. Gaiss was the loser. Mr. Gates in an interview with a reportier vigorously denied the truth of the story declaring that he had never been may the house in question. A denial of this sort is superfluous. Everybody knows that people of the Gates type don't de their gambling in the ordinary fare joints. They prefer to use the backs at the working class as a gambling table, as the chances of winning are more as the chances of winning are me favorable and all annoyance from "formers" is guaranteed.

Evelution of The "Patriot".

Only one "problem" remains to be solved in Luson, according to General Kruger fied the country, the authorities declared the war endthat nothing remained to be according to the second cattle. Brigano, maraness throat are the general terms by capitalism describes the "patriot" doesn't know when he is

MODERN SLAVERY

Conditions.

SERMON BY W. T. BROWN.

Takes William Lloyd Garrison as Text to Explain Attitude of Those Who Uphold Modern Slavery.

Rev. William T. Brown of Plymouth Church spoke last evening on "William Lloyd Garrison; The Intolerable Iniquity of Slavery." In introduction the system. On this point he said:

of this theme tonight, and that is to call your attention to the fact that slavery exists today as really as it ex-isted fifty years ugo in the Southern tates. I mean to say that our entire system of commerce and industry-its whole organization and operation-involves these same two classes -- masother. We do not call it slavery, it is true; at feast most of us do not. And of us regard it as the most natural and wise system in the world. And as the people of fifty years ago looked upon Garrison in his extravadenunciation of the system then existing, so the people of today look upon any one who indulges in equally strong language concerning our economic order. The social agotators of today are looked upon with the same feeling by the masters of this time that the anti-slavery agitators of fifty years ago were regarded.

"What do these workingmen want? What are these wage-slaves asserting as their rights? Why, for the most part, they are not asserting any rights at all. They are not asking for any They are demanding conces-They are pleading for favors. and every time a warkingman or a body of workingmen in any way, shape or manner ask for more pay or shorter hours of labor or any other thing, they simply acknowledge the justice of their condition as slaves. They proclaim themselves slaves. They declare them-selves contented to remain slaves. And they are doing all in their power to perpetuate a condition of slavery. A man will demand the rights of a man. A slave has no rights, and he will not demand any. He will demand favors, concessions, steps at a time, and various things of that sort.

Today we have on our hands another irrepressible conflict. We call it the 'class struggle.' And the same sort of dense intellects and dulled moral e say the same things to us that sald to Garrison. They accused of stirring up strife needlessly. What do you mean by talking about a conflict? Don't you know that that is dangerous word to throw out among the people promiscuously? We don't want to hear about conflict. We don't like this setting of section against sec-tion and class against class.' The circulation of the Liberator was forbid-den among the slaves. And on all ands was Garrison rated severely for owing the seeds of discord among the slaves, setting them against their mas-ters and precipitating trouble. His foolish contemporaries could not see that the trouble was already there and not a word to say in denunciation of the slaveholders or the defendants of

that hideous institution.

"And now we hear the same old cry. Why do you talk about "class strug-gle"? What do you mean by thus stir-We don't want to hear about talk of brotherhood between employers and employes, between capital and la-bor? Why not talk of peace instead of conflict?' And so is repeated the same would establish justice in its place. They do not see that the classes are here because industrial evolution and

right to property in men was denied, PUBLIC in the matter.

"Neither is there now. The laborer to a beast of burden, and he should be turned over to the Society for the Prevention of Cruelty to Animals. That is precisely what a good many people are advocating. They want that policy adopted. A beast of burden is entitled to have enough to cat and a decent shelter. It must be treated humanely. It must not be abused. It must not be overworked. Its hours of labor must be reasonable. And any one caught in the act of abusing an animal can be arrested and fined. So

"I want to say to you as strongly as my hat to the institution of slavery in any form. I will make no terms with it. I will insist that nothing but freedom will answer. I insist that the least a man has a right to demand is his rights as a man. The least a working man has a right to ask for is the full product of his labor less what may be his just proportion of what is needed to maintain the only sort of government that is needed, and that is industrial administration. Here is the key that unlocks the door of freedom want? What de you demand as your right? What do you understand to be the rights of man?. Here is the civilization which labor of hand and brain co-operating with nature has produced. co-operating with nature has produced. Every particle of it has been produced by labor. Here it is before you; these cities, these houses, these streets, these railroads, these factories, these commodities of every sort, the ships on every tion. Here it is before you. It is the product of your hands and your brain Your labor has created it. And the land and the sky, the rivers and lakes and seas, the mines and forests, and all the resources of nature no one cre-They are the inheritance of all. And he who would keep any man from their enjoyment is a robber, a highwayman, a criminal.

"I have said tonight that the system of wage slavery is an intolerable ini-quity. And that is exactly what I mean. I mean to say that no words are strong enough to express the hideous and horrible iniquity of this system. I believe it to be far more degrading and ralizing, both to owners and owned, than negro slavery was. And it is more dangerous than that because it is far more subtle. It seems difficult for you and me, I suppose, to understand how the men and women who owned slaves down South managed to justify the thing; how they could escape secing the evil of it. One would suppose that the widespread immorality which it created and fostered would have hat the trouble was already there and made an impression, especially upon the there during all the existence the women and upon the religious leadof slavery. And these people who de-mounced Garrison so vigorously had vice was winked at and ignored. Inasmuch as the negroes were regarded as property, they were not regarded as human. It was, therefore, no sin to do what one liked with his own property.
"The fact is, the maintenance of negro

slavery simply undermined religion and morality and produced a nation of hypocrites . And that is precisely what industrial slavery is doing. It is making the master class a lot of hypo-crites. And there is no escape for the members of that class from hypocrisy except by frankly admitting the exist evil and making common cause with the working class for its overthrow. industry and commerce are living a lie—a bare, plain lie. And that lie encommercial transaction was. These seople lived a lie, and there was more people lived a lie, and there was more of genuine religion among the slaves than among the masters, because it was less degrading to bear a wrong than to do a wrong. Today our rich men pose before the world in a faise light. They pretend to be what they are not. They act upon the assumption that the property which they possess and of which they make whatever disposition they like belongs to them. But it does not belong to them. They

Senator Fairbanks declares that the Republican party must solve the breat problems of the new century, and that the task will tax the genus, confrage and patriotism of the party. If these "problems" come in the shape of a tax, the Republicans may be expected rather to dodge than to solve them, judging from the records of many shining lights in the aggregation of developed capitalista. The solution of the problems of the future instead of depending on the Republican party, is conditioned solely on the complete disappearance of the system in which both republicans and Democrats live and move and have their being-to wit, the system which robs the laborer in favor of the pararite, and his tool, the politician,

To become thoroughly equipped for the conquest of foreign markets the equirements of marine transportation was a necessity that had to be proided for, and the syndicate has set about it in-a manner commensurat with the other ventures in which the have been engaged. A fleet of vessels valued at \$75,000,000 passes into the control of the greatest capitalist coneers that the world has ever known and even this gigantic deal is admitted upon all hands to be but a preliminary to further and greater acquisitions in the near future. When it is considered that the group of capitalists known as the Morgan syndicate already practicaly control the iron and steel industry of this country, the most available and accessible coal supply, and all the main ines of land transportation, it will be ome obvious to the dullest intellect that the era of competition is not only past in this country, but that in other lands it is also in a fair way to becom extinct. Against such a vombination as this, the very idea of serious compe tition becomes ludicrous, while the proposal to license, regulate, or legislate against it is even more ridiculous. The time is rapidly coming when the terms American, British or German capital, will lose all meaning instace of the vast perations which are now being engineered without regard to national boundaries. Capitalism is now taking on its international character in a manper that leaves no room for argument, and proving beyond doubt the truth of the socialist assertion that the coming struggle for the ownership of themeans of production instead of being confined to separate communities must be world wide.

THE "BOCIÁLISTIC" EDITORIAL.

The increasing number of "socialistic articles appearing in the daily press is a phenomenon, which although easily omprehended by the socialist who watches the trend of events closely, perhaps requires some explanation for the benefit of those trustful individuals who through sentimental enthusiasm are likely to be deceived by appear ances and rush to the conclusion that such and such a journal is advocating acialism

It would be perhaps unjust to deny that such articles are altogether in effective. But it would be a mistake to suppose that they are written for the direct purpose of inculcating the overthrow of present conditions . In every case they will be found to contain but one or two grains of wheat in a bushel or so of chaff, and it is the presence of these few grains which alone entitles them to be called "socialistic."

Two principal reasons are account able for their appearance at this juncture. Five years ago they would have been impossible, but today they are acceptable because the events of the last four years have made them so,

The appearance of the trust on the conomic stage is to a large extent responsible for this. It is patent to even the meanest intelligence nowadays that reactionary middle-class politician promended it. And now comes the repremended it. And now comes the representatives of the church, ever the willing tool of capitalistic interests, to aping tool of capitalistic interests. to longer taken seriously. The 'man in the street'sees that the trust is here, that it has grown in spite of all opposition, that it is still growing so fas that but a short time must clapse be fore all the industries in the country are trustified. He is beginning to understand that as economic conditions they are today, that a year hence they will be still more different. He is un-consciously recognizing the falsity of the "As it was in the beginning" the-the "As it was in the beginning" thethe "As it was in the beginning" the- | cary ory, and as the trust seems to be the central point from which the idea of conomic change springs, his curiosity s areused and he wants to know som shing of the future. And to satisfy this want "socialistic" articles make their appearance in some of the daily jourmals.

In saving "some of the daily journais." the second reason may be discovered. Those organs which exist solely for the purpose of supporting the capitalist class interests, very rarely make use of the "socialistic" editorial while those which enter a-new field to struggie for circulation with already established rivals, find it an effective eans to attract the attention of readers upon whom the stereotyped "prosperity" article has palled to some extent and who in consequence are in boasted democracy of this country is quest of "some new thing," some de-

The appearance of these articles is one of the surest signs of the dis integration of the old order of things caricatures of socialism does not in the least militate against this view. The "strictly business" journalism of the forward this plea, they are lying, and present day is keen to detect the drift of "public opinion" and cater to it acant agitator" is no menace to capitalist cordingly, the desire for success outweighing every other consideration; just as a bookseller or publisher will without the slightest scruple sell or publish socialistic works if a demand amongst the white working class, and exists for them, though he may be personally opposed to the ideas contained thereis, and even conscious of the results that may arise from them. Over the former, we as socialists exercise little or no control, but the latter depends almost wholly upon our exertions. And as our work is decoted to preparing the proletariat to deal with conditions when the "time is ripe," It would seem that the most effective way to force capitalism to de valuable literary work for the socialist cause or take a position of open hostility towards it is to push the circulation of socialist literature so vigorously that muddled "socialistic" articles will ose their value as adjuncts to profit-.

Therefore Comrade secretaries advice the Nat'l Sec'y at once if your Local wiches to be included in these circuit meetings, as we have the speakers all ready to preach the gospel of emancipation to the working class, and only wait for enough Locals to co-operate with us so as to make the plan a success.

From Elgin, Ill.

Eigin, III., April 29, 1901.

Last night the Opera House was filled to hear Waiter Thomas Mills of Chicago, speak on the subject of "Barbarism, Civilization and Socialism". He reviewed the advance of the race through the different periods of barbarism and civilization, showing how each advance was the result of some new discovery or invention by which the economic life the world changed first and then all forms of life were made to conform the economic change. He finally showed clearly how during the last fifty years a complete change in the whole economic work of the world had taken place, but that the political and social life has not yet adjusted itself to these modern industrial and commercial delife has not yet adjusted itself to these modern industrial and commercial developments. This adjustment he showed to be inevitable and that it must come under the form of socialism. The address evidently impressed the audiance despite the state of the surface of the surface

SNAP SHOTS BY THE WAYSIDE

"Has the Christian pulpit ceased to reach the Gospel?" is the question preach the Gospel?" is the question asked by a "Record-Herald editorial of sermons preached by prominent clergymen last Sunday, all of them dealing with so called "worldly" topics.

The Record-Herald represents the people" as being "hungry" for the ospel as it was preached by Moody, seecher and Brooks. It is rather strange that if this is the case, their demand ity a few weeks ago, and which dealt out the old fashioned gospel ad libitum didn't attract the "hungry" public to any appreciable extent.

To put the matter plainly there is no uch "hunger" amongst the public. The just what the various branches are domodern clergyman is keen enough to ing in the way of propaganda. detect what is wanted and furnish the goods. That the people get exactly what they want is shown conclusively by the very fact that not one of the dozen preachers above mentioned will be called to account for the omission, and still further that their sermons were the only ones that were reporte in the Record-Herald. Had these men preached this "old fashioned gospel" the Record-Herald or any other capitalist paper in the city. That gospel ure churches, which are only obscure for that very reason. This assertion of the Record-Herald is mere hum bug:

It was stated in these columns that the American capitalists didn't propose to boom things for the benefit of the Porto Rican landowners. So the game was blocked, and now the Suga Trust is getting "options" on the estatee. It is quite excusable to say "we told you so", in this case,

It is said that the New National Building Trades Council looks with disfavor upon sypathetic strikes, and will "insist upon arbitration" instead. But how will it be if the other side insisti that there is "nothing to arbitrate" after the manner of the ed Pullman? How will they insist upon arbitration in such a case? By striking as isolated unions?. The result of this procedure is a foregone conclusion. The question will remain unsolved so long as united action is loked upon with dis-

BOOK REVIEWS.

BUGLE CALLS, by Benjamin Wood, Author of "The Successful/Man of Business". Brentanos', New York 1900. 12 Mo. Gilt top, Price \$1.00.

Very rarely have we met with a handomer volume than "Bugle Calls", which nakes its appearance in a gorgeous wine colored binding, artistically ornanented with gilt representations of the musical instrument from which the Mrtle of th book is derived. The center of the design is occupied by a white shield upon which two trowels and a being surmounted with a highly original ably emblematic of the harmonlous relations which should exist between cap-(tal and labor) enclosed within a cirle. The title page is equally handsome and the text leaves nothing to be desired in the matter of typographical excellence, being divided into para-graphs, each representing a bugle blast, and each beginning with a large and ornamental initial letter. We may renark in passing, that as the object of the writer is to urge the claims of the regarded as the Union Label to be economic salvation of the working class, it is almost unnecessary to add that he is utterly devoid of any knowledge of he nature of the present social stru ture. However, the book in its make up and general appearance is without doubt 'a thing of beauty and a joy for ever. The Hustler's Column

In another column will be found a table showing the relative amount of usiness transacted with the Worker's Call by the members of the various ward branches in Chicago for the week ending April 27. A giance at this table will show in what part of the city the best work in socialist propaganda is being done at the present time. The Thirty-third ward branch comes first on the list this week with a business aggregating \$11.50. This is the banner socialist ward in the city, having polled hat purpose. It is stranger still that more socialist votes in the last election he "holiness meetings" held in this than any other ward. The Thirty-first ward branch comes second on the rol of honor with \$6.75 worth of business Twenty-fifth ward come third with \$5.85. These tables will be published each week in the Worker's Call, so that the comrades may know

From what we know of the energy of comrade Goss, the people of Newark will not ong remain in the pitiable condition which he describes - or, at least, it won't be his fault if they do.

Comrade Chas Demmrich, corresponding secretary of local Gien Carbon ordered 200 copies of the May-Day issu for the use of the club. The comrades at Gien Carbon put up a ticket in their village election recently held and polled 6 votes against 29 for the S. D. P. last November

Just because the old parties are slumbering is the greater reason why we should work.

Now that he does not need their votes Mark Hanna is not sitting un nights to love the coal miner.

J. Plerpont Morgan is doing better work for the socialists than they could have done by electing a man.

The coal trust has advanced coal one dollar a ton without advancing the wages of the miners three cents a ton.

If it were not for the ray of socialism n the night the future would indeed look dark for the workingmen. The state legislature did not pass any

free text book laws. It was too busy granting favors to the corporations. The world's trust must be met and

conquered by the united world movement of the laboring men. We are loaning money to nearly every country in the world, but the men

who produced the wealth are not drawing the interest. Bryan wanted to debate with McKin-

ey some time ago, but up to the present time he has left all of the socialist challenges unanswered. Every man in Chicago who believes

n socialism should count it as a duty

and a privilege to help extend the circutation of the Workers' Call. The legislature adjourns today and you can count all the bills they passed on municipal ownership on your thumbs

without using your thumbs either. Another great combination of workingmen projected in Pittsburg, but as nothing is said about making the fight

at the ballot box the capitalists are not greatly alarmed, When J. Pierpont Morgan gets all of his plans carried out he will see to it that there is no such thing as the mid-

die class left. Then who will the democratic politicians worry over? The socialists are giving Mr. Bryan some new topics to think about from lot to learn, but there is hope for him

if he will have patience. The railroad companies are giving the president of the United States a free ride in the finest cars in the land and it does not hurt his conscience a bit to take it.

Where did Morgan and Rockefeller get the money to buy everything in sight? They just held it out from the wages of the workingmen, that is

A municipal ownership candidate cut into the socialist vote in St. Louis. It is the recurrence of such things that emphasises the necessity of circulating ocialist papers that are clear on all points.

The speakers for the soap box campaign will need the help of all of the workers. By selling papers and taking subscriptions throughout the crowd the effect of the speakers' words will be made lasting.

There never was a better time than the present to put socialist literature in the hands of members of the labor unions. They are just beginning to see that they are up against it and many, of them are looking for the way out.

A Chicago preacher has re cause he could not live on his salary of \$900 a year. Here is a limit for the workingmen. Let them resign all jobs that do not pay over that amount, because the preachers say a man cannot

It is the combined work of individuals that makes the mighty irresistible movement. A thousand men selling Workers' Call cards each week as a half dozen comrades are doing would soon make the paper a tremendous power. . This is a work that the humblest can do

MUNICIPAL OWNERSHIP,

suvres of the Capitalist Pol in Regard to this Measure of "Reform."

It is amusingly interesting to follow the tactics of the politicians and news-papers of Chicago that have been duping the voters with the municipal bait. There are a great many people who seem to think that municipal ownersmip is a panacea and who flock to the support of a party that mentions municipal ownership in its platform, without stopping to con what that party's purpos is, and to what extent the inserting a municipal-ownership glank into its platform is prompted by trickery the knowledge that it can be used for vote-getting purposes, and then conveniently forgotten. They howl and vote for the party as if afraid any pushing forward or discussing of their pet theory would displease the managers who might go and rule it out of the platform and then they would have no reason to vote for the candidate would be at a loss as to what to It did not seem to matter much them that the ownership suggested was not to be effective until twenty or more years had passed-just so was in the platform, suited them. And the managers have shown that they knew how to take this matter just for what it was worth. Mayor Harrison says he is anxious for the traction question to be settled and thinks the street railway people should make the first move. While this atti-tude is being assumed by the mayor, the Chicago American is telling of the doings at Springfield in trying to get the legislature to grant power to Chicago to acquire ownership of gas plants. So it turns out that voting for Harrison did no good towards municipal ownership of street railways, as he ems to be in a great hurry to turn over the use of the streets for twenty years more, and his election did no good towards municipal ownership of gas plants, as the state legislature has to consent to it first. As the legisla-ture is in the control of the corporations this right will not be granted and so after all, it did no good to have It in the platform, This ownership business is just a trick to divide the people. The capitalists know that a whole lot of people who do not seem conscious of the fact that there is a class struggle for political power, can be led from the political ranks in which they belong into the political ranks of the opposing class, by offering to favor a reform which se class-unconscious people think

would benefit them. This was accomplished in the late election by the capitalist Democratic party. capitalist Republican party, however, did not give the municipal ownership theorists even the slight satisfaction of seeing the words in their platform. They knew the action of the Democrats was only a bluff, for they controlled the legislature and it would not consent. They are against municipal ownership because the others think the time is not ripe. Those who are against it altogether are interested in the profits of present ownership, and those who think the time is not "ripe" are the "business They think the time will not until the council is conmunicipal ownership now the temptation to boodle would be too great for the present "penniless" aldermen, so voters must first send "moneyed be a ripe time for municipal Why? Because their inownership. "moneyed business men' would be greater than their interests would run them in the interests of unto" them. They would be run on "business principles" and the profits would go to reduce the taxes of the "moneyed business men"! When, according to these principles, the time is ripe, the small "business men" and the small property owners will be asked to vote for municipal ownership, And what good will it do them? None be taxed as high as is necessary to get money needed to run things and "big fellows" will get out easy. If tolerably good passenger

with them they must pay fair wages. If there is a howl for lower fares they can reduce the fares to cost and win votes of the traveling public, but will that help the workingmen and small property owners? Before, the de off him went to reduce the taxes of the big fellows and the little fellows paid the big taxes; now, the fares are reduced, cheap transportation makes property in dwelling houses more valuable and rents go up. lp the small property owners? No, cause the profit that is lost by the city by cheaper fares must be made up in tax's on property, and cheaper a transportation having made the property of the little fellows more valuable, their taxes are increased. Why are all these methods against the workingman and the little fellows? Because the governing power is manipulated perning power is manipulated interest of the class that conAnd to keep on controlling it as uses every means in its powcodive the members of the other a order to keep it divided. It

plays the interest of sections of the class against each other, and se sections are foolish enough to blindly fall into the trap.

But is there not some indirect benefit in municipal ownership even under the present governing powers, for the oc. Lat it is possible, no doubt, for it some circumstant against their interests. And agains heir interests is the only way which it will be inaugurated by the apitalist party, for if it is given by them it will be for the purpose of satisfying the people with a crumb in or loaf. And such action is certainly

against the working class The Socialist party platform con tains no reference to municipal owner-ship for reasons evolved out of the fake positions taken on the question by the capitalist parties, and because the question is of little importance to the working class compared to the other questions that are in the platform. The proposition waich it does not confain can be carried out by the success of the party at the polls. The propo for municipal ownership advosition cated by a wing of the capitalist class cannot be confused with socialism, as long as the Socialists do not advocate it, by those who have read our plat-

Alarmed by the growth of socialism and being desirous of checking it the capitalists would, as a first measure, agitate municipal ownership, and hav-ing the power to grant it for such a purpose, through control of all branches of government (it wouldn't matter if the city were Democratic and the state Republican, for in both cases the capitalists would be in control) they could pose as benefactors of the people by relying on the people's ignorance of their real interests in the matter. Thus, what the people want would/come without its being demanded by the Socialists, but really on ac count of the socialist movement, they see the only real issue—Socialism.

Therefore if municipal ownership is a versus Capitalism.—Missouri Socialist benefit to the people it is attained through the capitalists' fear of socialism and consequently on account of the Socialists' efforts, without their agitating for it in competition with the capitalist party which proposes it, and, count of the fact that the capitalists have the advantage of being able to grant municipal ownership quicker than the Socialists could, we gain by pointing out the fact that the fear o us was what impelled the capitalists to act, and by leaving them to carry out their plans in the face of our fire while we are at the same time centering our strength on showing what is really of the most pressing importance to the working class

The Socialists in power will give employment to the unemployed. Is that better to the man out of work or the will be out of work, than municipal ownership or not? Is it better to know that your nickels spent in car-fare go into the city treasury to lessen knew that without its consent the city fare go into the city treasury to lessen could do nothing and they knew that the taxes of your boss than to know that whatever comes, sickness in your family will be relieved by the medical skill free of charge as a right due you as a producer, and that your children will be provided with clothing, books and food in order to attend school and acquire an education When the workingmen see that these things are accomplished by putting into power members of their own class. trolled by "business men." If we had it will not be long before their votes will put their own class in control of the state and then the nation, and when once that is done they will be the only ones to consider; their welbusiness men" to the council and then fare will be the country's welfare and against that welfare of what avail will vested rights be and twenty-year franchises? The workingmen must fifst realize their class interests and act acas boodle aldermen, and instead of cordingly by voting for them at the running the utilities for boodle, they polls "and all things else will be added

Kansas City, Mo., April 22 1901. The socialists here are well satisfied with the Vall Meetings Sunday and Monday. Both were well attended and helped the local movement perceptibly as evidenced by new members and additional aid.

Comrade Vall's topic Sunday afternoon at Music Hall was "Why the Workingman Does not Attend Church", the same having been chosen in answe to the question raised by the Ministers Alliance, and bandled about by the capitalist dailies.

The discourse even as reported in two of the local papers ought to give the gentleman of the cloth something to think about. The "Journal" gave the best report, missing of the reason why the present industrial system is unjust, yet did not garble what

why the laboring class has quit the project for the economic organization church about as follows: They find the of the working women engaged in church does not want them unless they forming a \$40,000,000 knit goods trust - are content to go to the poorer churches; the must not come where the cap talists do. WOMEN AND SOCIALISM.

Question is Discussed at the Anual Con gress of The Socialist Party of

The 18th annual Congress of the Sc cialist party of Bellium was held on April, 7th, 8th and 9th, as we learn from "Le Peuple" of Brussels.

Probably the most interesting ect for American readers which was taken up by this congress is that of the organization of socialist women The subject was brought before the congress by Comrade Bergmans strongly advocated the idea of admitting women into all working class orranizations "By initiating women he said, 'into the political and economic struggles carried on by the men the entrance of the women into the sacialist party would be facilitated." Madame Gatti de Gamond followed

with an interesting address from which we quote:

sre said, "to leave their wives at home when they come to our meetings. For this reason the women will have to be brought into socialism by other women. To this end a Federation of Socialist Women has been established, and we call upon women to organize a group wherever possible.

"We are ready for the work. Dismiss the idea that we are trying to overturn the home. It is precisely as if one were to say that the organization of unions would necessarily break up industrial organization. From this time on, the socialist party must consider socialist organization as its chief concern. It is simply unthinkable that wome should be excluded from mutual benefit societies. Give some thought to the condition of your wives. They, are the poor among the poor, and theirs be the first benefit arising from

socialism. Comrade Beerblock said:

"If there are comparatively few wo men in our organization the reason is that we have not wholly done our duty toward women. Our means of reaching the working class has been the press With women we need to use other means. Where is our press for reach ing women?

"It is often said, if women go to th meetings that means that the men stay at home to take care of the children Why not? Do not the children belong "Speaking here in an audience, made

A delegate from the Netherlands de-clared that he had never been soardent in the struggle for socialism as he had been since he had his wife in the ranks by his side. "It is the degradation of has detracted from woman's dignity and independence. If woman wishes to have equal rights with man she must enter the same groups with the men. Accordingly the programme must be of wamen in one and the same social and not in an association for women. To permit woman to make use of her rights as a citizen she must be liberated from economic oppression.

largely upon the relations of women to the socialist co-operative societies. At the conclusion of the debate, the following resolutions were adopted, with only one dissenting vote:
"The congress, desiring to organize

socialist women, invites the local fede rations to arrange for possible associations, each in its own neighborhood giving the preference to mixed group

"The congress suggests as practical ethods mixed groups under the form of mutual benefit associations, labor unions, and political and philosophical

groups.
"The congress calls upon the National Comrade Vall summed up the reasons pare for the next Labor Congress a manufacturing.

It will be observed, from this report that the problem of organizing socialis women is coming to the front in Euclusion of our Belgian comrades is that the best in crests of women and of the general movement alike will be served regular organization rather than by the cration of new machinery, CHARLES H. LOCAL NEWS AND NOTES.

At the meeting held last Saturday evening at the corner of Carpenter st. and Milwaukee avenue, comrade J. H. Bard deitvered the principal address. A large numer of copies of the Norker's Call were sold and distributed. These needings, which will be held every Saturday night, ought to be very successful since there is a large number of active socialists living in this vicinity.

Comrades Robbins, Klenke and Bard spoke last Sunday evening and the corner of Peoria and Madison streets. This corner has been a center for socialist agilation or the west axis for several years and the results have been very satisfactory. A large numer of Worker's Calls were sold. These meetings will be continued every Sunday evening, and comrades living on the west side should see to it that they are made a success.

In the general enthusiasm incident to the inauguration of the season of out door agitation the trade unions have mot been forgotten. Last Saturday evening comrade John Collins spoke in an open meeting of Unity Lodge, Machinists Union, at their hall at Madison and Union streets. Thursday evening comrade Collins addressed the Amaigamated Wood Workers' Union, No. 18, at Normania hall, corner Milwaukee avenue and Green street. Last Monday evening comrade Thos. J. Morgan spoke before the Amaigamated Wood Workers' Union, No. 184, at Koch's p. m. Speakers, Sam Robbins and Aug. Workers' Union, No. 184, at Koch's Hall, 194 East Randolph street. Com-rade Morgan addressed the Painters and Decorator's Union of America. No. 184, last Tuesday evening at their head-quarters, Clifford's hall, corner Sixty-third and Halsted streets. Friday eve-May 3, comrade Aug. Klenko before the Amalgamated Glass Workers' International Association, at Lauterbach's hall, 55 N. Clark street.

Last Saturday afternoon the first open air agitation meeting of the summer was held at the corner of California and North avenue. This is one of the most important centers of socialist agitation the north-west side and has be on the north-west side and has been the site of much socialist activity during the past eight years. The seeds that have been sown in the past have borne good fruit as is evidenced by the splendid success of last Sundays meeting. Comrade Sam Williams agreeably surprised the comrades by opening the meeting with a short and pointed address. Comrade Williams is a new speaker and judging from the splendid beginning he made last Sunday will undoubtely become an able and convincing speaker. The address of the afternoon was made by comrade John Collins, who held the audience for over an hour with a comprehensive exposition of the socialist philosophy. During the evening over 400 copies of the Workers' call were sold by comrade Williams and others. These meetings will be continued every Sunday afternoon. site of much socialist activity dur

ABREAST THE TIMES.

(Continued from page L) authorities and verify our facts that

they may not be gainsaved.

The secialist believes this movement o be in line with the development of vents, that he truthfully interprets the social phenomena. As such is the ion of conditions. We hear much talk of conservatism and radicalism. The scialist applies to himself neither of these titles. He is a believer in the ruth whether that truth be conserrative or radical. He can maintain an old position or advance to a new one only so far as facts bear him out. Evry great movement is inclined to eatch a few phrases and repeating them over and over lose all their meaning. These expressions become a hindrance if they have not for us a cital meaning. We cannot afford to parrot-like say over these words; they

nust become Hying truths, We must not lose sight of the fact that we are fast securing an educated proletariat. Our colleges like those of Surope are turning out men and women who can find no niche in the professions, and fall back not infrequently into the ranks of the manual laborer.

These men and women have much to learn of us. They usually know nothing of a great labor organization or of a political party like the socialist that is at the same time a vast educational body and the propounder of a philosophy of society.

To understand the methods of thought and work of such a working men's organization cannot be done in a moment and it would be well for them to become learners for a time. In turn-Speakers, Sam Robbins and Aug. for what we give them, we will take and utilize all their knowledge, hissocialist purposes.

The works of men and w yet with us we must use wherever we have need of them. What we ourselves have not the time to observe shall we not obtain where we can?

For instance, Lester F. Ward is no socialist, but he has been a keen observer in the field of sociology and philosophy and has arrived at many excellent conclusions, some of no small calue to us. His works are alive and vell worth the perusal of every soialist student.

We have been fortunate in posses in the past men like Morgan and Engels who wrote on the origins of society, and today the able Lafargue, But we cannot enquestioned accept Thursday-Madison and California, 8 the works of any man. Recent investigations may force us to other conclusions than those they drew on some points. They advanged as far as their time permitted. All knowledge is a process of correcting older errors and discovering new facts. For example, Morgan's work which is of the highest value has on one point been sup-planted. He believed that the human race no doubt passed through a stage of promisculty. More recent writers show that it did not. The works of Westermarck and Letourneau offer a good evidence on this point.

It was only from the fact that he studied deeply into social conditions that Marx was able to so well predict the coming of events. That is the only ground for any science. Where is there more need than of men who today seeing clearly the present condition of industry and reading in the combine, the extension of trade, etc., the signs of the future may be able to outline social evolution and thus understand in the best manner the new conditions?

will say. "Socialism will come any-way. Industrial events are bringing it," That is frue, but few socialists will believe that the advance of socialism cannot be aided and shaped by an organized body of socialists and further, few will deny that an intelli-gent, sound thinking, up to date body the case can far better meet the capiened, illogical visionary proletariat.

INTERNATIONAL SOCIALIST REVIEW

Several months ago we tried the experiment of offering the INTERNA-TIONAL SOCIALIST REVIEW three months to eight new names for a dollar, We kept the offer open but a short time, for the amount of labor involved in handling the short-time subscriptions is so great that it meant a certain loss to us if we did not keep a large portion af the subscribers. We have justfinished checking up our list and we are pleased and encouraged to find that over three-fourths of these trial subscribers have renewed for a year,

We therefore make this new offer, the most liberal offer yet made on any high-class socialist magazine: For one dollar we will send the International Socialist Review three months to different addresses in the United States or Canada, but outside the city of Chicago, and to additional names sent at the same time for ten cents each. Observe that the offer applies to New Subscribers only, and that each copy must go to different names; our price for ten copies ubscriptions, we will accept smaller number at fifteen cents each, but with a of getting thirty cents worth of the best reading matter for ten cents. We do not send sample copies free, but will send you two sample copies postpaid for

Like his smaller and weaker brethren Mr. Sage pleads for a return to "the old-fashioned system of honest competition," and like them he also pleads not for himself but for the "community." a phrase behind which skulks every capitalist interest on earth. It is only because Mr. Sage scents a "grave danger" to the aforesaid community that he ventures to intrude in the coi-

But Mr. Sage's pessimism is not allowed to go unchallenged, Half a dozen well known "captains of industry" enter the lists against him in the same magazine, all of them like him presuming to speak in the interests of the "community," and all of them showing that the furthering of those interests was the main object of the establishment of the industrial combinations which so slarm Mr. Sage. Foremost amongst these champions of up-to-date exploitation comes James J. Hill, the "Schoolmaster of the Great Northern," Charles M. Schwab, the million dollar employe of the billion dollar steel trust, and Chas. R. Flint, President of the United States Rubber Co., with several lesser lights of the new order, who one and all declare that not only are Mr. Sage's gloomy predictions unfounded, but hint broadly that Mr. Sage himself is a back number.

Besides, it is strange that the workingman whose capital has yet to materialize, has such a glorious prospect before him, while the horde of little exploiters who actually have some capital in their possession, do not seem able to forestall him by getting in ahead. Before Pettigrew got the "tip" in Wall Street, which permitted him to appropriate labor products created by other people, he predicted that Socialism would be the issue in 1964. He can now push the date as far as 1908, and if in the meantime he gets another opportu-nity to grab the plunder extracted from the working class, he may postpone its advent to 1912 or even later—and ho so-cialist will find fault with him for so doing. PREPARING FOR CONFLICT

Struggle for Control of Powers of the State an Inevitable Necessity of the Future.

Divested of all sentiment, removed man outside of the socialists ranks. And all May Day sermons are for these outsiders.

Combination by the capitalists is an

accepted fact. There may not be a firm, bution, for the purpose of bringing cooperation among themselves into being, but, nevertheless, the co-operation is isolated unions may have accelerated evolution, is immaterial. All combinarough shod over the wishes of all not members of the trust; they have no re-spect for either producer or consumer; they ignore the laws, and where the laws cannot be ignored they purchase a favorable decision. That these com-binations, on the other hand, have accomplished good cannot be gainsaid. Waste in a thousand ways has been eliminated from the production and distribution of things. And chief among the good may be mentioned the event-

In fact, the good is only incidental. The trust has a natural impose to crush the producer and the consumer to a position of abject subserviency. Nothing, apparently, stays this impulse. All the forces of society, legal and other, are with these soulless combinations. Absolute control of the market is not on-ly possible, it is assured. The universal for the future, nor regard the breaking trust can dictate terms to all men, for They know that while that its, their wants cannot be said therefore do all in their help along the evolution that that here and there some "sympath-izer" with socialism, or even some in-dividual within the socialist ranks, may barred from dealing with a competitor

in the socialist movement, but these unusual incidents have no effect upon a movement in which a class is involved. Just as the capitalist system is not endangered by the bankruptcy of a single capitalist, so the acquisition of wealth by an individual socialist or socialist "sympathizer" cannot check the movement as a whole.

The "calamity hower" in about 1. is offensive will bring into being active defence. Every onslaught of capital will compel a building of fortifications and will eventually bring forth a de-mand for reprisals. These fortifications of labor are undoubtedly the labor labor unions, and from the labor unions will march that army which will stay the heavy blows capital inficts upon our the neavy blows capital infects upon our common humanity. The trust will be met in the field by an enemy equal in force, equal in extent and equal in powers of consolidation. The day when any single capitalist or combina capitalists could corner an isolated union and beat it into submission is past. The national union, finding its that co-operation on the part of its ot as separate organization sub-divided according to a special de-partment of human shill, but as a combined organization, moving at the hest of a central body, is the only hest of a central body, is the only safeguard against the encronchments of
capital. The trust is capital centralized. The national union is labor centralized. The trust is moving towards
further centralization, and a trust of
trusts is the inevitable outcome. Already the national unions are moving
towards consolidation, and there will
be a vast union of unions. It is only a
matter of time till these conflicting
forces confront such other on a sigie
battlefield. Already the guns are being unlimbered for action.

But as it suits the capitalist press to pretend to believe "work" is the one thing needful. it is not strange that the conduct of the loved in refusing to be exploited on a farm is inexplicable to them. There ots of "work" on the farm and too little of anything else, and even capitalism cannot blind people to the truth that men dont want to live to work, but rather to work to live.

CLERICAL SALARIES. A discussion is now going the rounds

of the dally press on the question as to whether a clergyman can maintain his family properly on \$900 per annum, topic which was furnished through the action of a city minister who resigned his pulpit because he found it impossible to do so on that sum. The general opinion of the press on this matter so much as a worker as an ornamental appendage to society. His renumeration, says one paper, should be "guaged by the social standards of his conpregation. A man who ministers to a congregation of poor working men does not need as large salary as one who presides over a wealthy and stylish church. It is futile to try to measure if this is true, it merely shows that no "reward of ability" exists for the claror \$9,000 is matter which is determined by the amount that his congregation dieground from the economic to the polthink fit to pay. The law of supply and demand does not operate with him as with other wage laborers. The \$3,000 minister merely reflects the fact that he has "a wealthy and stylish congregation", while the \$900 brand implies a poorer and less fashionable flock. In most of the newspapers which confmented upon the matter the above was the general view put forward, and it will go far to explain another query which is going the rounds of the press as to why "the Gospel" is not preached A man who occupies a position in so ciety such as described above, can should be preached, when it is admirted that his salary instead of depending upon his ability, is merely an indication of the amount of property owned by those who pay it.

TWO GREAT HOSTILE CAMPS.

No better evidence of the existence of the class struggle can be given, than the fact that the concentration of capital is to be confronted if possible by one vast labor organization. The idea which appropriately orginated in Pittsburg Pa., contemplates the consolidation of nore than two million workers into one united body, the necessity of such a nove being openly proclaimed as a measure of defence against the billion dollar steel combine.

Although local labor leaders state that they know nothing of the proposed union and even although some of them regard it as impracticable, it is none the less certain that the attempt will be, in fact must be made. How it will fare when in economic conflict with the combination of capital which called it into existence, is an altogether different

The scope of such an organization vast though it may appear when confrasted with that of the existing labor unions will be found all too insufficient to carry through the programme that has been mapped out for it. And even if its organization succeeds beyond the wildest hopes of the most ardent trades mionist it will yet be unable to win from its antagonists anything at all proportionate to the energy spent upon constructing it. As its promoters say, it is to be a defensive alliance, and its main object will be to hold ground already won instead of pushing forward to new conquests. And it is problematical that it will succeed even this far.

The organization which may reason ably entertain hopes of winning from capitalism must be aggressive instead gyman, and that whether he gets \$900 of defensive. And the aggressive cannot be taken without shifting the batlical field. This may be easily deducted from a study of the events which mark the history of the labor movement.

> It would be useless and even foolish to expect that those in charge of the formation of this great labor union, will of the socialist press on this question, much less accept it. Its truth must be demonstrated in a different manner and the demonstration will be made not by the laborers themselves, but by their enemies, the capitalist class. It may e time and cost much suffering to recognize the truth of the demonstra-

The following letter to Wm, J. Bryan which has been inspired by the open letter of Marcus Hitch which appeared in the Workers Cill of April 27th, has been forwarded by the writer for publication in these columns. (Ed.)

Sacramento, Cal., April 20th, 19el. HON, WM. J. BRYAN. Lincoln, Neb.

Dear Sir:-

Dear Sir;—

I have just read with great interest in the Workers' Call, 27th inst., the open letter to you by Mr. Marcus Hitch, It really seems to be an earnest appeal from a true friend and admirer, beckening you on to proclaim the truth in all its fullness, to advocate fearlessly the right of man against the right of property.

all its fullness, to advocate fearlessly the right of man against the right of property.

I beg to call your attention to a paragraph that made me a single taxer; If it is right for any number less than all to "own" any part of the earth's surface, then it is right for one to own it all: but as man has to use the soil in order to live, he who owns the soil owns the man who tilis the soil owns the means of human existence. This seems unanswerable, seems axomatic, in fact. Now, strike out "earths' surface", and insert "the means of production and distribution", and the logic seems just as good. Not only men, but women and children, have to work on the R. R.'s, in telegraph and telephone offices and in the factories in order to live, and those owning these instruments of distribution and production as veritably own, those who have to use these "tools" in order to live, as do the owners of the soil own the tiliers of soil.

It is my belief in your loyalty to truth and my faith in the large following you will ever have when battling

It is my belief in your loyalty to truth and my faith in the large following you will ever have when battling for its defence, that prompted me to second Mr. Hitch in vrging you to take a day off for the consideration of these great social problems as presented by true socialism.

As a life-long republican and as one who voted for you not only in 1896, but in 1900, believing you to be the champion of republican principles as faid down by Blaine, Garfield, Lincoln and all the leaders of that party; including McKinfey himself prior to 1896. I ask you to believe that this second to the call of Mr. Hitch is actuated both by a loyalty to you and to the doctrine of human rights.

Yours very truly

The above is an extract from an article by James J. Hill, the reliroad magnate, in the May number of the This may be taken as a fair illustration of the amount of knowledge possessed by the ordinary capitalist politician, on a subject with which he is supposed to be familiar, by those as ignorant as himself.

Schwab on "Their Effect on the Steel and Iron Industry"; C. R. Flint, treasurer of the United States Rubber Co., on "Their Retation to Capital and Labor."

It is very important that every so-cialist should be so familiar with the arious phases of the socialist posttion that he can turn many events chronicled in the daily press, into straight propagands. The periodiculs and press of the country are being forced by economic conditions to trea the question of consolidation and concentration of interests in a more of less exhaustive manner. Socialists should equip themselves with inform ation and arguments so that they may

take advantage of every discussion. One of the greatest needs of Amer ican Socialists has long been a bool that should, at once, give a thorough scientific explanation of socialism in all its phases so as to make a reliable text-book for socialists, and still be so simple in its language and elementary in its treatment of the subject that it could be put into the hands of new inquirers.

A book recently published by Professor Emile Vandervelde, of Belgium, entitled "Collectivism- and Industrial Evolution" seems to fill this long felt want. Already it has been translated into the German, Russian and Italian languages. The first part of the book i very pertinent to present conditions in America, dealing with the subject of capitalist concentration and the disappearance of the "peasant propriet-ors," "artisans" and "small retailers." This is discussed with a wealth of illustration and argument nowhere else to be found. Property" is then traced through the successive stages of corporations, monopolies and trusts. The attempts of capitalist writers to explain this process of evolution are then taken up and thoroughly answered.

The second part of the work deals with "The Socialization of the Means of Production and Exchange" and is by far the most exhaustive study of the transition from capitalism to socialism that has yet appeared. The final chapter discusses the objections to socialism in a thoroughly satisfactory manner. Of the book as a whole, it is not too much to say that it is destined to become the standard text-book of International Socialism and the greatest propaganda work yet issued.

This book is soon to appear from the press of Charles H. Kerr & Co. The Worker's Call has made arrangements with publishers whereby it obtains a imited supply of the book which it will offer as premiums to its subscription hustiers. The book will retail at 25c. Arrangements have been made to give a copy of "Collectivism" with every new yearly subscription for the Worker's Call. Comrades desiring a copy of this book should bring or send their subscription to this office as soon the face their subscription to this office as soon with dire forebodings of these evil as possible. Names will be filled and a copy of the book sent to addresses as soon as it is off the press.

"Historical Developments" It is instructive to observe how com-

lacently the capitalist presswill accept a logical explanation of movements which no longer threaten existing conditions of exploitation. A writer in the Atlantic Monthly in an essay upon the Ku Klux movement in the South after the Civil war, asserts that it was "p man's contrivance but a historical development" brought on by the tyranny of carpet bag rule" during the reconstruction period, and the daily press in its editorial comment agrees with the writer who is said to take a "dispasionate view" of the subject. Now socialism is a movement which compared in point of extent and importance with the Ku Klux (and this is the only analogy between them) completely overhadows the latter. But how would the capitalist press comment upon the that socialism it "no man's contrivance but a historical developbrought on by the tyranny of cathe writer took a "dispassionate view" Scientific research is all right so long as it carries no perceptible danger to capitalist class interests.

MAY DAY IN ROCHESTER N. Y.

in a Stirring Speech Before an Audience of Two Thousand.

Rochester, May 2nd, 1991 Rochester had its May Day demon stration, as well as the great cities of Europe. There were 2,000 people assemb led at Fitzhugh Hall, the largest in the city, last night, celebrating May Day under the auspices of the Social Dem ocratic Party and the local trad-

Wm. McNamara, of Boot and She Workers' Union No. 15, of Rochester and Job Harriman, of New York, werthe speakers, with Geo. A. Cooley, Bus Manager of the Central Trades

and Labor Council, presiding, Mr. McNamara spoke on "The Necessity of Trades Unions for Working People". Years ago, he said, he reached the conclusion that the unions were an absolute necessity for both men and ing the working classes, he asserted have grown worse year after year for a long time, and the question is not now to check the downward tendency. Organization of the workers will not only check It, but, if the organization is perfect, will absolutely stop it and even start the condition of the workers

He cited the victories of the workers of the coal mines to show what can be accomplished by thoroughly organized He said years ago the laborer used to say: "First comes I, and then comes I, and then I come again, and then my fellowomen come afterward,"
"There is something wrong with that man. Your fellowmen should come everytime that you consider your own interests." He said also that there was a lamentable lack of good thought upon ocial and economic conditions. Also that he thought that there was that in every man which was capable of making him an intellectual giant; there are hundreds of Stephen A. Douglasses and hundreds of Abraham Lincolns; diamonds in the rough. I believe all that is needed is that careful and persistent thought which shows itself in an anxiety to wish to know the truth. We should not wish to live in a fools' heaven, I want to know it and you should know it. He said that he believed that workingmen should calmly look the future in the face. "He should say: What is What are going to be the conditions for them? The Legislation is bought and sold to the highest bidder. Much of it is designed to shackle the generations yet unborn. When a man has no leisure or nothing except that wolfish struggle for bread, at that time he ceases to b a fit citizen of a republic. A povertyfreedom in any land and never will. The well fed man is a useful man. The

pauperized man is a useless man."

He said also that the individual can no longer command recognition, but the man with 1,000 of his fellows behind

"Justice is dead in the world unless duty under the circumstances, at present, until the time is ripe for political action, is to form a powerful compacted organization. Therefore I say to all who are here to-night, affiliate yourself with the others in your craft. In union there is not only strength, but also self-Job Harriman, the eloquent Secretary

of the Labor Secretariat, next adressed the meeting in a very forcible and convincing manner:

"Comrades, Workingmen and Women of Rochester! According to President Mahon's report seventy-six new branches were organized during the past year making a total of 184 offiliated with the association. Since the last convention held in Louisville two years ago there have been twenty-three strikes called, several of which are still on. The Post Office Department has issued an order prohibiting street railway companies from displaying "United States Mail" signs on cars other than those on which mail is actually being carried. In conclusion President Mahon said: "We have had to facconditions with which no other class of workers in America have had to contend. But with all the opposition we of the past two years we can congratulate ourselves on our present memb ership and strength as a labor organization." It is quite probable that the convention will establish a defence fund to protect the members during the lockouts and strikes. "We recommend that a list of the

members of the Iilinois legislature who voted against or helped kill labor bills be printed and posted in every meeting place of workingmen in this city.". The above is a part of the report of the special committee sent by the Chicago Federation of Labor to Springfield to favor the passage of labor legislation. In a circular letter which he has sent to all the clubreembers be as a serie as a set a serie. which he has sent to all the clubrembers, he asks excry member in the party to give at least one evening each week to helping push the circulation of the Worker's Call and secure new members for the local clubs. If the comrades respond there is no question that the task which comrade Mills has set for himself will be more than realized.

himself will be more than realized.

Every member in the division has been furnished with a copy of "How to work for Socialism", a Pocket Library Book of 22 pages written by comrade Mills, every page of which is full of helpful suggestions. Here is an extract from it on the importance of circulating the party papers: "Never count your work finished with a man until he is a subscriber to a socialist paper; that comes in without knocking and stays without offence, is always fresh, is always giving news of the work, is as indispensable for a socialist as fuel is for cook stove."

Conrade Rasmuseen of the 22nd Ward is the record breaker for last week. His Ward sent him to the Werker's Call office for ten subscription cards, and he got back with only three, having disposed of the others on his way home.
